

RAMAVATH VEERESH NAIK

Full-Stack Engineer | Backend-Focused | MERN

+91 7702513376 | veereshnaikdeveloper@gmail.com | Hyderabad, India | [LinkedIn](#) | [github](#)

PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years building and scaling enterprise-grade backend systems and fintech platforms from architecture to production. Led a 12-engineer team scaling a live financial platform to **20,000+ active users** processing **250,000+ daily system events** (transactions, mining, rewards, payouts). Strong hands-on experience in Node.js, Apache Kafka, Redis, AWS, React.js, and distributed system design.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), Node.js, React.js, Next.js, Express.js, TypeScript, Python, FastAPI, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases & Caching: MongoDB, PostgreSQL, Redis, Cloud Firestore

Cloud & DevOps: AWS (EC2, VPC, ALB, S3, CloudFront, SSM), Nginx, CI/CD Pipelines, Git, Zero-Downtime Deployments

Message Brokers: Apache Kafka (DLQ, Retry Logic, Idempotency), BullMQ, Redis Queues

Security & Auth: JWT, OAuth 2.0, AES Encryption, Private Key Management, OWASP Top 10, Rate Limiting

Blockchain & Web3: Smart Contracts, Custodial Wallets, Token Swaps, Web3.js, MetaMask, TrustWallet, Binance BEP20

Payment Gateways: Razorpay, PhonePe, PayU — Automated Verification, OCR (Tesseract) Transaction Processing

Observability: Prometheus, Grafana, Loki, Promtail, Distributed Tracing, Application Logging

Architecture: System Design, Event-Driven Systems, Horizontal & Vertical Scaling, SOLID Principles, ACID Compliance, REST APIs

Leadership: Team Leadership (12 Engineers), Code Reviews, Technical Mentoring, Project Planning, Risk Assessment

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | Jaisvik Software (P) Limited – Jaimax Decentralized Digital Currency

Apr 2025 – July 2026

- Spearheaded a 12-engineer team owning end-to-end system design and AWS cloud infrastructure, scaling the platform to 20,000+ active users.
- Architected a high-reliability cryptocurrency platform processing 250,000+ daily system events (transactions, mining, rewards, payouts) — spanning wallet transfers, token purchases, referral bonuses, and daily payouts across Razorpay, PhonePe, and PayU.
- Integrated OCR-based automated payment verification across all three gateways — eliminating manual reconciliation and reducing payment ops effort to near-zero.
- Designed J-Wallet custodial wallet with AES-encrypted key storage and unified interface for token swaps and Binance BEP20 deposits — enabling secure financial operations at scale.
- Designed event-driven architecture using Apache Kafka with DLQ and retry logic — improving system reliability and reducing transaction failure rate by 30%.
- Scaled API performance through Redis caching, cutting database load by 40% and response times by 50% — supporting business growth without added infrastructure cost.
- Engineered highly available AWS infrastructure with load balancing, health checks, and zero-downtime deployments — ensuring reliable access for all users across financial-grade operations.
- Ensured regulatory compliance via DigiLocker KYC integration, reducing onboarding friction while meeting Indian identity verification mandates.
- Drove retention through a multi-tier referral system, token swap, and AdMob-powered Android monetization — directly contributing to platform revenue.
- Engineered JMC Mining System with a three-phase reliability model (Normal → Recovery → Resurrection) and dynamic slot scheduling — reducing the risk of revenue loss during recovery cycles.
- Implemented polyglot persistence strategy with PostgreSQL for ACID-compliant financial transactions and MongoDB for high-volume variable-schema logs — supporting long-term data scalability.
- Automated critical business operations via scheduled cron jobs for staking payouts, mining notifications, and DB maintenance — reducing ops overhead and eliminating manual intervention.

Full-Stack Web Developer | Swio Corporate And ITES Private Limited

Jun 2023 – Apr 2025

- Delivered 8+ production web applications — PWAs, event platforms, e-commerce, and exam portals — scaling to 10,000+ users with consistent reliability and on-time delivery.

- Engineered Hashpro Academy platform with integrated payments and exam management — reducing onboarding time by 35% and improving business conversion rates.
- Designed secure, scalable RESTful APIs with JWT auth, RBAC, and optimized queries — achieving 99.9% availability across multi-role business workflows.
- Improved scalability through Redis-based caching on high-traffic routes, cutting API latency by 45% and reducing infrastructure load without added cost.
- Architected and deployed CollegeCircle, a multi-panel community platform with Firebase serverless backend — handling job listings, study materials, and admin analytics for growing user base.
- Delivered e-commerce solutions on Shopify (Tones Fashion, Shushubabies) and custom platforms — integrating payment gateways, inventory management, and responsive storefronts.

Web Development Intern | Swio Corporate And ITES Private Limited

Apr 2023 – Jun 2023

- Designed and shipped an internal form builder replacing a paid external tool — saving ~\$50/month — while driving UI development and implementing technical SEO best practices that improved page visibility and organic reach.
- Collaborated closely with marketing and engineering teams on UI development and tech SEO initiatives — contributing across the full stack from component-level UI to API integration while refining system design skills through structured code reviews.

KEY PROJECTS

Jaimax Decentralized Digital Currency Platform [↗ Live Link](#)

[Node.js](#) · [React](#) · [MongoDB](#) · [PostgreSQL](#) · [Apache Kafka](#) · [AWS](#) · [Web3](#) · [Custodial Wallet](#) · [Digilocker KYC](#) · [OCR](#) · [Payment Gateways](#)

End-to-end blockchain fintech platform with fiat-to-crypto conversion, AES-encrypted custodial wallet, multi-tier referral engine, token swap, Binance BEP20 integration, and JMC mining system. Scaled to 20,000+ users processing 250,000+ daily system events (transactions, mining, rewards, payouts) — Kafka DLQ (30% failure reduction), Redis caching (40% DB load cut), full KYC compliance.

Hashpro Academy Platform [↗ Live Link](#)

[React.js](#) · [Node.js](#) · [Express.js](#) · [Payment Gateway](#) · [Exam Management](#)

Digital marketing academy with integrated payment gateway, exam management, and user administration for streamlined student onboarding and fee collection. Reduced onboarding time by 35%, maintained 99.9% API availability.

Raw Talks With VK [↗ Live Link](#)

[React.js](#) · [Node.js](#) · [Firebase](#) · [Podcast Platform](#)

Podcast platform featuring in-depth conversations with Telugu community leaders — built for content delivery, episode management, and audience engagement with a scalable Firebase backend.

ADDITIONAL PROJECTS

Internal Portal – Hashpro Academy [↗](#) [React](#) · [Node.js](#) · [MongoDB](#) · [Dashboard](#) · [Analytics](#)

Lead management and payment tracking system — improved conversion visibility, automated follow-ups, reduced manual ops effort.

CollegeCircle – College Community Platform [↗](#) [React.js](#) · [Node.js](#) · [Firebase Cloud Functions](#) · [Firestore](#)

Freelance full-stack platform (collegecircle.cc) with admin/user panels, job postings, study materials, and analytics dashboard.

Bhookr – Cloud Kitchen Service [↗](#) [React](#) · [Node.js](#) · [MongoDB](#) · [Payment Gateway](#) · [Subscription](#)

Subscription-based cloud kitchen with healthy meal delivery, live kitchen tracking, and integrated payments.

ANS Safety Nets [↗](#) [React](#) · [Node.js](#) · [HTML5](#) · [CSS3](#)

Corporate website for a safety net installation company — services showcase, project gallery, and inquiry management.

Tones Fashion [↗](#) [Shopify](#) · [E-Commerce](#) · [Payment Integration](#) · [Liquid](#)

Custom Shopify storefront for premium men's fashion — product listings, order management, and payment integration.

Shushubabies [↗](#) [Shopify](#) · [E-Commerce](#) · [Payment Integration](#)

Shopify platform for baby skincare essentials — product management, cart, and payment integration.
