

RANJITHA KOLANGINATHAN

Scrum Master | SAFe Agile Coach

Chennai, Tamil Nadu 600075 | +91 9677079013 | ranjithakolanginathan18@gmail.com

PROFESSIONAL SUMMARY

Scrum Master and Agile Coach with 7+ years leading Agile delivery for US Healthcare organizations, including 4+ years in SAFe environments coordinating Agile Release Trains. Facilitates PI Planning, Sprint Planning, Daily Stand-ups, Reviews, and Retrospectives; partners with Product Owners on backlog health and prioritization; and removes cross-team impediments using Jira, Confluence, and Agile metrics (Velocity, Burndown, Cycle Time) to keep delivery predictable. Background in QA and Test Engineering adds a quality-first lens to sprint execution.

CORE SKILLS

- Scrum & Kanban Facilitation, Sprint Planning, Backlog Refinement, Scrum Ceremonies
- SAFe Agile Framework, PI Planning & PI Objectives, Program Increment (PI) Execution, Agile Release Train (ART) Coordination
- Dependency & Risk Management, Impediment Removal, Stakeholder Management
- Agile Metrics & Reporting (Velocity, Burndown, Cycle Time), Continuous Improvement & Retrospectives
- Jira, Confluence, Agile Coaching, Program Coordination, US Healthcare Domain

PROFESSIONAL EXPERIENCE

Scrum Master — Lead Consultant | Virtusa Consulting Services Oct 2021 – Present

Client: Healthcare Claims Processing | Domain: US Healthcare

- Facilitate SAFe ceremonies — PI Planning, Sprint Planning, Daily Scrum, Sprint Reviews, and Retrospectives — for a healthcare claims processing program.
- Coach teams on SAFe, Scrum, and Lean-Agile practices, raising delivery maturity across the Agile Release Train (ART).
- Partner with Product Owners on backlog prioritization, refinement, and PI Objective definition to keep scope aligned to business priorities.
- Identify and manage impediments, risks, and cross-team dependencies within the ART to protect sprint and PI commitments.
- Coordinate ART activities and support PI execution across multiple cross-functional teams.
- Track Agile/SAFe metrics — Velocity, Burndown, Cycle Time, and PI progress — to surface trends and guide continuous improvement.
- Support release planning and Agile transformation initiatives using Jira and Confluence.

Scrum Master — Senior Project Engineer | Wipro Technologies Dec 2019 – Oct 2021

Client: Health Plan Services | Domain: US Healthcare

- Led end-to-end Scrum delivery, consistently meeting Sprint Goals, commitments, and quality objectives.
- Facilitated all Scrum ceremonies, building a focused, collaborative, and high-performing team environment.
- Served as servant leader and Agile coach, guiding teams toward self-organization and delivery accountability.
- Proactively identified and removed impediments, managing risks, blockers, and cross-team dependencies to sustain delivery momentum.
- Partnered with Product Owners on backlog refinement, prioritization, story readiness, and value-driven delivery.
- Facilitated estimation, capacity planning, and sprint forecasting to improve predictability and delivery confidence.
- Used Agile metrics — Velocity, Burndown, Cycle Time, Lead Time — to identify trends and improve team performance.
- Converted retrospective insights into measurable improvement actions, championing continuous improvement.
- Strengthened stakeholder collaboration and transparency through consistent progress reporting and delivery updates.
- Led cross-functional teams to deliver complex projects on time and within budget.

QA Lead — Senior QA Lead | Wipro TechnologiesJan 2015 – Dec 2019

Client: Alight Solutions | Domain: Insurance

- Led testing activities and managed resources to ensure timely project delivery.
- Gathered requirements and developed use cases, specifications, test plans, and defect reports for comprehensive test coverage.
- Mentored junior team members to strengthen team skills and overall performance.
- Validated user requirements to improve customer satisfaction.

Test Engineer | Wipro TechnologiesJul 2012 – Jan 2015

Client: Standard Bank of South Africa | Domain: Banking

- Executed functional and integration test cases to validate software quality and enhance user experience.
- Collaborated with Business Analysts and Developers to clarify requirements and resolve defects efficiently.
- Tracked defects and maintained test documentation to support project transparency.
- Mentored junior team members, fostering knowledge sharing and professional development.
