WORK EXPERIENCE

Business Analyst

Capgemini (Pune) (Sep 2023 - Present)

Project: VISTA New Customer Integration (NCI) - Synchrony Financial (Dec 25 - till date)

Responsibilities

- Supported modernization of Synchrony's VISTA Card Servicing Platform, enabling seamless integration of new customers, accounts, and servicing capabilities across the retail cards ecosystem.
- Defined servicing requirements and integration capabilities across customer profiles, account servicing, transaction visibility, authorizations, and card controls, enhancing operational efficiency and customer experience.
- Partnered with business, operations, and technology teams to deliver a unified customer and account view, strengthening servicing effectiveness and operational controls.

Project: UK Card and Dispute Management (UKCD) - Barclays (Nov 24 - Dec 25)

Responsibilities

- Led business analysis and solution design initiatives across UK Cards and Dispute Management, defining target-state processes and operating models.
- Defined end-to-end business process and integration requirements for card issuance, authorization, settlement, chargebacks, and dispute management.
- Defined the Target Operating Model (TOM) for UK Cards and Dispute Management by assessing existing operating processes, identifying process gaps and defining the desired future-state operating model across business, operations and technology teams.
- Identified opportunities to standardize Cards and Dispute Management processes, roles and operational hand-offs across the target operating model to improve consistency, control and operational efficiency
- Mapped AS-IS to TO-BE operating processes across card issuance, authorization, settlement, chargebacks and dispute management, identifying opportunities for process standardization, improved controls and operational efficiency.
- Worked with business, operations and technology stakeholders to define future-state roles, process flows, system interactions and customer servicing journeys, ensuring alignment between the target operating model and the transformed Cards operating environment.
- Shaped API-led architecture and customer servicing journeys through collaboration with business, technology, and operations stakeholders.
- Facilitated stakeholder workshops, drove process optimization, and improved dispute resolution efficiency and operational controls.
- Supported Agile delivery, UAT governance, defect triage, and implementation of readiness to ensure successful business outcomes.

Project: Lending Transformation - Security Bank Philippine (Sep-23 - Nov 24)

Responsibilities

- Led end-to-end Loan Origination System (LOS) transformation covering customer onboarding, application intake, credit assessment, underwriting, decisioning, collateral evaluation, approval workflows, and loan booking
- Led AS-IS assessment, TO-BE design, Fit-Gap Analysis, Functional Design Documentation and requirements traceability (RTM).
- Partnered with business, operations, technology teams to drive solution design, process optimization and CRM integration.
- Supported cutover planning, go-live readiness, hypercare stabilization, and adoption of the transformed lending platform.

Business Analyst

Mouser Electronics PVT LTD (Pune) (Jun 2023 - Sep 2023)

Project: Finance Transformation - Oracle Fusion Finance Cloud - Account Payable

Responsibilities

- Led business analysis and requirements definition for Oracle Financial Cloud AP implementation, designing invoice-to-pay processes, supplier onboarding, and payment approval workflows.
- Facilitated requirements workshops, process design, and solution validation with finance and business stakeholders.
- Supported UAT, user training, go-live readiness, and post-production support to drive successful implementation

Business Analyst

FIS (Fidelity Information Services) (Pune) (Feb 2020 - Jun 2023)

Project: FIS Integrated Banking Solution (Core Banking Product) - FIS (Fidelity Information Services)

Responsibilities

- Led business analysis and solution design for FIS IBS Core Banking Platform, shaping product capabilities across CASA, Deposits and Lending to address evolving client and market needs.
- Defined functional requirements, user stories, business rules, and feature specifications for core banking modules, collaborating closely with product managers, architects, and engineering teams.
- Drove product enhancements across customer onboarding, account servicing, loan origination, loan servicing, and payment processing, improving platform functionality and user experience.
- Supported API enablement and digital banking integration capabilities, ensuring seamless interoperability between IBS, digital channels, and external banking ecosystems.
- Led feature validation, UAT support, release readiness, and production deployment activities, ensuring high-quality product releases and successful client adoption.

Business Analyst

FIS (On Payroll of Magna Infotech Limited) (Pune) (Aug 2019 - Feb 2020)

Project: Finance Transformation - Oracle Fusion Financial Cloud (Accounts Payable) | FIS Global Finance Operation

Responsibilities

- Supported Oracle Fusion Financial Cloud AP & Payments implementation, defining invoice-to-pay processes, supplier onboarding, and payment approval workflows.
- Assisted finance teams in the migration from Oracle EBS to Oracle Fusion Cloud, supporting business validation, process alignment, and user adoption.
- Led UAT, training, go-live readiness, and post-production support to ensure successful deployment and operational continuity.

Consultant

Axis Securities LTD (Pune) (Aug 2016 - Feb 2017)

Project: Axis Digital- Axis Securities Ltd.

Responsibilities

- Managed the full lifecycle of retail banking products—including Home Loans, Personal Loans, Mortgages, Deposits, and CASA—ensuring seamless customer experience and compliance with KYC/AML regulations and internal risk controls.
