PROFILE

Finance professional with three years of progressive experience spanning energy-sector financial analysis and investment banking middle-office operations for two of the global leading financial institutions. Currently embedded within eClerx's trade support team, providing front-to-back operational coverage for Morgan Stanley's New York FX desk and Goldman Sachs Equity Execution Services (EES). Track record of resolving high-value trade breaks, strengthening reconciliation controls, and partnering with senior front-office stakeholders across global time zones.

PROFESSIONAL EXPERIENCE

Financial Analyst

eClerx Services Ltd | Client: Morgan Stanley (FX Desk, New York) & Goldman Sachs (EES- Asia)
Oct 2024 – Present | Mumbai, India

Equity Execution Services (EES) — Goldman Sachs Singapore

- Manage trade booking, trade amendments, and pre-matching activities before settlement.
- Investigate unsettled trades and resolve booking, settlement, and counterparty discrepancies.
- Execute trade amendments through the Helix application upon identifying economic mismatches that result in incorrect trade bookings; proactive correction prevents trade failures and eliminates penalty exposure from missed settlement cut-offs, enabling direct trade settlement with counterparties.
- Leverage Traiana to monitor real-time trade booking status and take targeted corrective action — including direct counterparty escalation of erroneous bookings — to ensure timely and accurate settlement.

FX Trade Support — Morgan Stanley NY

- Supported end-to-end trade lifecycle management for FX Spot, Forward, NDF, Options, Futures, and OTC derivative products.
- Worked with the Fixed Income team at Morgan Stanley, supporting the Middle Office desk and handling various fixed-income securities, including bonds that required booking through FINRA. Coordinated closely with brokers to ensure accurate trade details, appropriate booking, and timely resolution of any discrepancies.
- Performed trade reconciliation, break investigation, cash matching, and settlement exception management.
- Worked on front-to-back issue resolution using Refinitiv and Bloomberg.
- Prepared operational risk reports and escalated time-sensitive discrepancies to trading and operations teams.
- Escalated over \$8 billion in duplicate trade discrepancies and outstanding trades to the Front Office, mitigating operational risk exposure across FX Spot and FX Forward portfolios.
- Achieved T+0 settlement on vanilla trades and implemented a structured escalation workflow that reduced the average age of outstanding breaks by 40%, resolving more than \$5 billion in trade discrepancies.
- Directed the comprehensive trade lifecycle for NDFs and non-NDF currencies, ensuring smooth derivatives settlements — recognised among the team's top 5% performers.
- Reconciled complex broker and trader accounts while collaborating with global Front Desk teams to ensure timely trade execution; reduced errors by 12% and cut query resolution time by 15% by maintaining a comprehensive knowledge base for the NY client base.

Project Associate

Swain & Sons Power Tech Pvt. Ltd.
Jun 2023 – Jun 2024 | Bhubaneswar, India

- Conducted financial data analysis, energy bill reviews, and profitability assessments for client projects.
- Prepared management reports supporting pricing, cost evaluation, and project feasibility.
- Coordinated with clients to resolve billing discrepancies and operational financial queries.
- Supported business proposal preparation and commercial reporting.
