## Profile Summary

- BFSI professional with over **11 years of experience**, including **6+ years as a project manager**, delivering enterprise transformation, regulatory reporting and strategic change initiatives.
- Strong expertise in **project management, project governance, stakeholder & RAID management and project financials**.
- Experienced in **Agile, SAFe and Hybrid** delivery models, driving **end-to-end programme execution, risk mitigation and executive reporting**.
- Managed **GBP 3.7M–9.5M** programmes for global organisations including Barclays Bank, leading **cross-functional teams** across UK, US and Europe.
- Delivered **Basel IV, enterprise transformation and regulatory reporting** initiatives, partnering with Finance, Risk, Compliance and Technology stakeholders.

## Education

Bachelor of Technology – Mechanical Engineering, Punjab Technical University (2010 – 2014)

## Certifications

- Certified Scrum Product Owner (CSPO)
- Lean Six Sigma
- Agile SAFe (In progress)
- BCS-ISEB (Business Analyst)

## Professional Experience

### Project Manager – EXL Services (Client : Barclays Bank UK | Mar 2025 – May 2026)

**Key Projects:** End-to-end modernisation of trade booking platform — legacy decommissioning, system enhancement and operational transition.

### Responsibilities held:

- **End-to-End Programme Ownership:** Project managed the transformation of trade booking capabilities, owning **delivery roadmaps, planning and resource management** across business and tech teams using **Agile and SAFe** methodologies across **JIRA and Confluence**.
- **Risk & Dependency Management:** Identified and resolved critical programme **risks and cross-team dependencies** — protecting key milestones, maintaining delivery momentum and preserving stakeholder confidence.
- **Governance & Financial Tracking:** Ran overall **project governance and financial tracking**, setting up **status reporting** and metrics used for executive decision-making.
- **Legacy Decommissioning:** Delivered a complex legacy decommissioning project, accelerating the original roadmap by 20% to enable efficient transition to newer systems.

## Project Manager – IBM (Client : Barclays Bank UK | Aug 2021 – Mar 2025)

### Key Projects:

- Basel IV regulatory transformation — driving compliance across Business, Risk and Technology.
- Accelerate Close Days programme delivery — reducing financial close cycle timelines for daily and monthly reports across finance and technology teams.

### Responsibilities held:

- **Regulatory Programme Delivery:** Owned **end-to-end delivery** for regulatory change for Basel IV and Accelerate Close Days — **managing scope, budget and stakeholder alignment** across Business, Risk and Technology, contributing to 19% cost reduction on a GBP 9.5M programme.
- **Delivery Governance:** Drove milestone adherence from 72% to 91% through disciplined **RAID** tracking, **risk ownership and dependency** resolution.
- **Stakeholder Management:** Influenced and aligned senior stakeholders across Business, Risk, Compliance and Technology — navigating conflicting priorities to maintain regulatory delivery momentum.
- **Programme Performance:** Directed programme performance across multi-function, **multi-geography teams** — owning regulatory reporting, financial governance, budget tracking and **benefit realisation** aligned to strategic and compliance commitments.

## Project Manager – NTT Data (Client : SEI Investments | Sept 2020 – Aug 2021)

**Key Projects:** Capital markets and investment programme support for SEI Investments — contributing to governance, stakeholder management and delivery execution.

### Responsibilities held:

- **Programme Support & Governance:** Supported delivery of **capital markets** and investment programmes across governance and **stakeholder management**.
- **Requirements Management:** Reduced requirement rework by 30–35% through structured **stakeholder workshops**, improving business readiness and validation.
- **Agile Delivery:** Improved backlog clarity enabling 15% faster release cycles across programme workstreams.
- **Traceability & Documentation:** Owned FRD creation and requirements traceability from business need through to delivery acceptance.

## Test Analyst and Business Analyst – Accenture (Client : Multi | Nov 2014 – Aug 2020)

**Key Projects:** PeopleSoft FSCM and HCM implementation for US Government, Canadian Government and Finland-based enterprise client across pension and insurance domains.

### Responsibilities held:

- **Requirements & FRD:** Led requirements analysis and FRD creation for PeopleSoft HCM and FSCM across pension and insurance platforms for US and Europe clients.
- **Quality & Testing:** Reduced SIT defect leakage into UAT by 25–30% through improved traceability and validation frameworks.
- **Test Delivery:** Supported SIT, UAT and regression cycles across structured **waterfall and hybrid** delivery programmes.
- **Domain Expertise:** Delivered **BFSI** transformation across finance, pension, insurance and HR platforms for global clients.
