

PROFILE SUMMARY

Business Analyst with 12+ years in BFSI, specializing in interbank payments processing across domestic and cross-border clearing (RTGS, NEFT, SWIFT MT/MX) and Payment hub ISO 20022 payments modernization. Combines hands-on core banking operations experience (Finacle) — including direct oversight of SWIFT payment processing, inward/outward remittances, and RTGS/NEFT batch handling — with 7+ years in Agile BA delivery across payments transformation, digital onboarding, KYC/AML, lending, and core banking integration. Skilled at gathering business requirements from multiple stakeholder groups (business, compliance, technology, and vendor teams), and translating complex regulatory and payment-scheme requirements into BRDs, FSDs, solution specifications, process flows, and developer-ready user stories. Proven track record driving SIT/UAT and production readiness on payment-scheme modernization initiatives, including SWIFT MT-to-ISO 20022 MX migration. Seeking to bring this interbank payments and clearing domain depth to a Business Analyst role in banking/payments.

CORE COMPETENCIES

Payments & Clearing

- RTGS, NEFT, IMPS, SWIFT, SEPA, CHIPS
- FEDWIRE, BACS, NACH, NACHA, FPS, CHAPS, SIC, CBPR+
- ISO 20022 Payments Standards (MX Migration)
- Real-Time / Credit Transfer Processing
- Cross-Border & Correspondent Banking

Payments Compliance

- Sanctions Screening (OFAC, FATF)
- AML | KYC | EDD | CDD
- RBI Regulatory Compliance
- Reconciliation & Settlement Controls

BA Delivery

- BRD / FSD / Solution Specifications
- Requirements Gathering & Fit-Gap Analysis
- SIT / UAT Management
- Multi-Stakeholder Requirement Workshops

Delivery & Tools

- Agile / Scrum Delivery
- API Specs (Postman)
- Jira / Confluence / Visio
- Core Banking: Finacle 10 & 11

PROFESSIONAL EXPERIENCE

Lead Business Analyst — IRIS Software- Bank of Montreal Nov 2025 – Present |

Business Analyst for a **global bank**, leading requirements and delivery for a cross-border payments platform, working closely with business, QA, and development teams.

Global Cross-Border Payments Transformation

Modernization of the bank's cross-border payment platform to support SWIFT MT and ISO 20022 MX messages for international fund transfers — spanning payment initiation, sanctions screening, AML checks, FX validation, correspondent banking integration, payment tracking, and settlement.

- Gathered business requirements from International Banking and Trade Finance stakeholders; conducted workshops for SWIFT payment process improvements.
- Documented BRD, FRD, user stories, and acceptance criteria; mapped existing SWIFT MT message flows to ISO 20022 MX formats and prepared BPMN process flows.
- Worked with integration teams on SWIFT Gateway, AML, and sanctions screening systems; performed data mapping across Core Banking, Payment Hub, and the SWIFT network.
- Coordinated with Compliance teams on OFAC, FATF, and sanctions validation rules.
- Supported SIT/UAT, defect triage, and production deployment; maintained the RTM for full requirement traceability.
- Coordinated with the Product Owner, architects, and development teams across Agile sprints; validated the end-to-end payment lifecycle — initiation, validation, screening, routing, settlement, and reconciliation.

Senior Business Analyst — RBL Bank Ltd Feb 2023 – June 2025 | Noida, India

Corporate Payments Portal – Cross-Border & Domestic Payments PlaVorm

- Conducted requirement gathering workshops with Corporate Banking, Payment Operations, Compliance, Treasury, and Technology stakeholders to define business and functional requirements.
- Prepared BRD, FRD, user stories, acceptance criteria, process flows (AS-IS/TO-BE), and functional specifications for payment initiation, beneficiary management, maker-checker approvals, FX conversion, and payment tracking.
- Defined business rules for domestic and cross-border payment processing, including SWIFT MT message validation, payment cut-off times, transaction limits, duplicate payment checks, payment hub and beneficiary validation.
- Collaborated with integration teams to define API requirements between the Corporate Payments Portal, Core Banking, SWIFT Gateway, Payment Hub, AML/Sanctions Screening, Treasury/FX, Notification, and General Ledger systems.
- Worked with Compliance teams to document AML, KYC, OFAC, FATF, and sanctions screening requirements, including payment hold, release, and exception-handling workflows.
- Facilitated backlog grooming, sprint planning, requirement clarification, SIT/UAT support, defect triage, production deployment, and post-production hypercare.
- Maintained the Requirement Traceability Matrix (RTM) and ensured end-to-end traceability from business requirements through testing and production deployment.

Smart Account Opening Management System — Digital Onboarding PlaVorm

- Owned end-to-end product lifecycle — backlog of 100+ user stories across 8 sprints with engineering, UX, and compliance teams.
- Reduced customer onboarding TAT by 60% through digital-first, compliance-embedded workflows; embedded KYC/AML/EDD and RBI compliance directly into features.
- Defined retail banking acceptance scenarios covering role-based access, maker-checker controls, audit trail validation, and exception handling across customer servicing touchpoints.
- Led UAT activities: designed test scenarios for end-to-end onboarding journeys, assessed defect severity, coordinated resolution with engineering, and provided business sign-off for production deployment.
- Reduced customer onboarding TAT by 60% by embedding compliance-first, digital-first workflows — demonstrating direct impact on retail operational efficiency and customer experience.

Business Analyst — Bandhan Bank Ltd July 2019 – Jan 2023 | Noida, India

Domestic Payments Modernization (RTGS & NEFT Processing PlaVorm) — Corporate Banking

Enhanced the domestic payments platform supporting RTGS and NEFT transactions — covering payment processing, validation rules, beneficiary management, transaction monitoring, reconciliation, and integration with Core Banking and RBI payment gateways.

- Gathered business requirements from Retail Banking Operations; conducted stakeholder workshops for RTGS and NEFT process enhancement.
- Prepared BRD, FRD, functional specifications, and user stories; documented AS-IS and TO-BE payment workflows.
- Defined business validation rules for RTGS and NEFT transactions; prepared field-level data mapping documents.
- Coordinated API integrations between Core Banking, Payment Switch, and RBI interfaces; supported API testing using Postman.
- Executed SQL queries for data validation; coordinated SIT/UAT with business users and managed defects and requirement clarifications.
- Built and maintained data validation frameworks and test pipelines across 4 major releases — zero critical defects in production.
- Conducted 30+ stakeholder interviews/workshops to capture end-to-end payments and banking requirements; translated regulatory requirements into developer-ready user stories with acceptance criteria.
- Collaborated with BI and reporting teams to define dashboards surfacing payments and transaction performance to senior leadership.
- Documented accounting definitions and GL posting logic, business rules, fee and charge structures, and integration requirements with Core Banking and payment systems.

Payment Analyst — Bandhan Bank Ltd May 2015 – July 2019 | Kolkata, India

- Led a team of 8, overseeing SWIFT payment processing, corporate transactions, and retail client servicing — direct operational exposure to inward and outward payment flows.
- Processed and authorized inward and outward remittances through RTGS, NEFT, and SWIFT channels — validating beneficiary and correspondent bank details, transaction limits, and regulatory fields to ensure accurate, timely settlement.
- Handled day-to-day RTGS/NEFT batch processing and SWIFT message handling as part of branch payment operations, coordinating with the bank's central payments team on exceptions and returns.
- Owned AML, KYC, EDD, and CDD compliance for all client onboarding, building regulatory expertise now embedded into product and requirements thinking.
- Identified operational inefficiencies and drove structured improvement recommendations across payments and transaction processing.
- Ensured smooth end-to-end processing of Client onboarding, payments, loans and reconciliations, with strong controls to reduce errors and fraud.

Payment Associate — Axis Bank Ltd Sept 2012 – Apr 2015 | Delhi, India

- Operated Finacle core banking (v7) daily for end-to-end processing of Fixed Deposits, Recurring Deposits, and Demand Drafts, building firsthand functional knowledge of deposit product workflows, interest calculation, and transaction lifecycle.
- Handled branch-level inward and outward remittances via RTGS, NEFT, and SWIFT transaction within Finacle — performing beneficiary and account validation, transaction authorization, and reconciliation of daily payment batches.
- Processed FD renewals, premature closures, and interest payouts — deep understanding of term deposit business rules, penalty logic, and GL entries, now applied to integration requirements and fit-gap analysis.
- Worked with technology and business teams to enhance operational systems and workflows within the Finacle core banking solution.
