

RUTUJA RAJESH HEREKAR

Senior QA Engineer | Testing & Automation

Pune, India • +91 7083238415 • rutujaherekar40@gmail.com • [linkedin.com/in/rutuja-herekar](https://www.linkedin.com/in/rutuja-herekar)

PROFESSIONAL SUMMARY

Senior QA Engineer with **5 years of experience** validating mission-critical applications across **banking, insurance, and payments** domains. Tosca-certified automation specialist with hands-on expertise in regression automation, API testing, performance testing, and SIT/UAT delivery within Agile environments. Recently certified in **Oracle OCI Generative AI Professional**, with foundational knowledge of LLM workflows, prompt engineering, RAG, and AI model evaluation — actively building toward AI-driven test automation and AI model validation roles.

CORE COMPETENCIES

Test Engineering	Manual, Automation, API, Mobile, Performance, Data Migration, SIT, UAT, Regression
Automation Tools	Tricentis Tosca (L1 & L2), Selenium WebDriver, Cucumber BDD
CI/CD & Performance	Jenkins, Azure DevOps, Apache JMeter
Languages & Platforms	SQL, Unix/Linux, Java , AEM (Adobe Experience Manager), FileNet
Tracking & Process	Jira, Azure Boards, Agile / Scrum
GenAI (Foundational)	LLM Workflows, Prompt Engineering, RAG (Retrieval-Augmented Generation), Vector Embeddings

PROFESSIONAL EXPERIENCE

Capgemini — Senior QA Engineer

New York Life Insurance (NYL) — AEM & API Testing

- Performed functional and API automation testing for Adobe Experience Manager (AEM) customer-facing applications, validating content rendering, REST API contracts, and end-to-end user journeys
- Supported UAT planning and execution in close coordination with onshore product owners and business stakeholders, ensuring requirements traceability and acceptance sign-off
- Participated in Agile ceremonies — sprint planning, stand-ups, retrospectives, and refinements — driving test estimation and continuous improvement of testing processes within the squad
- Integrated AI-powered error analysis with Tricentis Tosca by leveraging execution logs, screenshots, and test results to automate failure classification, root cause analysis, and defect reporting, reducing manual investigation effort.

NSE Stock Market Trading Platform — Capital Markets

- Designed and executed end-to-end test strategies for the trade lifecycle — order placement, matching engine validation, and settlement calculations — for one of India’s largest stock exchanges
- Built Tricentis Tosca automation coverage for trading workflows on Unix/Linux environments, validating real-time order processing and settlement accuracy
- Collaborated with developers, business analysts, and operations teams across Agile sprints to ensure release-ready quality for real-time trading workflows
- Performed backend validation via SQL queries against transaction databases, ensuring data integrity across the trade settlement pipeline

Insurance & Payments — Life Ops — Data Migration

- Validated Desktop and Web Applications using toscan.
- Drove data migration validation for life-insurance policy records, ensuring completeness, accuracy, and referential integrity of migrated data across source and target systems
- Built Selenium with Java + Cucumber BDD automation suites enabling business-readable test scenarios and reusable step definitions for regression coverage
- Executed load and performance testing using Apache JMeter to validate system behaviour under peak migration loads, supporting production-readiness sign-off
- Owned defect triage and root-cause analysis in collaboration with development teams, ensuring smooth validation cycles before production releases

Insurance & Payments — Letter, Email and SMS Testing — Customer Communications

- Validated insurance policy and claims calculation engines, ensuring accuracy of customer communications across

letter, email, and SMS delivery channels

- Designed and maintained Tosca regression automation frameworks aligned to sprint goals, supporting continuous regression coverage across release cycles
- Performed API automation testing for upstream and downstream integrations; integrated automated suites into Jenkins and Azure DevOps CI/CD pipelines
- Partnered with business analysts and product owners during sprint planning, refinements, and UAT to translate compliance requirements into executable test scenarios

FileNet Document Management System — *Content Workflow Testing*

- Validated customer data workflows across the IBM FileNet content management platform, covering document ingestion, metadata tagging, and lifecycle workflows
- Authored SQL queries for backend data validation and integrity checks during SIT cycles, identifying and triaging data anomalies before production handover

Customer & Digital — Web Application Testing

- Delivered functional and regression test coverage for web-based customer data applications across multiple release cycles
- Maintained Tosca automation assets and managed defect lifecycle and test execution traceability via Jira

GENERATIVE AI — FOUNDATIONAL KNOWLEDGE

Oracle OCI Generative AI Professional

Structured coursework and hands-on labs covering the modern LLM lifecycle, with active interest in applying these concepts to AI-augmented quality engineering.

Topics Studied

- **LLM Fundamentals:** Transformer architecture, tokenization, embeddings, decoding parameters (temperature, top-k, top-p)
- **Prompt Engineering:** Zero-shot, few-shot, and chain-of-thought prompting; structured prompt patterns
- **Retrieval-Augmented Generation (RAG):** Vector embeddings, semantic search, vector databases, RAG pipeline construction
- **AI Agents & Chatbots:** LangChain basics, conversation memory, agent design patterns
- **Responsible AI:** Hallucination awareness, model evaluation fundamentals, bias and safety considerations

QA Applications I'm Building Toward

- Prompt regression testing and LLM output evaluation
- RAG system validation — retrieval quality, grounding, and answer accuracy
- LLM-assisted test-case generation and synthetic test-data creation
- AI model evaluation pipelines for production GenAI applications

CERTIFICATIONS

- **Oracle OCI Generative AI Professional**
- **Tricentis Tosca Automation Specialist – Level 1 (AS1)**
- **Tricentis Tosca Automation Specialist – Level 2 (AS2)**
- **Tricentis Tosca Deep Dive – Automating Beyond Web Applications (AE1)**
- **Tricentis Tosca Deep Dive – Structuring your test cases and test data (TDS1)**
- **Automation Practitioner Engineer**

AWARDS

- **Rising Star Award, Capgemini** — *[brief context: e.g., recognized for early ownership of automation framework / fastest ramp on NSE engagement]*
- **Client Appreciation Award** — *[brief context: e.g., for delivery on NYL UAT cycle / data migration go-live]*

EDUCATION

- **M.Sc. Computer Science** — 2021
- **B.Sc. Computer Science** — 2018
