

WORK EXPERIENCE

Lead Engineer CitiusTech

01/2025 - Present

Pune, India

GEHealthcare Zero footprint viewer

Tasks

- **Led backend development** for core DICOM viewer capabilities using Java and Knockout.js, delivering **high-reliability imaging workflows** used in clinical environments.
- **Designed and implemented CPACS REST-based authorization** using Camel Route Templates to modernize authentication and eliminate legacy SOAP/Rumba dependency.
- **Resolved 40%+ of critical DICOM issues** (metadata, multi-frame, modality compatibility), improving diagnostic accuracy and reducing support escalations.
- Acted as **team lead in Agile delivery** —driving sprint planning, mentoring developers, code reviews, and collaborating with PACS/RIS and clinical stakeholders for compliance and integration.

Senior Software Developer Quest Global engineering

09/2023 - 01/2025

Pune, India

Mastercard send money transfer

Tasks

- **Developed and scaled RESTful microservices** using **Java**, **Spring Boot**, **Docker**, **Kubernetes**, and CI/CD (**GitHub Actions**), ensuring fast, reliable deployments and improved service performance.
- **Enhanced system scalability and responsiveness** by integrating **Kafka** for async messaging, optimizing **PostgreSQL** queries, and implementing Redis caching for faster data retrieval and reduced DB load.
- **Improved user experience** by fixing UI defects and delivering feature enhancements using React.js, ensuring a consistent, intuitive, and responsive frontend interface.

Senior Software Developer Girmiti Software Pvt Ltd

09/2022 - 09/2023

Pune, India

Verifone park payment interface module

Tasks

- **Built secure payment integration services** using Java, Spring Boot, and REST APIs, enabling seamless communication between clients and multiple payment gateways.
- **Deployed microservices on AWS EKS** in collaboration with DevOps teams, ensuring reliable orchestration, scaling, and high availability of containerized workloads.
- **Strengthened payment security** with Spring Security-based access controls and robust validation/error handling, minimizing payment failures and protecting sensitive operations.

Software Developer E2Developers Pvt Ltd

09/2019 - 09/2022

Tasks

- **Built full-stack SaaS application** for contact center quality evaluation using **Spring Boot** microservices and **React.js**, delivering efficient and scalable workflow tracking.
- **Containerized and deployed services** with **Docker** and **Kubernetes**, improving production reliability, load balancing, and scaling efficiency.
- **Enhanced code and API performance** by optimizing Spring Boot REST endpoints with **PostgreSQL** (Spring Data JPA) and automating quality checks via Jenkins + SonarQube scanning.

SKILLS

Java 17 Spring boot Spring Data Jpa

Spring Security Restful Api Kafka

AWS Redis React Redux

Databases: PostgreSQL, MSSQL

Tools: Jenkins, Sonarqube, Git, Postman

IDE: Eclipse, Visual Studio Code, IntelliJ

EDUCATION

Study Program

Rajeev Gandhi Technical University

2012

Bhopal

Courses

- Bachelor Of engineering
