-

Professional Experience

Microsoft 365 & SharePoint Support Engineer

Infosys – Hyderabad, India

December 2021 – Present

SharePoint & Power Platform Development

- Migrated SharePoint 2013 Designer workflows to Power Automate, modernizing legacy automation and improving maintainability.
 - Designed, developed, tested, deployed, and supported Power Automate workflows including approval flows, notifications, and data updates.
 - Developed basic Canvas Apps using Power Apps to enable efficient data capture and workflow integration.
 - Customized SharePoint lists and forms (New, Edit, View) using JSON formatting to enhance usability and performance.
 - Supported SPFx components and modern SharePoint web parts as part of application customization activities.
 - Handled new SharePoint development requests and delivered scalable solutions aligned with business requirements.
-

SharePoint Online Administration

- Administered SharePoint Online site collections, managing permissions, external users, sharing policies, and access controls.
- Created and maintained SharePoint sites, lists, and libraries with advanced configurations such as metadata, content types, and versioning.
- Led SharePoint site creation, branding, and navigation setup to improve user experience and accessibility.
- Managed SharePoint storage usage, implemented quota management, and executed archival strategies.
- Ran SharePoint audit and storage reports, analyzed usage trends, and performed root cause analysis to optimize storage consumption.
- Managed SharePoint Modern Page content, including page creation, web part configuration, permissions, and version control. Supported business users in publishing and maintaining content across SharePoint modern sites, ensuring content governance, consistency, and usability.
- Executed SharePoint data migrations using ShareGate, ensuring data integrity, permission mapping, and minimal downtime.
- Resolved SharePoint–Microsoft Teams integration issues, including file access errors, permission mismatches, and sync conflicts.
- Provided end-user training and prepared technical documentation to improve adoption and reduce recurring support incidents.

Exchange Online & Microsoft 365 Support

- Created and managed shared mailboxes, distribution lists, and mail-enabled security groups.
 - Performed mail flow diagnostics using Message Trace and Exchange Admin Center to investigate delivery delays and failures.
 - Resolved Outlook issues including mailbox storage limits, calendar sync problems, and profile configuration issues.
 - Assisted users with calendar sharing, delegate access, and cross-device synchronization.
 - Supported OneDrive for Business access and sync issues, including file recovery and permission troubleshooting.
 - Monitored mailbox usage, applied retention policies, and supported archiving strategies.
-

-
- Ensured compliance with organizational policies related to email retention, access management, and external sharing.
-

Key Responsibilities Across Roles

- Design, Development, Testing, Deployment, and Support (End-to-End)
- Application Support and Incident Resolution
- SharePoint Storage & Governance Management
- Workflow Automation and Optimization
- Documentation and Knowledge Transfer
- End-User Support and Training
- SLA Adherence and Stakeholder Communication
