## PROFILE SUMMARY

An accomplished professional with **15+ years of experience** in **Agile program delivery**, **enterprise transformation**, and **cloud modernization** across **telecom**, **banking**, and **financial domains**. Recently served as a **Senior Technical Program Manager** at **PRI India IT Services Pvt. Ltd.**, driving **MasterCard's global programs** through effective planning, automation, and collaboration. Skilled in **Agile leadership**, **stakeholder management**, and **large-scale data migrations** including **Rally → JIRA → DOMO → Apptio**, ensuring seamless execution and strong business outcomes. Demonstrated expertise in **budget forecasting**, **capacity planning**, and **workflow automation** using tools like **Alteryx**, **Java React**, and **Apptio**. Adept at enabling **data-driven decision-making** & **continuous improvement** through structured delivery frameworks. Combines **technical depth**, **business insight**, and **team leadership** to deliver impactful programs that enhance efficiency, accelerate performance, and support organizational growth.

## WORK EXPERIENCES

### Senior Program Manager

Diensten Tech Limited (DTL) | Pune | Feb 2026 – Till Date

- Directed cross-functional teams of developers, testers, and DevOps engineers to deliver complex software programs on time and within scope, driving seamless collaboration across IT and operations.
- Championed Agile transformation across the Desperados program, mentoring teams, refining sprint planning, and reducing cycle times to accelerate the market delivery of payment system integrations such as *SWIFT*.
- Managed project risks—financial, operational, and delivery—through structured governance, proactive mitigation strategies, and transparent stakeholder communication.
- Evaluated emerging technologies and vendor tools, providing strategic recommendations to enhance delivery efficiency and technical innovation.

### Senior Technical Program Manager

PRI India IT Services Pvt. Ltd. | Pune | Oct 2023 – Oct 2025

(Client: Mastercard)

#### Roles & Responsibilities:

- Spearheading end-to-end program management for Mastercard's enterprise initiatives, including requirement analysis, sprint execution, stakeholder alignment, and cross-functional coordination to deliver high-impact business outcomes within defined timelines and budgets.
- Orchestrating Agile ceremonies, daily scrums, sprint planning, reviews, and retrospectives, to ensure seamless execution, proactive risk mitigation, & continuous process optimization across global teams.
- Formulating strategies for effective product backlog management, defining clear and actionable stories, and conducting grooming sessions to align teams with evolving business goals.
- Successfully migrated enterprise data and workflows across multiple platforms, from *Rally to JIRA*, *JIRA to DOMO*, and *JIRA to Apptio*, ensuring zero data loss, improved visibility, and consistent end-user access.
- Designed and automated workflows in Alteryx, streamlining Mastercard product integrations between internal systems and third-party applications, significantly improving operational efficiency.
- Led the development of a TBM File Upload Application using *Java React*, enabling automated mapping of Mastercard Service-to-Product drivers for the finance team.
- Collaborated with client stakeholders to capture business and technical requirements for each PI cycle, finalized budget allocations, and maintained detailed capacity planning sheets to optimize resource utilization and delivery predictability.
- Implemented data-driven performance tracking and reporting dashboards, empowering leadership to make informed decisions and enhance product delivery velocity.
- Championed a culture of continuous improvement and transparency, mentoring teams to embrace Agile best practices and drive measurable productivity gains.

## AREAS OF EXPERTISE

- **Agile Program & Project Delivery:** End-to-end execution of enterprise programs using Agile, Scrum, and hybrid delivery frameworks across global teams.
- **Cloud Migration & Modernization:** Led successful migrations from on-premise infrastructure to Microsoft Azure, enhancing scalability and system reliability.
- **Automation & Workflow Engineering:** Designed automated workflows using Alteryx and developed Java React applications for process efficiency and TBM data management.
- **Budgeting, Forecasting & Cost Optimization:** Managed multi-million-dollar portfolios through precise financial forecasting, cost control, and ROI-driven governance.
- **Stakeholder & Client Management:** Built and maintained strong partnerships with global clients like Mastercard, Credit Suisse, and AT&T, ensuring strategic alignment and delivery excellence.
- **Scrum Leadership & Coaching:** Facilitated Agile ceremonies and coached multiple Scrum teams and Product Owners, driving continuous improvement and Agile maturity uplift.
- **Risk & Compliance Governance:** Conducted proactive risk assessments, managed change controls, and ensured adherence to ISO and PMO standards.
- **Cross-Functional Team Leadership:** Directed developers, QA, and DevOps engineers across distributed environments, fostering collaboration and accountability.
- **Process Improvement & Delivery Optimization:** Streamlined sprint planning, backlog management, and capacity planning to improve delivery predictability and team velocity.
- **Technical Program Management:** Bridged business and technology through strategic planning, requirement analysis, and technical oversight of high-impact IT programs.
- **Service Delivery & Operations Excellence:** Managed production support and service transitions in telecom and banking domains, ensuring operational stability and client satisfaction.
- **Data-Driven Decision Making:** Utilized DOMO, Apptio, and JIRA dashboards for performance tracking, analytics, and executive reporting.
- **Change & Transition Management:** Drove successful project transitions from initiation to go-live with seamless knowledge transfer and zero disruption.

## Senior Scrum Master

Starlink Technology OPC Pvt. Ltd. | Pune | Sep 2022 – Oct 2023

### Roles & Responsibilities:

- Directed cross-functional teams of developers, testers, and DevOps engineers to deliver complex software programs on time and within scope, driving seamless collaboration across IT and operations.
- Managed a \$10M portfolio of concurrent IT initiatives, overseeing agile sprint cycles, stakeholder alignment, and milestone tracking, achieving 98% on-time delivery and enhanced project visibility.
- Led comprehensive risk assessment, change control, and compliance processes adhering to ISO standards, while maintaining a 95% stakeholder satisfaction rate through proactive communication and transparent governance.
- Optimized resource allocation and implemented dynamic backup protocols to minimize downtime during critical release windows, ensuring uninterrupted operations during major deployment phases.
- Championed Agile transformation across the Desperados program, mentoring teams, refining sprint planning, and reducing cycle times to accelerate the market delivery of payment system integrations such as *SWIFT*.
- Introduced automated project dashboards for real-time progress tracking and reporting, empowering leadership with actionable insights and decision-making.
- Fostered a culture of accountability, adaptability, and innovation, enabling faster response to business priorities and continuous improvement in delivery processes.

Nexwave , Pune Oct 2018 – Nov 2019 || Accenture, Pune , Nov 2019 – Sep 2022

### GROWTH PATH

Scrum Master (Technical Project Manager) | Nov 2019 – Sep 2022

Senior Software Engineer (Scrum Master) (Nexwave Payroll) | Oct 2018 – Nov 2019

Client: *Credit Suisse* | Project Budget: \$10M

### Roles & Responsibilities:

- Led the end-to-end transition of the Credit Suisse project from the JS-RJS phase to a live production environment as Transition Management Lead, ensuring zero downtime and smooth go-live execution.
- Directed cross-functional teams comprising 10 developers, 4 QA engineers, and 4 DevOps specialists, driving Agile delivery excellence and adherence to the Definition of Done across all sprint cycles.
- Spearheaded cloud migration from on-premise infrastructure to Microsoft Azure, enhancing scalability & performance monitoring across environments.
- Oversaw project budgeting, financial forecasting, and cost optimization, maintaining strict control on expenditures while achieving measurable ROI within the \$10M portfolio.
- Managed project risks—financial, operational, and delivery—through structured governance, proactive mitigation strategies, and transparent stakeholder communication.
- Coached and mentored multiple Scrum teams, elevating Agile maturity and fostering collaboration across engineering, QA, and DevOps to deliver continuous value.
- Facilitated Scrum ceremonies, conflict resolution, and sprint planning, ensuring all user stories were clearly defined, prioritized, and sprint-ready for development.
- Partnered with product owners to define roadmaps, refine backlog items, and align release goals with evolving business objectives.
- Resolved critical impediments and optimized team velocity through continuous improvement initiatives and adoption of Agile best practices.
- Evaluated emerging technologies and vendor tools, providing strategic recommendations to enhance delivery efficiency and technical innovation.
- Mentored junior engineers and Scrum Masters, fostering a culture of ownership, accountability, and performance excellence across the project.
