PROFESSIONAL SUMMARY

Senior Business Analyst with 15+ years of experience delivering digital transformation, target operating model design, process optimisation, regulatory change and enterprise platform implementations across Global Custody, Capital Markets, Asset & Wealth Management and Mortgage Lending. Proven expertise in requirements engineering, stakeholder management, business process modelling (L3/L4), business rules analysis, solution design, Agile delivery and API-enabled digital platforms. Successfully delivered strategic transformation programmes for HSBC, Commonwealth Bank, Danske Bank and Morgan Stanley while collaborating with global business, operations and technology teams across Asia and Europe.

ACCOMPLISHMENTS

- Delivered multiple mortgage lending automation and regulatory change programmes for Commonwealth Bank and Danske Bank.
- Reduced approximately **2.4 million** false-positive reconciliation exceptions through enhanced reconciliation rules.
- Successfully migrated **650+ alternative investment securities** to an enterprise Portfolio Management Solution.
- Delivered onsite consulting assignments in **Hong Kong** and **Geneva**, supporting client implementations and global knowledge transition.

WORK HISTORY

July 2025 - July 2026

Senior Business Analyst *HSBC Securities Services (via LTM)*

Programme: Global Custody Onboarding Digitization.

Key Responsibilities

- Led requirements discovery workshops with Global Custody Operations, Product Owners, Technology teams and SMEs across multiple regions.
- Elicited and documented business requirements, user stories, functional specifications and acceptance criteria for institutional custody account onboarding.
- Produced L3/L4 process models, business process maps, wireframes and API-driven workflow requirements.
- Facilitated sprint planning, backlog refinement, design walkthroughs and stakeholder governance meetings.
- Supported SIT, UAT, production readiness and benefits tracking.

Key Deliverables

- Analysed and rationalised the GC UK custody account opening process by simplifying complex onboarding forms and defining dynamic business rules that displayed only relevant questions based on client responses.
- Defined the Target Operating Model for custody account onboarding by identifying account opening, amendment and closure journeys and producing L3/L4 As-Is and To-Be process maps.
- Documented business rules, decision points, actors, systems, inputs and outputs supporting process standardisation and automation.
- Analysed downstream system dependencies to ensure business requirements aligned across Operations, Product and Technology teams.
- Developed benefit realisation models by validating FTE savings, preparing supporting business cases and securing Operations stakeholder approvals.

March 2024 - August 2024

Senior Business Analyst *CBA (Coforge India Pvt. Ltd)*

Programme: Mortgage Home Lending Servicing Automation

- Delivered business analysis for the automation of home loan disbursements by defining business rules to automatically generate disbursement instructions, resulting in an operational saving of approximately 6 FTE.
- Defined requirements for the automated closure of home loan, personal loan and credit card accounts within the Home Loan Servicing platform, eliminating manual processing.
- Designed automation for the automatic placement of No-Debit Holds on eligible accounts based on customer contribution rules.
- Defined business rules to automatically generate disbursement instructions for clearing arrears and uncleared funds on home loan accounts.
- Delivered requirements for credit score and usability matrix-driven home loan limit reduction, enabling automated risk-based limit

- Received **Spot Awards** in recognition of delivering permanent solutions for recurring production issues and demonstrating exceptional cross-functional collaboration to ensure successful project delivery.

SKILLS

- Business Analysis and solution design.
- Product Roadmap management.
- Agile Scrum Product Management.
- Business process mapping.
- Digital Transformation and process automation.
- Client onboarding implementation and support.
- Stakeholder engagement and customer focused delivery.

LANGUAGES

management.

November 2019 - December 2023

Senior Business Analyst *Danske Bank*

Assignment: Mortgage Lending Platform

Key Projects

Customer Needs Analysis

- Delivered regulatory enhancements to affordability assessment platform by translating FSA requirements into complex business rules.
- Analyzed mortgage, personal, student and vehicle loan amortisation models to support affordability calculations.

Loan Terms Platform

- Supported delivery of a new Loan Terms platform through functional validation, JIRA test execution and stakeholder reporting.

RTB Problem Management

- Led root cause analysis of complex production issues and coordinated permanent solution delivery.
- Presented governance dashboards demonstrating reduction in recurring incidents.

October 2017 - September 2019

Business Consultant *Morgan Stanley (via Capco)*

Programme: Reference Data Modernisation

Project 1 – Product Reference Data Reconciliation Platform

- Led business analysis for an enterprise reconciliation platform comparing Bloomberg and Reuters security master data across Equities, Fixed Income and Derivatives.
- Conducted detailed analysis of security attributes, reconciliation rules and exception scenarios to improve data quality and minimise false-positive exceptions.
- Defined business rules, validation logic and exception management workflows for reconciliation processing.
- Collaborated with Operations, Data Management and Technology teams to refine reconciliation logic and support Agile delivery.

Project 2 – Legacy Fixed Income Platform Decommissioning

- Led business analysis supporting migration from a legacy Fixed Income reference data platform to a strategic enterprise platform.
- Analysed attribute-level mappings, business rules and data transformation logic across both systems.
- Designed reconciliation logic to validate data consistency throughout migration.
- Defined exception management workflows ensuring complete data integrity before decommissioning the legacy platform.

Business Impact

- Reduced approximately **2.4 million** false-positive reconciliation exceptions.
- Improved reconciliation accuracy and operational efficiency.
- Enabled successful retirement of the legacy Fixed Income platform.
- Introduced bulk exception management capabilities.

December 2015 - October 2017

Business Analyst *Suisse Tech Partners*

Product: Portfolio Management Solution (Asset & Wealth Management)
