

SAHIL KUMAR

Full Stack Engineer—AI/LLM Integration • Full Stack Development • Java, Python, Spring Boot, React.js • LLMs & Agentic AI

Hyderabad, India | +91-8290977266 | skk280540@gmail.com | linkedin.com/in/sahilkumar-fullstack | github.com/snapepotter20 | leetcode.com/u/jumboclif42/ | [Portfolio](#)

Professional Summary

Full Stack Software Engineer with 2+ years at Bosch and Bijak, shipping 30+ production REST APIs and microservices in Java, Spring Boot, and React.js, lifting application performance 35%. Hands-on experience extending full-stack apps with working AI features using Python, FastAPI, the Claude API, and OpenAI API — including a live AI coding assistant and an AI-assisted inventory platform. Comfortable across LLM integration, RAG, and prompt engineering, and uses AI-assisted dev tools (Claude Code, GitHub Copilot, Cursor AI) daily to ship faster.

Technical Skills

AI & LLM Engineering: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Prompt Chaining, Agentic AI, Model Context Protocol (MCP), Function Calling, Structured Outputs, Claude API, OpenAI API

AI-Assisted Dev Tools: Claude Code, Cursor AI, GitHub Copilot, ChatGPT, Gemini, Codex

Languages: Java (8+), Python, JavaScript (ES6+), TypeScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, FastAPI, REST APIs, Microservices, JWT, RBAC, Redis, Kafka

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Axios

Databases: MySQL, PostgreSQL, MongoDB

Cloud/DevOps: AWS (EC2, S3), Docker, CI/CD, GitHub Actions

Architecture: System Design (HLD/LLD), Distributed Systems, API Design, Caching, Performance Optimization

Tools & Practice: Git, Postman, Jira, JUnit, Agile, Scrum

Professional Experience

Associate Software Engineer

Jan 2025 – Jan 2026

Bosch Global Software Technologies, Hyderabad

- Architected **30+ production REST APIs** (Java, Spring Boot, JPA, Hibernate, MySQL) powering a scalable microservices backend across multiple business-critical modules.
- Cut response load **35%** and lifted system performance **25%** through Spring caching, API refactoring, and query tuning.
- Secured enterprise applications with **JWT authentication and RBAC** via Spring Security.
- Accelerated delivery using Claude Code, GitHub Copilot, Cursor AI, and ChatGPT for code generation, debugging, and documentation.
- Drove sprint planning, architecture discussions, and code reviews in an Agile/Scrum team.

Software Development Engineer I

Dec 2023 – Oct 2024

Bijak, Gurugram

- Built modular React.js/Redux Toolkit frontends with lazy loading and code splitting, improving UI responsiveness across core workflows.
- Integrated **15+ REST APIs** via Axios for reliable, low-latency client-server data exchange.
- Shipped a real-time cart system with optimized CRUD operations, cutting cart latency **20%**.
- Built a reusable UI component library adopted across modules, speeding feature delivery **30%**.
- Eliminated redundant API calls via debouncing/throttling on search filters, reducing server load.

Projects

CodePilot AI — AI Coding Assistant

Python • FastAPI • Claude API • OpenAI API • Prompt Chaining • GitHub API

- **Problem:** Developers lose real time context-switching between writing code, generating tests, and writing docs by hand — slowing feature delivery.
- **Solution:** Built and deployed an AI coding assistant (Python, FastAPI, Claude API, OpenAI API) that ingests repo context to answer codebase questions and generate context-aware code, unit tests, and docs from natural-language prompts. Designed a plan → generate → review prompt-chaining workflow with structured JSON outputs to automate multi-file coding tasks end to end, and integrated the GitHub API for automated commit summaries and PR descriptions.

OrderCraft AI — Inventory Management Platform

React.js • Spring Boot • MySQL • JWT • Docker • Claude API | [Github](#)

- **Problem:** Warehouse staff had to navigate multiple screens just to check stock levels or order status, slowing routine operations.
- **Solution:** Architected and built a full-stack inventory platform with role-based workflows for Admin, Manager, and Warehouse Staff, backed by **25+ REST APIs** (Spring Boot, Spring Data JPA, MySQL). Added a Claude-API-powered natural-language query feature so staff can ask for stock and order status directly, and cut API load **30%** via server-side pagination, caching, and query optimization.

Education

B.Tech — Electronics and Communication Engineering

Chandigarh Group of Colleges

2023

CGPA: **8.15/10**

Achievements

- Achieved Global Rank 3,724 in Google Kick Start Round C (2021) — top competitive programming benchmark.
- Solved 250+ DSA problems on LeetCode covering arrays, strings, linkedlists, stacks and trees.
