Certifications

Certification in Digital Banking
from IIBF

Certification in IRDA

Work Experience

Data Consultancy Services (TCS) | Senior Business Analyst – BFS
Client: Central Bank of Kuwait | **Dec 2021–Present**

Key Result Areas:

- Prepared and maintained BRDs, FSDs, functional specifications, use cases, process flows, and user stories, providing clear requirements to development teams.
- Played a key role in the **ISO 20022 MT to MX migration** for the **Central Bank of Kuwait**, ensuring compliance with regulatory and SWIFT standards.
- Worked closely with business stakeholders and subject matter experts to gather, analyze, and validate business requirements for payment transformation initiatives.
- Utilized **Microsoft Copilot for requirement analysis, FSD drafting, user story creation, test scenario identification, and test case generation**, contributing to improved productivity and documentation quality.
- Actively participated in Agile ceremonies including sprint planning, backlog refinement, requirement walkthroughs, and stakeholder review sessions.
- Led **SIT and UAT activities**, including test planning, test execution, defect management, retesting, and business sign-off.
- Performed end-to-end **functional testing, regression testing, data validation, and accounting validation** across payment processing workflows.
- **Strong Hands-on experience in analysis and testing of ISO 20022 payment messages, including pacs.008, pacs.009, pacs.009 COV, pacs.004, and pacs.002..**
- Executed **SQL data validation**, reconciliation activities, and backend verification to ensure transaction accuracy and data integrity.
- Performed **REST API and SoapUI testing**, validating request/response payloads and integration workflows across payment systems.
- Coordinated with **development, infrastructure, SWIFT, and business teams** to resolve defects and ensure successful implementation of releases.
- Supported **production deployments**, post-release validation, issue triage, and stabilization activities for critical payment applications.
- **Highlights:**
- **Played a key role in the successful implementation and go-live of the ISO 20022 MT-to-MX migration program, ensuring compliance with SWIFT and regulatory requirements.**

Received **client appreciation** for onsite delivery excellence, stakeholder management, and successful execution of critical payment transformation initiatives.

Business Analyst – Core Banking - Nov 2014 – Nov 2021

Key Result Areas:

- Gathered and analyzed business requirements for **Core Banking System (CBS) enhancements and prepared Functional Specification Documents (FSDs)**.
- Coordinated with business users and developers to deliver system enhancements and regulatory changes.
- Performed impact analysis, requirement walkthroughs, and functional validation of banking solutions.
- **Executed manual, functional, and regression testing; supported SIT and UAT activities.**
- Performed SQL-based data validation and supported deployment, release verification, and production issue resolution.
- Participated in Agile ceremonies and acted as a bridge between business and technology teams.

Branch Manager– Retail Operations - Nov 2009 – Oct 2014

Key Result Areas:

- Managed end-to-end branch operations, ensuring achievement of business, service, and compliance objectives.
- Drove growth in CASA, NRI, retail, and MSME portfolios through customer acquisition and relationship management.
- Led cross-selling of liability and asset products including Business, Home, Personal, and Vehicle Loans.
- Managed HNI customer relationships and ensured superior customer service delivery.
- Monitored branch performance, profitability, and regulatory compliance while leading branch teams to achieve business targets.

Highlights:

- Ranked **3rd PAN India** as **Best Branch Manager (FY 2012–2013)** for consistently exceeding annual business and performance targets.
- Recognized with **multiple quarterly awards** for sustained excellence in sales performance, revenue growth, and customer acquisition.
- Drove **process and system improvements** by recommending functional enhancements to internal banking software, successfully implemented in collaboration with IT teams.

Adaequare Info Pvt. Ltd. | Java Developer | April 2008 - Oct 2009

Key Result Areas:

- Designed, developed, and maintained **Java-based applications and web solutions** in line with business and technical requirements.
- Contributed to **software design and architecture discussions**, supporting scalable and maintainable application frameworks.
- Developed **efficient, reusable, and testable code**, following coding standards and best practices.
- Performed **application analysis, unit testing, debugging, and defect resolution** to ensure high-quality deliverables.
- Troubleshoot production issues, prepared **technical and design documentation**, and recommended enhancements to improve application performance and stability.
