

MBA graduate from **IIM Raipur** close to **10 years** of experience driving product management, digital transformation, Agile delivery, and AI-enabled business initiatives across **Fintech, Healthcare, E-commerce**, and **enterprise technology** domains. Experienced in delivering AI-enabled, SaaS-based, ERP-integrated solutions supporting strategic business outcomes, customer-centric digital products, enterprise transformation initiatives

Experienced in leading **product roadmap planning, product discovery, backlog prioritization, stakeholder management, business analysis, workflow transformation**, and **cross-functional product delivery** initiatives within global matrixed organizations. Strong background in **Agile delivery, requirements management**, blueprinting workshops, acceptance criteria definition, **business process transformation**, organizational change management, **AI-driven technology adoption, KPI management**, process improvement, and collaboration across **Product, Engineering, Solution Architects, Data Scientists**, and **business stakeholders**.

Core strengths include product strategy, digital product delivery, **LLMs, Gen AI, Agentic AI, RAG**, workflow optimization, data-driven decision-making, stakeholder management, AI-enabled solutions, enterprise transformation. Experienced in translating business needs into scalable product capabilities, driving adoption, enhancing customer experiences, and delivering measurable business outcomes through technology-driven solutions

CORE SKILLS

AI Product Manager | AI Program Manager | Delivery Manager | AI Project Manager | AI Transformation Consultant | Product Strategy | Product Discovery | Product Roadmap Planning | Product Lifecycle Management | Business Analysis | Backlog Prioritization | User Story Management | Stakeholder Management | Customer Journey Mapping | Digital Products | Cross-functional Leadership | Agile Product Delivery | Scrum | Sprint Planning | Release Planning | Requirements Management | AI-enabled Solutions | LLMs | RAG | Generative AI | Agentic AI | SaaS Platforms | API Integrations | Digital Transformation | Data-driven Decision Making | Executive Reporting | KPI Management

Technical Skills: JIRA | Confluence | ServiceNow | Wrike | Monday.com | SQL | Python | Power BI | Tableau | REST APIs | Graph APIs | Kubernetes | Docker | Microservices | Azure | AWS | GCP | SaaS Platforms | ERP Integration | CRM Integration | Vector Databases | Embeddings | Semantic Search | NLP | Prompt Engineering | Workflow Automation | Generative AI | LLMs | RAG | Agentic AI

Industry Experience: Healthcare | FinTech | Telecom | Utilities | Retail | E-commerce | Banking | Enterprise SaaS | Manufacturing | Ed Tech

CERTIFICATES AND ACHIEVEMENTS

- Google Project Management Certification
- Gen AI for Project Managers – PMI (Project Management Institute)
- Agile Business Analysis Certification
- Agile Scrum Master Certification
- Certified Lean-six sigma black belt expert

ACADEMIC QUALIFICATION

Year	Institute/School	Course/Board
2018-2020	IIM Raipur	MBA - Operations, IT, Marketing, Strategy
2011-2015	Osmania University	Bachelor of Engineering

WORK EXPERIENCE

Krista AI Sr. Program Manager January 2024 – April 2026	Delivery Manager: - Led enterprise AI transformation programs leveraging Generative AI, Agentic AI, LLMs, and Retrieval-Augmented Generation (RAG) across Telecom, Utilities, Healthcare, Enterprise SaaS platforms - Partnered with CXOs and business leaders to define AI adoption strategies, identify transformation opportunities, and drive operational excellence through intelligent automation, cloud-native AI solutions. - Directed cross-functional teams spanning Product, Engineering, Data Science, DevOps, and UX to deliver scalable AI solutions using Agile methodologies, release governance, and enterprise delivery best practices. - Owned end-to-end AI solution delivery including architecture alignment, API integrations, prompt engineering strategy, model orchestration, deployment planning, and production readiness. - Established delivery governance frameworks, implementation playbooks, performance metrics, and risk management practices to improve execution quality across multiple enterprise programs. - Optimized program execution through resource planning, delivery forecasting, dependency management, and executive reporting, ensuring predictable outcomes across concurrent customer engagements.
--	--

- **AI Product Management:**
 - Defined product vision, AI roadmaps, and feature prioritization for LLM-driven platforms leveraging Vector Databases, embeddings, semantic search, NLP pipelines, and conversational AI frameworks.
 - Translated business requirements into AI use cases, Epics, User Stories, acceptance criteria, and workflow automation strategies aligned with enterprise digital transformation goals.
 - Partnered with engineering & AI teams to implement RAG pipelines, contextual retrieval systems, prompt optimization, intelligent agent workflows while minimizing hallucinations & improving response accuracy
 - Drove AI-first UX strategies by designing intuitive conversational experiences, human-in-the-loop workflows, and scalable AI interaction models for enterprise users.
 - Evaluated emerging AI technologies and customer feedback to shape product enhancements, commercialization opportunities, and long-term roadmap decisions.
 - Partnered with Sales and Customer Success teams to support solution positioning, executive demonstrations, and strategic customer engagements.
- **Project Management Office (PMO):**
 - Led **project planning, AI solution mapping, feasibility analysis, backlog prioritization, resource allocation, and governance management** for complex **AI and automation programs**.
 - Built and managed JIRA dashboards, Confluence repositories, sprint metrics, **AI delivery** documentation to improve visibility, stakeholder alignment, and execution efficiency.
 - Coordinated enterprise **AI implementations** involving Kubernetes deployments, REST API integrations, microservices architecture, and cloud/on-prem hybrid environments.
 - Conducted risk assessments, dependency analysis, release planning, and stakeholder communication to ensure on-time delivery of **AI-enabled enterprise solutions**.
 - Governed multiple concurrent customer programs, balancing engineering priorities, business objectives, and implementation risks across global engagements.
 - Built executive dashboards and portfolio health metrics to improve leadership visibility into delivery progress and strategic outcomes.
- **AI Solution Consulting:**
 - Worked as a strategic AI consultant for enterprise clients by identifying opportunities for Generative AI, workflow automation, intelligent knowledge management, AI-driven customer experience transformation.
 - Supported enterprise AI initiatives involving **multilingual AI systems, embedding models, Vector DB integration**, semantic indexing, and enterprise search optimization.
 - Collaborated with technical architects and AI engineers to design **scalable AI ecosystems** integrating **LLMs, NLP engines, intelligent agents, and enterprise APIs**.
 - Facilitated discovery workshops, AI capability assessments, and solution demonstrations for executive stakeholders across global regions including **EMEA, APAC, and North America**
 - Guided enterprise customers in defining AI adoption roadmaps aligned with business strategy
 - Conducted feasibility assessments evaluating business value, implementation complexity, and ROI for AI transformation initiatives.
- **Product Owner:**
 - Acted as the primary liaison between **business stakeholders** and **technical AI teams** to drive execution of **AI-powered enterprise applications** and automation solutions.
 - Managed **product backlogs, sprint planning, UAT coordination**, release governance, and milestone tracking for **AI-enabled products and intelligent workflow systems**.
 - Defined scalable AI workflows integrating semantic retrieval, prompt orchestration, contextual AI reasoning, and intelligent automation capabilities.
 - Ensured alignment between business objectives, AI governance standards, technical feasibility, and customer experience optimization initiatives.
 - Performed business assessments to identify enterprise automation opportunities, streamline workflows, establish requirement traceability from discovery to implementation, ensuring successful business outcome
- **Account & Customer Success Management:**
 - Built strategic CXO relationships to drive AI adoption, digital transformation, enterprise customer success, and long-term business growth through trusted advisory and value realization.
 - Led onboarding and enablement initiatives for AI-powered platforms by simplifying enterprise integration workflows and improving product adoption.
 - Established customer-centric support frameworks, AI service governance, SLA tracking, and issue resolution mechanisms to improve operational efficiency and customer satisfaction.
 - Led Quarterly Business Reviews (QBRs) to measure product adoption, business value realization, identify expansion opportunities, and align technology roadmaps with evolving customer goals.
 - Aligned AI capabilities with customer business objectives, compliance requirements, and enterprise scalability needs to maximize long-term solution adoption and success.

Deloitte USI
Consultant (PMO)
2.5 Years

July 2021- November 2023

- **Delivery Management:**
 - Owned the **Product Delivery Management**, ensuring on-time project completion. Presented the products to client organisations, by tailoring presentations with engaging visuals & **Product Demos**
 - Managed multiple scrum teams under different programs for **IT Project & Product** development in **E-commerce, Fintech, Operations** industries using **Google cloud, SAP, Oracle, Salesforce, SaaS**
 - Maintained clear, role-specific communication with employees and adapted multiple hats as needed
 - Engaged with client executives, demoing product contributions with **data-driven insights**
 - Implemented a robust **change management strategy**, ensuring smooth product adoption within client organisations by addressing concerns, active employee engagement
 - Directed globally distributed delivery teams while driving governance, implementation readiness, and executive stakeholder alignment.
 - Introduced delivery quality checkpoints and governance reviews that strengthened execution predictability across strategic programs.
- **Project Management Office:**
 - Leveraged cross-functional collaboration with **PMO** to spearhead the creation of **Statement of Work (SOW), RFP, RFQ, RFI** documents. The multi-faceted role provided me with the opportunity to define **project objectives**, allocate necessary resources.
 - I have actively **provided strategic direction** while engaging with **key stakeholders**, including **clients and project teams**, to gather input and feedback, ultimately contributing to the seamless execution of project.
 - Standardized portfolio **reporting frameworks, governance templates**, and **executive dashboards** across multiple client engagements.
 - Supported **portfolio planning** through **financial tracking, utilization analysis**, and **cross-project dependency management**.
- **Business Analyst:**
 - Had the distinct privilege of forging collaborative partnerships with an array of **Fortune 500 enterprises**, spanning diverse industries such as **Product Technology, paints, and Lifestyle brands**. My specialisation lies in the dynamic domains **E-commerce** and **Marketing**. My role has been pivotal in the systematic gathering of requirements & fostering productive client interactions & proactively driving **project success**
 - Played a crucial role in creating **project mapping, project data mapping, feasibility assessments**, and prioritisation of requirements, while contributing to the development of **User Stories & Epics**
 - Created **JIRA Project Dashboards & Confluence Data** documents to fabricate a work repository, to prevent potential issues & project rework
 - Mapped business capabilities and future-state operating models supporting large-scale **transformation initiatives**.
 - Partnered with business and technical teams to validate solutions through process reviews, testing, and implementation readiness.
- **Product Owner:**
 - Created synergy between **Release Management, Change Management, & Stakeholder Engagement**. I take pride in spearheading the meticulous implementation of **DevOps CI-CD pipelines** & was unwavering in upholding rigorous **Quality Assurance** standards for each project
 - Acted as a **Subject-Matter Expert** for four substantial projects from **Fortune 500** clients, regularly conducting impactful **product demonstrations** to clients fostering relationships built on trust & expertise
- **Scrum Master:**
 - Orchestrated and seamlessly overseen **Sprint planning, Sprint review, Sprint retrospective**, and the **Sprint stand-up** meetings in my capacity as Scrum Master. Served as a skilled facilitator for the Scrum team ensuring optimal collaboration and productivity
 - Adeptly established comprehensive **training programs**, artfully **resolved conflicts**, and maintained a vigilant watch over **team metrics** to foster a culture of continual improvement. Through this played a central role in fostering a culture of continuous improvement for the team

Byju's – Think & Learn
Assistant Product Manager
1 Year
July 2020 – July 2021

- Worked as an **IT Project Manager** for New Product Development, **leading Scrum teams, sprint planning**, and **cross-functional** project execution.
- Facilitated brainstorming sessions for New Product Introduction (NPI), **performing cost analysis, ROI** evaluation, and defining **KPIs** and **SLAs**.
- Partnered with internal **Product Owners** and **engineering teams** to gather requirements, refine features, and support product development.
- Collaborated with **Sales** and **Marketing teams** to improve product positioning, launch readiness, and customer acquisition strategies.
- Developed digital marketing campaigns and pilot initiatives to improve market penetration and strengthen brand visibility.
- Built inbound marketing strategies leveraging **digital** and **social media channels** to enhance customer engagement and lead generation.
- Coordinated product rollout activities across **Product, Marketing, and Operations teams** to improve execution efficiency and stakeholder alignment.
- Analysed product performance using customer **feedback**, **business metrics**, and **adoption trends** to recommend feature enhancements and improve user engagement.
- Supported **product roadmap planning**, **release readiness**, and **strategic decision-making** through cross-functional collaboration with leadership.

Novai Tek India Pvt. Ltd.
Project Manager
1 Year
Jul 2017 - Jun 2018

- Worked with the **IT team** in India for new **project development**, **conducted sprints** and **daily scrum**
- Followed **Agile methodology** to complete the project and did regular **sprint planning**
- **Managed** a team of 10-15 people who worked on **IT project development** for **Iaas** Products
- Handled team of **UI/UX & API** developers and operate team consisting of **QA** and **DevOps** engineers
- Handled **Business Development** to onboard multiple projects for the company to increase the company's market penetration in the area of IT services and IT staffing in Indian firms
- **Managed** a team of 10 people working in the area of IT Business Development for the firm
- Simultaneously worked on **IT Operations** of the entire company, acting as the technology bridge between our US and India offices
- Directed multi-functional coordination across development, operations, and client engagement teams to improve execution efficiency and strengthen delivery processes for enterprise IT services.

Infosys Limited
Product Owner
(PMO)
20 Months
Dec 2015 - Jun 2017

- Worked as a **Business Analyst** for **New requirement gathering** to develop new tech solutions
- **Drafted design documents** and Process flow mapping for converting client requirements into technical functionalities
- Supported enterprise application delivery through process optimization, client coordination, functional analysis, and documentation management within a large-scale banking environment.
- **Worked** in the **Quality assurance team** of a prestigious bank located in the United States
- **Executed** code review for identification of redundant code in the project. Worked closely with the client to solve **functional** problems and for **designing Process flow diagrams**
- Completed training from Infosys University in **Python, SQL, Tableau, and C# .Net**
- Worked in the area of **IoT** as a part of an internal project for the company

M/S Hash tag solutions
(Co-Founder)
Associate Project Manager
6 Months
May 2015 - November 2015

- **Co-Founded service-based IT company** working in the domain of **Iaas, Paas, Saas**
- **Managed** a team of 10-15 people who worked on **IT project development** as a **Scrum master** and a **Business Analyst**
- Managed client calls to help identify new requirements for developing new information technology solution
- Worked as an Agile coach to the technical team to help understand Agile methodology better
- Worked in the area of **IT Business development** and corporate relations for the firm
- Parallelly worked on improving the company's operational structure and set the **Software Development Life Cycle**
- Established foundational business and operational processes for a startup IT services firm while driving client relationship management and supporting scalable project execution practices.
