PROFESSIONAL EXPERIENCE

Delivery Manager – Payments & Banking Technology

AurusTech Pvt. Ltd., Pune | April 2025 – Present

- Leading **enterprise delivery portfolios** across POS, eCommerce, and in-store payment ecosystems for global BFSI and retail clients.
- Overseeing **end-to-end delivery governance**, roadmap management, risk controls, compliance reviews, and budget tracking.
- Driving integrations with **acquiring processors, issuer banks, and digital wallet networks** including ApplePay, GooglePay, PayPal, and regional banking wallets.
- Managing **multi-country rollout programs**, ensuring predictable delivery using Agile/Scrum and SAFe frameworks.
- Ensuring platform compliance with **PCI-DSS, EMV, P2PE, tokenization, encryption (DUKPT), and HSM-based security**.
- Collaborating with engineering, QA, cloud, security & PMO teams to deliver **high-availability payment systems** with <100ms latency.
- Leading client escalations, SLA management, root cause reviews, and governance presentations with banking & retail leadership.

Project Manager – Payments

AurusTech Pvt. Ltd., Pune | April 2018 – March 2025

- Managed complex POS/eCommerce payment programs for enterprise clients across US, Canada, and APAC.
- Delivered payment routing engine enhancements, interchange optimization features, fraud monitoring, and token vault integrations.
- Coordinated with processors such as **Fiserv, Elavon, Chase, Worldpay**, ensuring certification and compliance readiness.
- Oversaw product backlog, sprint planning, resource allocation, and cost planning for high-volume payment systems.
- Led PCI-DSS audits, EMV certifications, PIN encryption rollouts, and secure key management initiatives.

Client Services Manager – Payments

AurusTech Pvt. Ltd., Pune | April 2017 – March 2018

- Managed payment gateway operations, KPIs (latency, declines, settlement), and production health checks.
- Led issue triaging with processors and bank tech teams.
- Developed functional/technical documents for bank audits, certifications, and architectural assessments.

Technical Support Engineer – Payment Infrastructure

AurusTech Pvt. Ltd., Pune | Jan 2016 – March 2017

- Supported 24x7 enterprise payment systems handling high volumes of card-present & CNP transactions.
- Executed device certifications, key rollovers, L2/L3 incident resolution, and EMV/PED maintenance.

Assistant Professor / Academic Consultant

- **Finolex Academy, Ratnagiri | Dec 2011 – Dec 2015**

Software Development Intern

- **Mahindra Hinoday, Pune | Jan 2011 – Nov 2011**
-

EDUCATION

Masters in Computer Applications – Mumbai University – 2011

Bachelor of Computer Science – Mumbai University – 2007

CERTIFICATIONS

- Certified Scrum Master (CSM)
 - Agile Project Manager (ICP-APM)
 - PCI-DSS Compliance & EMV Fundamentals (*Internal Training*)
 - Generative AI Overview for Project Managers
-

TOOLS & TECHNOLOGY STACK

Payments: EMV, NFC, DUKPT, Tokenization, ISO 8583, HSM, PEDs

Frameworks: Agile, Scrum, SAFe, Waterfall

Tools: Jira, Confluence, QC, Basecamp, PPM

Platforms: Windows, Linux, Ubuntu, CentOS

KEY ACCOMPLISHMENTS

- Promoted to **Delivery Manager** for consistent high-quality delivery across payment programs.
- Awarded **Star Performer** for delivering a global retail payment transformation under budget and ahead of schedule.
- Led multi-brand POS and eCommerce payment rollouts across 5000+ stores.
- Orchestrated a **multi-tender acceptance platform** including credit, debit, gift cards, crypto wallets, ApplePay, GooglePay.
- Resolved long-standing PED–POS integration issues across major retail chains through optimized infrastructure and device strategy.

PROJECT DETAILS

Delivered solutions across **Health, Apparel, Grocery, Auto, C-Store, Lifestyle, Specialty Retail** including:

- National EMV upgrade programs, contactless enablement & M400 deployments.
- eCommerce payment gateway onboarding with tokenized cards, digital wallets & 3DS flows.
- Reconciliation & settlement APIs for Chase and other processors.
- PINless debit implementation and multi-processor certification (Fiserv).
- POS–PED mapping strategy redesign to eliminate IP-mismatch-driven outages.
- Multi-brand digital payment onboarding for new eCommerce storefronts.
- **Youth & Lifestyle Retail** – Delivered PINless debit support and coordinated certifications with Fiserv and store QA teams. Supported eCommerce payments testing including PINless fallback and ApplePay token validation in staging and production.
- **Apparel & Retail** – Led support for post-release issues including POS-PED integration validation, PED version upgrades, and transaction communication recovery in coordination with the client's network team. Also supported QA and rollout of digital transaction flow via web-based test harness and token-based payments.
