EXPERIENCE

Senior Consultant - Project Manager / GRC Consultant
Capco Technologies Pvt Ltd
Bengaluru, Karnataka, India
August 2016 - January 2025

GRC Consultant

- **TPRM** - Executed Third-Party Risk Assessment (TPRM) for on-prem to cloud migration, including vendor classification, inherent and residual risk evaluation, control & due diligence.
- **SOC2 Audit Readiness** - Supported SOC 2 Type II audit readiness for CC6.1 and CC8.1 TSC controls by coordinating logical access reviews, change management governance, audit evidence tracking, and remediation activities across technology teams.
- **ISO 27001 Audit Readiness** - Supported ISO 27001 audit readiness for a cloud-native SaaS organisation by coordinating ISMS scoping, risk assessments, control remediation, audit evidence tracking, and governance activities across security, infrastructure, and engineering teams.
- **Risk Assessment & Treatment** - Identified and translated technical vulnerabilities into risk registers and remediation plans aligned to NIST CSF and ISO 27001 control requirements.

Project Manager

- Delivered technology initiatives within regulated investment banking environments, ensuring adherence to governance and risk management practices.
- Identified and tracked technology risks and issues through structured RAID logs; facilitated mitigation planning and escalation where required.
- Collaborated with Information Security and Compliance stakeholders to incorporate security and control considerations into project planning and execution.
- Supported internal and external audit engagements by coordinating documentation, facilitating stakeholder walkthroughs, and tracking remediation items to closure.
- Prepared governance and risk reports for senior stakeholders, highlighting risk posture, control gaps, and mitigation progress.
- Gathered and documented business and security-related requirements, including access controls and compliance considerations.
- Coordinated UAT activities to validate system functionality and ensure appropriate access provisioning before production deployment.

Technical Coordinator - Business Analyst
Northern Trust (Northern Trust Operating Services Pvt Ltd)
Bengaluru, Karnataka, India
February 2009 - August 2016

- Requirements Gathering & User Stories for Global Reconciliations.
- UAT Management
- Project Documentation - BRD, Defects Log, Test Cases, UAT Strategy and Coordination.
- Stakeholder Management
- Design Dashboards, Application pages with UI/UX team
- Process Workflows - Current & Future State
- Project Governance & Reporting

ENTREPRENEURIAL EXPERIENCE

Founder / Product Manager – CSR SaaS Platform (2019 - 2022)

- Conceptualised and developed a proof-of-concept SaaS platform enabling corporate CSR and individual donors to contribute products and services to NGOs.
- Conducted market research and competitive analysis to evaluate existing solutions, identify gaps, and inform product design and platform considerations.
- Wire-framed the UI (pages for all user types) for PoC.
- Structured a phased product roadmap starting with core marketplace functionality, followed by access control, governance features like audit logging.
- Defined product workflows, features and user journeys across B2B and B2C use cases.
- Evaluated cloud deployment and third-party integration considerations.
- Identified data handling and access considerations during platform design.
- Engaged stakeholders to validate concept and refine platform requirements & features.
