- Efficiently migrated processes, meeting SLAs and ensuring seamless transitions
- Recognized by the quality team as a standout contributor to implementing a process improvement idea at Statestreet.
- Actively participated in multiple projects aimed at enhancing process efficiency

PROFILE SUMMARY

- Business Analyst with experience in Capital Markets and Investment Banking, specializing in Operations, Reference Data, Corporate Actions, Trade Lifecycle, Trade Settlements, Equities, and Fixed Income. Currently working at Apptad Technologies, delivering business analysis and process optimization initiatives.
- Driving automation of Corporate Actions platforms to reduce manual effort, improve operational efficiency, enhance reconciliation accuracy, and support cost optimization. Experienced in resolving settlement discrepancies, cash and position breaks, and production issues through data-driven analysis.
- Skilled in business analysis, requirement gathering, stakeholder management, process modelling, SQL-based data analysis, impact analysis, and Agile delivery, with hands-on experience using SQL, Power BI, JIRA, Confluence, and Advanced Excel.
- Proven ability to bridge business and technology teams, deliver scalable solutions, improve data quality, optimize business processes, and support operational excellence across Capital Markets applications.

WORK EXPERIENCE

Business Analyst | Apptad Technology, Hyderabad

Sep'25-Present

Process: Business Analyst /Investment Banking & Finance

Key Result Areas:

- Acted as a Functional Business Analyst supporting Capital Markets and Investment Banking applications, driving digital transformation across Front, Middle, and Back Office functions.
- Gathered, analyzed, and documented business requirements for Equities, Fixed Income, Reference Data, and Security Master processes through collaboration with business users and technology teams.
- Utilized SQL to perform data analysis, troubleshoot production issues, validate large datasets, support operational reporting, and generate business insights.
- Performed data reconciliation and analytical validation between upstream and downstream systems, ensuring data integrity, pricing accuracy, and effective exception management.
- Conducted impact analysis and trend analysis to identify process improvement opportunities and support data-driven business decisions.
- Investigated production incidents through Root Cause Analysis and partnered with development teams to resolve application and data-related issues.
- Managed Reference Data and Static Data while supporting Security Pricing, Market Data, and enterprise data quality controls.
- Prepared BRDs, FRDs, Functional Specifications, User Stories, process flows, and functional documentation to translate business requirements into technology solutions.
- Coordinated Functional Testing, SIT, Regression Testing, and UAT, including test case preparation, defect tracking, data validation, and business sign-off.
- Collaborated with Front Office, Operations, Business Users, QA, and Development teams to deliver process improvements and production support enhancements.
- Supported file-based processing (CSV/Flat Files) and utilized SQL, JIRA, Confluence, SharePoint, and Advanced Excel for analysis, reporting, backlog management, and release coordination.
- Participated in Agile Scrum ceremonies, effectively managing multiple priorities while ensuring timely delivery of projects and production support.
