PROGRAM GOVERNANCE & CONTROLS | ENGINEERING EXCELLENCE | EXECUTIVE REPORTING | BFSI | 21+ YEARS

Pune, India | +91 9156293130 | s.omkar108@gmail.com | linkedin.com/in/sanjogtilak

EXECUTIVE PROFILE

Program Governance and Controls professional with 21+ years of experience partnering with Directors and senior technology leaders across global financial services. Specializes in translating strategic priorities into structured governance routines, risk and control oversight, executive reporting, and coordinated execution across engineering and delivery environments. Brings strong BFSI exposure spanning engineering governance, PMO and portfolio practices, SOX, RCSA, audit coordination, SteerCo support, process re-engineering, reporting transformation, capability building, and AI-assisted reporting and insights. Experienced in driving defined governance initiatives, strengthening operating discipline, and enabling decision-ready visibility across multi-platform ecosystems.

KEY ACHIEVEMENTS

- Governed 600+ releases through Release on Demand oversight, contributing to approximately 10 hours of effort savings per release and around 20% cycle-time reduction.
- Coordinated enterprise SSRS-to-Tableau migration, improving dashboard usability, reporting efficiency, control visibility, and leadership insight by approximately 30-40%.
- Standardized SOX templates, evidence workflows, and governance routines, reducing audit turnaround time by approximately 20-25% and strengthening control consistency.
- Managed a global Qlik Sense MIS/EIS transformation for HSBC HTI, enabling centralized visualization and approximately 30% improvement in reporting efficiency.
- Established PMO frameworks, structured reporting cadences, governance templates, and decision-ready packs across BNY Mellon and Cognizant engagements.
- Built governance capability through training modules, SOPs, reusable templates, practice forums, and structured knowledge-sharing across distributed teams.

SKILLS

Behavioral Skills: Executive stakeholder management; cross-functional collaboration; facilitation; influencing without direct authority; structured communication; mentoring; capability building; training delivery; knowledge sharing; dependable follow-through.

Functional Skills: Enterprise program and portfolio governance; PMO frameworks; Engineering Excellence; SteerCo governance; executive reporting and decision support; RAID, SLA and KPI governance; regulatory compliance (SOX, RCSA and audit); vendor, resource and financial governance; process re-engineering; strategic initiatives; operational maturity.

Technical and Method Skills: Agile and hybrid delivery; Design Thinking; value stream mapping; Lean Six Sigma continuous improvement; root-cause analysis; reporting modernization; AI-assisted reporting and insights; SOP, playbook, template and training-module creation; process-framework development and maturity tracking.

PROFESSIONAL EXPERIENCE

Synechron Technologies | Client: Citi, FRMT Group | Senior Manager - Engineering Excellence

June 2024 - Present

- Lead engineering governance routines supporting delivery discipline, control adherence, and consistent visibility across multi-geography engineering teams.
- Coordinated governance, stakeholder alignment, and transition activities for enterprise reporting modernization across SSRS and Tableau.
- Own Release on Demand governance reporting and oversight for 600+ releases, maintaining control discipline, escalation visibility, and standardized reporting.
- Support engineering scorecards aligned to DORA metrics, SLA adherence, code quality, risk, compliance, and operational KPIs, improving early risk detection and decision clarity.
- Drive cross-functional coordination across engineering, DevOps, risk, compliance, and operations teams to resolve dependencies and strengthen governance consistency.
- Prepare and coordinate senior governance reviews, SteerCo inputs, executive reporting, structured escalations, and follow-through on leadership actions.
- Support strategic Engineering Excellence initiatives, governance standardization, SOP and template creation, and adoption of consistent reporting practices across platforms.

- Use AI-assisted analysis and reporting tools to improve insight generation, communication quality, and efficiency across governance and executive reporting processes.

Careator Technologies | Client: Rubrik Inc. | Principal Consultant - Program Management Office

January 2024 - May 2024

- Executed SOX compliance activities under compliance leadership, supporting 100% control adherence, audit readiness, and structured documentation across multiple applications.
- Standardized templates, evidence workflows, and governance routines, reducing audit turnaround time by approximately 20-25% and improving control consistency.
- Coordinated product, engineering, compliance, and audit teams to support timely remediation, accurate evidence collection, and alignment with control expectations.
- Prepared executive-level compliance reporting and ExCo inputs covering control status, risks, gaps, remediation progress, and management actions.
- Improved traceability and operating discipline through structured documentation, evidence tracking, process clarification, and reusable governance artefacts.

BNY Mellon | Vice President - Project & Program Management Office

November 2022 - September 2023

- Led PMO governance across reporting, financials, resource planning, delivery oversight, and regulatory checkpoints, working closely with Directors and senior stakeholders.
- Established structured weekly, monthly, and quarterly reporting cadences, strengthening transparency, predictability, and leadership visibility across programs.
- Managed access governance reviews and regulatory checkpoints, supporting adherence to internal policies and audit standards.
- Supported finance transformation initiatives and model governance through structured reporting, issue tracking, governance coordination, and management follow-up.
- Owned decision-ready reporting packs covering program risks, financials, delivery performance, dependencies, and management actions.
- Mentored PMO team members on reporting discipline, governance practices, control-focused execution, and consistent use of templates and routines.

Harman Connected Services and Wipro | Client: HSBC HTI - Global Banking & Private Banking | Project & Practice Manager

February 2018 - October 2022

- Managed a global Qlik Sense-based MIS/EIS reporting transformation, enabling centralized visualization and improving reporting efficiency by approximately 30% across HTI functions.
- Led enterprise process-framework development and maturity tracking, strengthening process adoption and governance consistency across distributed teams.
- Facilitated Agile delivery as Scrum Master and Agile Coach, improving sprint predictability, collaboration, and team alignment.
- Coordinated cross-functional data, reporting, and insights integration, reducing manual reporting effort by approximately 20-25% and improving business visibility.
- Established governance practices, controls, reporting standards, and operating routines across programs and portfolios.
- Drove PMO and practice capability building through training modules, SOPs, reusable templates, community forums, and structured knowledge-sharing.
- Applied Design Thinking, value stream mapping, and continuous-improvement methods to support strategic initiatives and process simplification.
- Managed risks, issues, vendors, resources, and financial controls in line with organizational policies, SLAs, and governance expectations.
- Standardized tools and practices across JIRA, Confluence, Clarity PPM, SharePoint, Qlik Sense, and reporting platforms to improve tracking and operational efficiency.

Cognizant Technology Solutions | Client: Credit Suisse | Governance, PMO & Delivery Excellence

December 2014 - September 2017

- Established PMO governance frameworks, charters, plans, templates, SOPs, and reporting models to improve execution consistency and accountability across programs.
- Defined governance structures, communication models, and management routines, strengthening delivery visibility and stakeholder alignment.

- Enabled risk identification, mitigation planning, issue governance, and escalation routines to improve delivery predictability and control adherence.
- Facilitated Delivery Excellence frameworks and applied Lean Six Sigma Green Belt practices to support strategic improvement initiatives and reinforce risk controls.
- Defined and monitored SLAs, KPIs, and performance metrics, improving service quality, operational visibility, and adherence to standards.
- Facilitated governance reviews, customer forums, stakeholder engagements, and structured action tracking.
- Conducted root-cause analysis using Fishbone and 5 Whys, improving resolution effectiveness and reducing recurrence.
- Created training content, governance guidance, and reusable practice assets to strengthen capability and consistent adoption across teams.

Datavail Infotech Pvt. Ltd. | Global Service Delivery & Client Service Management

October 2012 - November 2014

- Ensured 24x7 database service continuity, supporting SLA adherence and stable client operations.
- Managed the end-to-end lifecycle of short-term projects from onboarding through closure, including planning, execution, transition, and stakeholder communication.
- Coordinated client onboarding, service transitions, access controls, operational reviews, and handover to support teams.
- Implemented dashboards and tracking systems, reducing manual reporting effort by approximately 15-20% and improving performance visibility.
- Defined quality frameworks, measurement approaches, and operational metrics, contributing to improvement in customer satisfaction.
- Strengthened stakeholder engagement through structured reporting, reviews, escalation handling, and governance practices.

ICICI Bank | Officer - Process Re-engineering & Escalation Management

January 2006 - December 2011

- Managed senior-level customer escalations within retail banking operations, supporting timely resolution and improved customer experience.
- Enabled process re-engineering initiatives to improve efficiency, control adherence, and operational effectiveness.
- Supported credit operations, compliance coordination, and audit interactions in line with regulatory and control requirements.
- Contributed to CRM, IVR, and campaign-management implementations supporting process automation and customer engagement.
- Conducted root-cause analysis for transaction and operational issues, improving resolution effectiveness and reducing recurrence.

EARLIER CAREER

Viva Infomedia | Kankei Marketing | Uniexports (2004, 2005 and 2012) - Foundation across service operations, incident management, back-office administration, pre-sales coordination, analysis, MIS reporting, and customer-service governance.
