

# SAYANTAN PAUL

Business Analyst | Financial Services | Agile Delivery  
[sayantan1997paul@gmail.com](mailto:sayantan1997paul@gmail.com) | +91- 7044410455 | India

---

## PROFESSIONAL SUMMARY

Business Analyst with 5 years of experience across financial services — insurance, banking, and payments — gathering and validating business requirements, mapping processes, and partnering with product, operations, and technical stakeholders to translate data insight into documented, testable requirements. Comfortable moving between requirements documentation, SQL/Excel-based analysis, and Agile delivery, with a consistent focus on tracing requirements back to quantified business impact. Domain range spans policy and claims lifecycle, retail banking and payments operations, and financial reporting, with the underlying BA toolkit — stakeholder facilitation, process mapping, BRDs/FRDs, UAT — applied consistently across each.

---

## CORE COMPETENCIES

- Business Analysis: Requirements Gathering & Validation, BRDs/FRDs, User Stories & Epics, Process Mapping (As-Is/To-Be, BPMN), RFP/RFI Response, Stakeholder Facilitation, Gap Analysis
- Financial Services Domain: P&C Insurance (Policy & Claim Lifecycle), Retail Banking, Payments Operations (UPI, NEFT/RTGS, Card Lifecycle awareness), KYC/AML, Financial Reporting, Data Validation
- QA & Testing: Manual Functional/Regression/UAT Testing, Test Case Design & Documentation, Requirement-to-Test Traceability, Defect Tracking
- Tools & Delivery: SQL, Advanced Excel, Python, Power BI, Azure, JIRA, MS Visio, Lucid Chart, Guidewire PolicyCenter (awareness)
- Emerging: Prompt Engineering, Claude, Gen AI, LLM, Lovable AI, Napkin AI

---

## PROFESSIONAL EXPERIENCE

### Business Analyst | Intact Insurance (123.ie) — Ireland

*Apr 2024 – Present*

- Contributed, alongside the Data Analytics team, to root-cause analysis that traced 46% of policy declines to outdated acceptance criteria; documented the revised business rules and functional requirements with underwriting stakeholders, supporting a 3-point rise in quotability and an estimated +€54K/month in premium.
- Prepared test scripts for functional and non-functional testing and executed System, System Integration, Compatibility, Performance, and User Acceptance Testing (UAT).
- Used GA4 and Hotjar to diagnose funnel drop-off against an 85% completion target as part of a forward-looking transformation programme; identified a segment-level conversion gap that fed into a product recommendation - a diagnostic approach transferable to any digital customer journey.
- Translated inbound call pattern analysis and customer journey pain points into functional requirements for a self-service feature, partnering with cross-functional product, data, and engineering teams to reduce manual service volume.
- Engaged stakeholders to define current- and future-state needs through structured gap analysis, gathered and validated functional requirements and facilitated workshops across product, data, and engineering squads.
- Mapped As-Is/To-Be process flows in Lucid Chart for core lifecycle journeys - a process-mapping discipline directly applicable to account opening, payments, and servicing workflows in banking.
- Initiated, groomed, and took part in Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective meetings.

### Senior Analyst — Presales & Business Analysis | Capgemini

*Sep 2021 – Aug 2022*

- Partnered with bid managers on RFP and RFI responses for global alliance partners; gathered stakeholder requirements and translated them into solution and process flow diagrams for proposal submissions.
- One of two analysts consolidating and validating deal-stage and deal-value data across a ~€300M practice-level revenue pipeline, tracking deal stages and forecasts and driving practice-level financial reporting across live and prospective bids.
- Built weekly pipeline and bid-status reports in Excel and Power BI, presented to practice leadership to support revenue forecasting and planning.

### Business Analyst — QA & Testing | Cognizant

*Nov 2019 – Sep 2021*

- Performed manual functional, regression, and UAT testing for a financial services client, designing and documenting test cases and test scripts directly from business requirements and functional specifications.
- Maintained test case libraries and requirement-to-test traceability matrices across releases, and logged and tracked defects through to closure.
- Produced weekly test status and quality reports for stakeholders, and built working knowledge of Selenium to support automation of regression test suites.

---

## EDUCATION

- MSc in Business Analytics | National University of Ireland, Galway | 2022 – 2023
- B.Tech in Electrical Engineering | India | 2015 – 2019

---

## ADDITIONAL

- Claude Cowork Certified; Claude AI Capabilities and Limitations Certified; CCBA certification ongoing.
