

Shailja Thakur

Data Scientist

Data-driven professional with 5+ years of experience turning complex data into actionable business insights. Skilled in leveraging advanced analytics, statistical modeling, and visualization techniques to inform strategic decisions and optimize performance. Adept at collaborating with cross-functional teams to translate business challenges into data solutions, streamline reporting workflows, and deliver measurable impact.

WORK EXPERIENCE

Data Scientist

Maersk

03/2023 - 08/2025,

Achievements/Tasks

- Developed an **Enterprise Document Intelligence** platform to extract, classify, and structure insights from **35,000+ unstructured business documents**. Designed **analytics workflows** to transform raw text into actionable intelligence, enabling **faster decision-making** and improved reporting accuracy. Integrated advanced retrieval mechanisms for scalable access to key business information, **reducing manual effort** and enhancing **operational efficiency**.
- Led and contributed** to the development of the **Container Gate Time Prediction Model**, **collaborating across teams** to enhance container flow efficiency. The model delivered **\$1M in cost savings**.
- Integrated MLOps best practices** using **Airflow, MLflow, and Azure**, reducing manual intervention and enhancing automation.

AI Analyst

Pixis

03/2022 - 01/2023,

Achievements/Tasks

- Developed an **audience insights dashboard** for Google and Facebook Ads **by aligning with product, marketing, and sales teams**. **Led discussions with stakeholders** to define key metrics, improving ad targeting by **20%**.
- Used **GPT-3** model to develop an **AI-driven advertisement generator** fine-tuned pipelines, enabling the **marketing team** to create engaging, personalized ad campaigns that boosted **customer engagement by 30%**.

Applied Machine Learning Engineer

Intangles Lab

11/2019 - 11/2021,

Achievements/Tasks

- Developed a **TOPSIS-based Driver Performance Model** for **route-specific insights**, enabling **customer monitoring, rewarding, or warning** of drivers based on **performance metrics**.
- Enhanced the **Addblue tracking algorithm** by 99%, allowing **real-time monitoring** of thefts, refills, and breakpoints for **OEM customers**.

SKILLS

PERSONAL PROJECTS

Predicting User Preferences in Chatbot Responses

- Developed a **predictive analytics model** to understand user preferences between chatbot responses using data from the **"Chatbot Arena."** Applied **statistical analysis** and **machine learning** to identify key drivers of user choices, improving predictive accuracy by **20%** over baseline.
- Delivered insights on **conversational quality** and **user engagement** trends to inform product strategy.

LLM-powered Search & Recommendation System

- Built a **semantic search** and **recommendation engine** leveraging **LLM embeddings** and hybrid retrieval (vector + keyword). Designed analytics dashboards to monitor search relevance, user engagement, and recommendation performance, enabling data-driven improvements in **knowledge management** and **personalization**.

- Person Tracking and Re-identification
 - The goal of the project was to **uniquely identify a person in a video frame**. Used **YOLO algorithm** to **detect persons**.
- **Siamese Network** to **re-identify and track** the person through **unique features from the body**. Used **MTCNN** to **extract face** and **Facenet model** to **re-identify** through **unique facial features**.

EDUCATION

Bachelor of Technology (CSE)

Indian Institute of Information Technology,

Kalyani

2015 - 2019,

8.24 CGPA

ACHIEVEMENTS

N/Core Ideathon Winner (06/2018) [🔗](#)

Project Awaaz - One Lakh Seed Grant. From a total of 946 teams, we were among the top 10 and as well as the Winner. We received an offer of incubation as well as prize money of 1 Lakh.

Smart India Hackathon - 2019 (Incubation offer)

From a total of 1000+ ideas on the problem statement of 'PERSON TRACKING SYSTEM' given by HCL, our Team was chosen among the top 5, we also received an offer to come onsite and implement our proposed solution.
