SUMMARY

- Lead Technical Network Subject Matter Expert (SME) with 8.8+ years of expertise in enterprise networking, specializing in routing, network architecture, and WAN technologies. Skilled in diagnosing and resolving complex network issues.
- Expertise in designing and building complex lab environments, managing end-to-end case ownership, performing advanced troubleshooting, configuration management, and collaborating with Engineering teams, Product and Customer Success Teams to drive issue resolution, product improvements, and enhanced customer experience.
- Hands-on experience with routing protocols (BGP, OSPF, EIGRP, IS-IS), multicast, VXLAN basics, MPLS, and platform-level troubleshooting. Proficient in network automation (Python & Regex) and using tools like IxNetwork and Wireshark for network testing.
- Experienced in leading and mentoring technical support engineers/new hires and delivering technical training across enterprise networking domains, contributing to team development and knowledge sharing.

PROFESSIONAL EXPERIENCE

Technical Consulting Engineer,
Cisco Systems, Bengaluru

July 2017 - Present

- Specialized in Enterprise Routing and Network Architecture, resolving complex customer issues involving routing protocols, platform architecture, and WAN technologies, achieving a 95%+ resolution rate on critical escalations.
- Led end-to-end ownership of critical support cases, performing deep technical troubleshooting, managing escalations, and coordinating with engineering teams, reducing average case closure time by 20% while consistently meeting SLA, KPIs (MTTR, response time, CSAT) targets.
- Acted as primary escalation point for high-severity (P1/P2) incidents, improving incident response efficiency by 30% through structured troubleshooting and escalation handling.
- Led and mentored technical support engineers conducting training sessions, and fostering a collaborative and high-performance team culture, resulting in a 25% increase in productivity.
- Ensured prioritization and adherence to SLAs, achieving 100% compliance with response and resolution targets.
- Monitored and supported metrics to identify trends, drive operational improvements, and reduce repeat incidents by 25%.
- Led complex troubleshooting efforts using tools such as tcpdump, traceroute, nslookup, and log analysis.
- Collaborated cross-functionally with engineering, product, sales, and account management teams to resolve customer issues holistically and influence product enhancements through customer feedback.
- Replicated customer environments in lab setups to diagnose defects and validate fixes, improving product stability and reducing recurring issues.
- Created and maintained technical documentation and knowledge base articles, while developing and delivering training programs that improved team ramp-up time by 40% and increased first-time resolution rates by 15%.
- Provided hands-on customer support via phone, email, and remote sessions, ensuring high-quality service delivery and customer satisfaction during critical incidents and high-visibility events (e.g., FIFA, IPL) with 99.99% uptime.
- Collaborated in a follow-the-sun global support model, ensuring seamless case handovers and consistent customer experience across regions.
- Led process improvement initiatives, optimizing tools, workflows, and support operations, reducing incident response time by 20% and increasing customer satisfaction by 15%.
- Identified network and capacity constraints in customer environments and partnered with sales teams to recommend solutions, contributing to increased upsell opportunities.

Technical Intern
Cisco Systems, Bengaluru

Jan 2017 - Jun 2017

- Gained hands-on technical support experience by collaborating closely with Technical Assistance Center (TAC) engineers to handle customer cases and troubleshoot complex network issues.
- Developed skills in diagnosing and resolving real-world problems involving routing protocols, network architecture, and WAN technologies.
- Collaborated with engineering and product teams to replicate customer environments, identify root causes, and validate fixes for software defects and platform issues.

SKILLS

- **Routing Protocols:** Static Routing, EIGRP, OSPF, BGP, IS-IS, Route Redistribution, VRF Route Leaking, DHCP
- **Networking Protocols:** GRE, FHRP (HSRP/VRRP/GLBP), NetFlow (FNF), Policy Based Routing (PBR), IP SLA, NAT/PAT, QoS, Multicast
- **WAN:** Terminal server, Cellular, PPP/PPPoE,
- **Hardware Platforms:** ASR1k, ISR4k, Cat8k, Cat9k, CSR1v, ISR1k
- **Programming:** Python, Regex
- **Other Tools:** EEM scripting, Wireshark, IxNetwork simulation tool, Cisco quicker, Salesforce Lightning, Traceroute, nslookup
- **Network Fundamentals:** Router Architecture (Control Plane, Data Plane), DNS, TCP/IP, HTTP/S,
- **Project Management:** Waterfall and Agile (Scrum)
- **Leadership & Team Management:** Team Leadership & Mentoring, Performance Management, Training Delivery, Escalation Management, Queue Management & Prioritization, Customer-Centric Support Approach, Process Optimization & Workflow Improvement, Cross-functional Collaboration (Engineering, Product, Customer Success)

CERTIFICATIONS

- 350-401 - Implementing and Operating Cisco Enterprise Network Core Technologies (CCNP ENCOR)
- 300-410 - Implementing Cisco Enterprise Advanced Routing and Services (CCNP ENARSI)
- 350-701 - Implementing and Operating Cisco Security Core Technologies (Security-SCOR)
- Cisco Certified Network Professional (CCNP)
- Cisco Certified Network Associate (CCNA)

EDUCATION

- | | |
|---|------------------|
| • M.TECH - Software Systems, BITS PILANI | 2021-2023 |
| • B.E. - Computer Science Engineering, Chitkara University | 2013-2017 |

ACHIEVEMENTS

- Enhanced **automation tools** for **crash analysis** and **bug identification** using **Python and Regex**, streamlining troubleshooting workflows.
- Authored **internal technical articles** to guide engineers in **concepts and troubleshooting methods**, improving team knowledge and support capabilities.
- Authored and published the article "Best Practices for Route-Map Configuration in Cisco IOS XE: Action and Sequence Number Importance" which can be leveraged by individuals and organizations across the globe:

<https://www.cisco.com/c/en/us/support/docs/ios-nx-os-software/ios-xe-17/223145-best-practices-for-route-map.html>
