

SHANKAR CHATTERJEE

Director / VP / Head of Product | Principal Consultant | Capital Markets & BFSI

Mumbai, India | +91 9773942657 | shankar82_c@yahoo.com | <https://www.linkedin.com/in/shankar-c-472a8319/>

EXECUTIVE PROFILE

Transformation-oriented Product and Consulting leader with 18+ years of BFSI and Capital Markets expertise, spanning front-to-back trade lifecycle, reference data, payments, collateral, and regulatory change. Track record of building and scaling product capabilities for global banks, exchanges, and FinTechs — from vision and roadmap through delivery and adoption. Combines deep domain fluency (order-to-settlement, derivatives, FX, prime brokerage, market structure migrations) with executive stakeholder management, Agile governance, and measurable commercial outcomes. Equally effective in strategic advisory, product leadership, and consulting engagement delivery.

- Backlog Ownership & Prioritization
- BRD / FSD / FRS Governance
- Agile / Scrum Delivery
- UAT Strategy & Release Mgmt
- OKR-Aligned Product Planning

Capital Markets Domain

- Order-to-Settlement Trade Lifecycle
- Derivatives (ETD & OTC) | FX
- Post-Trade, Collateral & Margin
- Clearing, Custody & Sec. Lending
- Reference & Market Data
- Payments | ISO 20022 | SWIFT

Consulting & Transformation

- Target Operating Model Design
- Current State Assessment & Gap Analysis
- Regulatory Impact Analysis
- Market Structure Migrations
- Stakeholder & C-Suite Engagement
- Pre-Sales & Product Demos

PROFESSIONAL EXPERIENCE

ViewTrade International IFSC | *Senior Product Manager / Functional Transformation Lead* Aug 2025 – Nov 2025

Spearheaded middle and back-office transformation for a licensed GIFT City brokerage, redesigning trade operations workflows and delivering a rule-based market-making engine with commercial impact.

- Redesigned middle/back-office workflows, improving operational efficiency by ~20% through automation of confirmations and account statements.
- Architected a rule-based market-making engine and defined the commercial strategy — projected to generate \$100K–\$300K in monthly recurring revenue.
- Automated client reporting (trade confirmations, account statements), reducing manual effort by 15–20% and improving accuracy.
- Partnered with Compliance and Operations to streamline reporting governance and materially reduce operational risk exposure.

Baton Systems (FinTech) | Product Lead – Collateral, FX & Payments

May 2024 – Jun 2025

Owned end-to-end product strategy for real-time domestic and cross-border payments and collateral workflows at a high-growth post-trade FinTech. Drove product-market fit, client delivery, and revenue enablement.

- Defined and owned the product roadmap and backlog for payments (domestic/cross-border) and collateral management capabilities; governed BRD/FSD/FRS and acceptance criteria.
- Delivered a Management Dashboard & Analytics platform for Tier-1 institutional clients, achieving 40–60% improvement in operational efficiency and KPI transparency.
- Conducted competitive and market analysis to identify product gaps and revenue opportunities aligned to organizational OKRs.
- Enabled pre-sales pipeline by leading product demonstrations and client workshops, translating complex domain workflows into compelling business value propositions.
- Mentored product managers and analysts; improved delivery predictability and cross-functional stakeholder alignment.

Capgemini (Client: UBS) | Business Analyst Lead Manager / Consulting Lead – Capital Markets Sep 2021 – May 2024

Acted as consulting Lead BA and de-facto Product Owner for UBS's global reference data and derivatives platform, managing regulatory migrations, delivery governance, and MD-level stakeholder relationships.

- Owned product backlog prioritization and sprint planning across derivatives, FX, and indices reference data — delivering across multiple global releases on time.
- Led three major market structure migrations: Eurex Next Gen, Nasdaq Nordic platform change, and SGX-to-NSE GIFT City — ensuring business readiness and global release execution.
- Implemented Agile delivery governance using Jira/Confluence, improving release velocity by ~30% and delivering full audit-ready traceability.
- Served as SPOC to Managing Director–level stakeholders; drove cross-functional decisions, managed program risks, and aligned globally dispersed teams.
- Conducted regulatory impact analysis and translated regulatory change into actionable product requirements and delivery plans.

63 Moons Technologies | Business Analyst Manager – Trading & Post-Trade Products Sep 2018 – Sep 2021

Led consulting, product discovery, and delivery for capital markets software platforms deployed at banks and financial institutions across India.

- Authored BRD/FRS documentation and translated regulatory mandates (clearing interoperability, commodity risk) into scalable product features.
- Built securities lending and collateral modules for Tier-1 institutional clients including Standard Chartered and HDFC; supported pre-sales demonstrations.
- Partnered with engineering teams end-to-end across SDLC, functional testing, UAT, and production rollout.
- Led regulatory change initiatives including CCP interoperability and commodity segment risk management changes, ensuring platform compliance and market readiness.

Nomura | Deutsche Bank | State Street | Wipro BPO | Investment Banking & Global Markets

Operations Aug 2006 – Jul 2016

Delivered front-to-back post-trade operations across Equities, Fixed Income, FX, Derivatives, Repos, Securities Lending, and Custody for global financial institutions.

- Managed and led teams supporting Trade & Settlement activities, Custody Operations, Reconciliation (nostro/depository), Fails management, Cash Management and operational reporting across global markets desks for Equities, Fixed Income, Derivatives and Mutual Funds.
- Oversaw risk management processes and compliance with key performance and risk indicators.
- Built Prime Brokerage and Emerging Markets settlements capability for Nomura India; managed BAU delivery, controls, and client satisfaction.

- Identified and implemented process improvements and cost-saving measures, resulting in documented savings of **\$100K**. Drove automation and process re-engineering, saving ~6 hours daily effort in **FX/SWIFT** reconciliation workflows.
- Key contributor to the successful implementation of the **T2S project** for European markets for Nomura India
- Helped in migration and setting up of Custody operations for StateStreet Ireland to its Mumbai office.
