SENIOR BUSINESS ANALYST | PMP

Payment Transformation | ISO 20022 Migration | CBPR+ | SWIFT | SEPA

A Business Analyst professional with over 13 years of experience in payments solutions and financial systems enhancement, expert in Agile methodologies and stakeholder management. Key achievements include managing projects worth over \$1 million annually with early completion and spearheading the delivery ISO 20022 migration for 25 markets. Seeking a Senior Product Owner– Payments and Digital Banking position, where I bring my expertise in payment transformation and program execution to support your mission of delivering complex, mission-critical payment initiatives across digital banking platforms.

EXPERIENCE

Standard Chartered Global Business Services, Bengaluru

June 2017 - June 2026

Senior Business Analyst

- Spearheaded the global ISO 20022 migration across 25 markets under the CBPR+ initiative, supporting message transformation, business readiness, and delivery governance while achieving 99.9% straight-through processing.
- Drove end-to-end business analysis and product delivery for cross-border payments initiatives, translating business requirements into scalable solutions across payment processing and regulatory landscapes.
- Architected cross-border P2P payment rails using Visa Direct and Mastercard Send, reducing corridor transaction cost from \$50 to \$1 through International ACH enablement across 40+ global corridors.
- Directed the Malaysia Real-Time Retail Payments Platform product stream, delivering Direct Credit, P2P, and Request-to-Pay(RTP) capabilities through phased MVP releases over a three-year transformation roadmap.
- Managed end-to-end SDLC, STLC, and defect lifecycle activities for payment product implementations, ensuring alignment between business requirements, testing outcomes, and production readiness.
- Applied strong expertise in SWIFT architecture and ISO 20022 standards to support message mapping, payment flow analysis, and design decisions across cross-border payment programs.
- Drove process transformation and automation initiatives that improved payment efficiency, strengthened controls, and enhanced client satisfaction by 25%.
- Supported risk and governance frameworks across delivery initiatives, contributing to a 20% reduction in project delays and budget overruns through structured issue management and control oversight.
- Partnered with 20+ stakeholders across business, operations, technology, compliance, and product to deliver 8+ ISO 20022 and payment transformation initiatives, aligning priorities and resolving key delivery challenges.
- Contributed to solution design, release planning, and continuous improvement for payment products, supporting 15+ releases tied to ISO 20022 migration, message standardization, and process enhancements.
- Served as a payments SME for transformation programs, advising on SWIFT / cross-border payment flows, ISO 20022 impacts, and target-state process changes across 25+ markets / corridors across SEPA, CHAPS.
- Supported business case development for 5+ transformation initiatives, assessing problem statements, solution options, benefits, costs, and downstream implementation impacts for payment modernization programs.
- Advised senior stakeholders and leadership teams on solution options, business impacts, risks, and strategic alignment for high-impact payment and ISO migration programs.
- Partnered with cross-functional teams to align delivery priorities with business strategy, regulatory expectations, and client needs, supporting 8+ migration and payment change deliveries.
- Led complex analysis across multiple workstreams to evaluate alternatives, define business requirements, and deliver solutions supporting enterprise-scale ISO 20022 readiness and payment transformation.

Senior Quality Analyst

- Enhanced testing efficiency by 40% by creating 50 test cases from functional specifications and requirements.
- Conducted extensive manual and automated testing, resulting in a marked increase in software accuracy and customer satisfaction.
- Engaged regularly with cross-functional teams to address potential product issues early, reducing defects post-launch by 20%.
- Communicated with clients to gather feedback and align QA goals with client expectations, enhancing the service delivery model.

KEY ACHIEVEMENTS

Standard Chartered GBS/CBPR+ Initiative, Bengaluru
