PROFESSIONAL EXPERIENCE

Power Platform Developer

Cybage Software

August 2024 -Present

Project Name CSU-ENT-PowerAppsAutomation

- Design and develop custom solutions using Microsoft Power Platform tools, including Power Apps & Power Automate, to address diverse business requirements and challenges.
- Developed custom business apps including Canvas Apps, SharePoint Form Apps to meet specific organizational requirements.
- Created custom connectors and solutions to extend and customize Microsoft applications and services.
- Collaborated with stakeholders and project team members to design and implement enterprise Microsoft Dynamics solutions, ensuring high quality and reliability.

Project Name : HR & Admin Applications

- Designed and developed a centralized licence allocation and management application for HR & Admin teams using Canvas Apps integrated with Dataverse as the backend data store.
- Automated licence request approvals and allocation workflows with Power Automate, enabling real-time status updates, email notifications, and audit trail generation.
- Reduced licence processing time from 3 days to 1 day by eliminating manual approvals and paper-based tracking.

Associate Software Engineer

Netlink Software

November 2022-July 2024

- Developed Canvas Apps and SharePoint-integrated apps to automate internal workflows such as leave requests, asset allocation, and employee onboarding, reducing manual processing time by 40%
- Integrated Power Apps with Dataverse and SQL Server for centralized data storage, ensuring consistency and reliability across systems.

Project: Employee Onboarding Automation

- Developed a fully automated onboarding solution where new employee data entry in Power Apps triggered approval workflows in Power Automate, automatically creating user accounts, assigning assets, and updating HR databases.
- Integrated Power BI for onboarding status tracking and SLA reporting. Reduced onboarding completion time from 5 days to 2 days and eliminated manual follow-ups.
