PROFESSIONAL EXPERIENCE

Synechron Technologies – Lead Business Analyst, Product Owner (Proxy) Oct 2024 – Dec 2025

Omnia – Data Lake to Cloud Migration

Product Ownership and Leadership

- Acted as Product Owner proxy, owning and prioritizing the backlog for payments and regulatory data migration.
- Took day-to-day prioritization decisions, balancing regulatory deadlines, technical feasibility, and delivery risk.
- Led backlog refinement, sprint planning, and sprint reviews as the primary business representative.
- Reviewed, validated, and formally accepted stories based on business rules, data accuracy, and compliance criteria.
- Provided release sign-off and supported production deployments.

Strategy, Roadmap and Impact

- Contributed to quarterly roadmap planning aligned to regulatory milestones and cloud migration phases.
- Delivered multiple regulatory and payments datasets with zero critical audit observations.
- Reduced rework and reporting defects by approximately 25-30% through improved backlog clarity and acceptance criteria.
- Defined and prioritized user stories for ISO 20022 MT to MX datasets, settlement statuses, and reporting logic; partnered with engineering and architecture teams to validate solution design.

Societe Generale – Senior Business Analyst, Product Owner (Proxy) Jul 2023 – Oct 2024

CBR Asia – Regulatory Reporting

- Owned the regulatory reporting backlog, prioritizing enhancements and fixes based on regulatory impact and audit findings.
- Acted as single point of contact for regulators, auditors, business stakeholders, and delivery teams.
- Delivered 15+ regulatory reports across multiple releases with zero critical audit issues; accepted deliverables after validating data lineage, accuracy, and compliance readiness.
- Improved reporting accuracy and audit readiness through structured gap analysis; drove prioritization of remediation items based on regulatory trends.

Wipro – Senior Business Analyst May 2022 – Jul 2023

Lloyds Bank – MI2B

- Supported Product Owner activities by gathering requirements, defining user stories, and supporting backlog prioritization.
- Applied GPP domain expertise to validate payment flows, settlement logic, and ISO 20022 compliance.
- Designed and validated BI data models supporting legacy-to-modern platform migration; improved delivery timelines through UAT and requirement clarification.

Accenture, Deutsche Bank, Wells Fargo, Firstsource – Business Analyst 2015 – 2022

- Built foundation in payments, investigations, regulatory compliance, and Agile delivery across SWIFT MT/MX, ISO 20022, cross-border payments, settlement, and exception handling.
- Supported UAT cycles, defect triage, SQL-based data validation, and production releases across global bank programs.
