LinkedIn: <https://www.linkedin.com/in/shrawani-singh-aiml/>

Summary:

- Senior Data Scientist with 7+ years of experience across Fintech, Banking, leading projects that apply generative AI (GPT, LLMs, RAG) for tasks like text analysis, conversational AI, and anomaly detection model.
- Proficient in data science modelling, machine learning, and advanced analytics, with deep experience in Python, AWS Kinesis, Sagemaker, and Transformer models for Chatbot, Anomalies detection, fraud detection and risk analysis.
- Proven track record in implementing custom embeddings, underwriting models, and scorecard development for improving financial products and strategies.
- Extensive experience working as Lead/Senior Data scientist in artificial intelligence & machine learning based solution design, requirements analysis, estimation, development and deployment for global leading banking, fintech, agriculture, cosmetics, data storage and data integrations clients.
- In-depth hands-on experience in deploying and customizing machine learning models using Python, transformer-based models, Fast API, FLASK, Docker for integrating ML Models into different environments, ensuring robust and scalable AI systems.

Role & Responsibilities: Tech Lead/Senior Data Scientist

- Work with business and developers in the development of solutions, targeted at complex projects.
- Applied advanced statistics and core experimental design (A/B testing, hypothesis testing, regression) on large-scale datasets to drive product strategy and insights.
- Analyse the complex business needs of clients and convert them to functional and technical specifications.
- Ensure best practices are followed and support development teams with technical expertise.
- Agile best practices, including Sprint backlog establishment and prioritization, technical design and estimates for project enhancement.
- Conduct design and code reviews, perform model hyperparameter tuning, refactor ML model, evaluate and adopt new tools, manage vendor collaborations, and present model status and insights to business stakeholders.
- Lead and provide training and best practices advice to both new and experienced Data Scientists and ML Engineers.

Domain Skills & Technologies:

- Technologies/Languages: Python, Pandas, Numpy, Scikit, XGBoost, LightGBM, TensorFlow, PyTorch, Spacy, OpenCV
- Machine Learning: NLP, Embeddings, Information Value, Recommendation Engines, Event Rate, Ensemble, hypertuning
- LLMs and GenAI: RAG, GPT-based models, Faiss, Llama-index, Transformers, LoRA fine tuning LLMs, encoder-decoder, vLLM, Deepspeed, text similarity, TensorRT, Keras, XGBoost, LightGBM, and hyperparameter tuning
- Tools/techniques: MLFlow, Kubernetes, Docker, A/B testing, Hypothesis Testing, AWS, Azure, Jupyter Notebook, Streamlit,

Certifications:

- Certified with PGP/AI ML from Texas University
- Certified on ML Projects
- Certified on Data analytics projects
- AWS certified Cloud Practitioner
- Certified in Cloud computing

Employment History:

London Stock Exchange	Dec 2022 – Present	Tech Lead / Senior Data Scientist
Persistent Systems	Jan 2021 – Dec 2022	Senior Data Scientist
L&T Infotech	July 2017 – Jan 2021	Data Scientist

London Stock Exchange (Platform)

LSEG, Bengaluru

Dec 2022- Present

Role: Technical Lead/Senior Data Scientist

Responsibilities:

Evaluated technical and solution feasibility of system changes, overseeing model development, algorithm design, data modeling, training, and implementation.

- Developed and implemented advanced statistical models and machine learning algorithms to optimize trading data for portfolio management.
- Collaborated with quantitative analysts and stakeholders to identify data-driven opportunities and enhance Eikon product performance on the Deming platform.
- Designed and deployed anomaly detection algorithms with automated workflows, improving efficiency and accuracy of data quality monitoring.
- Applied product analysis and A/B testing to compare anomaly detection strategies, reducing false positives and strengthening system reliability.
- Reduced false positives by 20% and improved anomaly detection speed by 30%.

London Stock Exchange (LLM ChatBot)

LSEG, Bengaluru

Jan 2023- Jan 2024

Role: Technical Lead/ Senior Data Scientist

Responsibilities:

Designed and developed AI-driven solutions for customer support through chatbot, focusing on NLP and model deployment. Developed a holistic chatbot leveraging Llama 2 Quantized Version for NLP.

- Integrated Faiss as a vector database for efficient data handling and utilized Chainlit for the chatbot's user interface
- Trained the chatbot on client-specific resolutions for enhanced customer support and engagement regarding product inquiries which helped in increasing query resolution accuracy by 35% and reduced average response time by 40%.

Persistent Systems (Admissions)

Persistent Systems, Bengaluru.

Jan 2021- Dec 2022

Role: Senior Data Scientist /Lead SWE

Responsibilities:

Led risk consulting and growth strategies for consumer portfolios and SMEs, including reject inferencing analysis, fraud detection (XGBOOST, Random Forest), and microfinance scorecard development for top banks.

- Developed behaviour and solvent scorecards for subprime markets, applying WOE and IV techniques to predict customer behaviour and identify fraud.
- Built lead prioritization systems and real-time recommendation engines for upsell opportunities, enhancing customer targeting and sales effectiveness. Improved fraud detection accuracy by ~18%, reducing financial risk exposure for client banks.

L&T Infotech (Data & Analytics)

L&T Infotech, Mumbai

Aug 2017- Jan 2021

Role: Data Scientist

Responsibilities: Analyzed consumer behavior and sales data in the cosmetics domain, converting business needs into functional and technical specifications.

- Built customer segmentation and campaign response scorecards to enhance targeting and maximize marketing ROI.
- Developed lead prioritization models to identify high-value customers for upsell and cross-sell opportunities.
- Conducted product analysis and A/B testing of marketing strategies, uncovering high-performing campaigns that boosted engagement. Boosted campaign engagement by 15% and improved conversion rates by 10%.

Education:

Bachelor of Computer Science & Engineering (2013 – 2017), RGTU
