

SHWETA SINGH

PMP® | PMI-ACP® | Lean Six Sigma Black Belt
Hyderabad, India • +917032770695 • shwetas762@gmail.com

PROFESSIONAL SUMMARY

Senior Banking and Operations Professional with 12+ years of progressive experience driving process excellence, continuous improvement, and large-scale transformation across corporate banking and financial services environments. PMP® and PMI-ACP® certified Lean Six Sigma Black Belt with a proven record of championing re-engineering initiatives, mentoring multi-level LSS programmes, and embedding a culture of operational efficiency across global teams. Skilled in facilitating structured training, building compelling presentations, influencing stakeholders at all levels, and delivering measurable productivity gains through data-driven process discovery and automation-led innovation.

CORE COMPETENCIES

✓ Process Engineering & Re-Engineering	✓ Lean Six Sigma (Black Belt)	✓ Continuous Improvement (CI) Culture
✓ Black Belt Training	✓ Process & Data Discovery	✓ Statistical Tools & Analysis
✓ Corporate Banking Operations	✓ Consulting & Change Management	✓ Stakeholder Engagement & Influence
✓ Presentation Building & Delivery	✓ Automation & AI-Driven Innovation	✓ Community & Programme Mobilisation
✓ Project & Programme Management	✓ KPI Monitoring & Reporting	✓ Agile & Waterfall Methodologies

PROFESSIONAL EXPERIENCE

Senior Manager – Vendor Payments & Process Engineering | ICICI Bank

Hyderabad, India • February 2021 – Present

- Championed business process re-engineering (BPR) initiatives across the corporate banking vendor payments ecosystem, applying Six Sigma Black Belt methodologies (DMAIC, Value Stream Mapping, Root Cause Analysis) to eliminate waste and drive end-to-end workflow optimisation across a team of 25+ professionals.
- Led mobilisation of process engineering improvement programmes across multiple operational units — including defining scope, preparing project charters, scheduling training sessions, and coordinating communications with stakeholders at all levels, mirroring Black Belt / Green Belt programme management practices.
- Designed and delivered structured process engineering training and capability-building sessions for operations staff and business analysts on Six Sigma Black Belt tools including SIPOC, Fishbone diagrams, control charts, and statistical process control — fostering a continuous improvement culture across corporate banking functions.
- Drove 5+ LSS-aligned productivity and efficiency improvement projects from ideation to closure — including a scan-based invoice processing automation, vendor payment analysis re-engineering, and asset register bulk upload automation — generating ₹111.93 Cr in savings and reducing payment TAT from 7 days to 2 days.
- Championed Process Discovery and Data Discovery initiatives using Six Sigma statistical tools to analyse high-volume corporate banking transaction data, identify process bottlenecks, and build data-backed business cases for automation and AI-led innovation in payment operations.

- Explored and implemented innovative working methods through automation — including an end-to-end purchase-order-based payment automation that eliminated 80% of manual intervention and reduced processing errors by 80% — aligning with organisation-wide digital transformation and AI adoption goals.
- Developed and maintained process engineering-related materials including SOPs, re-engineering playbooks, training decks, newsletters, and executive reporting dashboards — supporting communication standardisation and knowledge management across the corporate banking division.
- Assisted in establishing standards for internal communications and performance reporting, enabling consistent tracking of process improvement outcomes and productivity metrics for senior leadership.
- Organised and facilitated cross-functional process community engagement events, promoting process excellence culture and knowledge-sharing across operations, IT, procurement, and compliance stakeholders.
- Conducted vendor audits ensuring full adherence to RBI guidelines, SOX compliance standards, and internal audit controls; managed UAT coordination and transition management for banking transformation initiatives.
- Identified IT scrap revenue opportunities through structured process analysis, resulting in incremental annual gains of ₹2 Cr; implemented fraud-detection controls generating ₹2.5 Cr in annual savings through Six Sigma-driven duplicate payment identification.

Manager – Branch Banking & Process Improvement | ICICI Bank

Udaipur, India • November 2017 – January 2021

- Applied Lean process engineering principles and business process re-engineering frameworks to optimise branch banking operations, streamline customer onboarding workflows, and improve sales-process efficiency across multi-function teams in a corporate banking environment.
- Mentored branch staff and junior managers on continuous improvement methodologies and Six Sigma Green Belt tools including process mapping, 5S, and Kaizen — driving consistent application of process excellence practices across daily operations.
- Built and delivered high-impact presentations to regional leadership and key stakeholders on branch performance metrics, process improvement outcomes, and strategic initiatives — demonstrating strong presentation-building and delivery capabilities.
- Led structured work-plan development for customer-facing improvement programmes, managing full stakeholder engagement cycles and influencing cross-functional buy-in for process change initiatives.
- Monitored KPIs and prepared detailed management reports on operational performance, identifying patterns and process inefficiencies using data-driven analysis aligned with Six Sigma Black Belt statistical thinking.
- Collaborated with marketing and product teams to assess and improve customer engagement processes, contributing to campaign optimisation and sales process re-engineering in the corporate banking segment.

Deputy Manager – AML & Compliance Operations | ICICI Bank

Hyderabad, India • May 2014 – October 2017

- Applied business process re-engineering and Six Sigma Black Belt analytical tools to restructure AML transaction monitoring workflows, reducing investigation cycle time and improving Suspicious Transaction Report (STR) accuracy.
- Conducted process discovery exercises to map end-to-end AML compliance workflows across corporate banking client segments, identifying control gaps and implementing process controls aligned with RBI and FATF regulatory requirements.
- Delivered training sessions for AML operations team members on updated process standards, compliance frameworks, and data-discovery methodologies — building team capability in Six Sigma-aligned process thinking.
- Prepared detailed STRs and Grounds of Suspicion reports; maintained all compliance records and submitted periodic reports to the Head Office — demonstrating strong documentation, communication, and reporting standards.

KEY PROCESS ENGINEERING PROJECTS & INITIATIVES

- **BPR Project:** Vendor Payment Analysis Process Automation
- Applied DMAIC methodology to re-engineer vendor payment analysis workflows; eliminated manual touchpoints, implemented automated control checks, and built real-time reporting dashboards. Reduced error rates by 80% and delivered measurable compliance improvement across corporate banking vendor operations.
- **BPR Project:** GST Implementation & UAT Management

- Led end-to-end process re-engineering for GST transition — redesigned tax-computation workflows using Six Sigma process mapping tools, managed UAT, trained 25+ stakeholders, and ensured zero-disruption cutover for corporate banking payment operations.
- **Process Engineering:** Invoice Processing Automation (Scan-Based)
- Deployed Six Sigma Value Stream Mapping to identify waste in manual invoice handling; implemented scan-based automation reducing manual dependency and accelerating processing TAT — a model replicable across regional corporate banking operations.
- **Process Innovation:** Go Green Utility Payment Automation
- Championed a paperless digital transformation initiative using Lean principles, eliminating manual utility payment processing and contributing to the bank's automation and AI innovation agenda.

CERTIFICATIONS

Lean Six Sigma Black Belt | Lean Six Sigma Green Belt | PMP® – Project Management Professional
PMI Agile Certified Practitioner (PMI-ACP®) | Jira Certified Professional | Microsoft Azure Fundamentals

TECHNICAL SKILLS

Tools & Platforms: SAP | Advanced Excel | SQL (Basic) | Jira | Finacle | CRM | Omni Flow | I-Core | Azure Fundamentals

EDUCATION

MBA in Banking & Finance – GlobalNxt University, Malaysia | 2017
PGDB – Post Graduate Diploma in Banking – Manipal University, Bangalore | 2014
B.Com (Hons.) in Accounts & Finance – Calcutta University | 2011
