KEY SKILLS

- Java
- Spring Boot
- Microservices
- Event-driven Architecture
- JUnit
- SOLID & Design Patterns
- Kafka
- RDBMS (PostgreSQL, Oracle)
- MongoDB
- Docker

KEY ACHIEVEMENTS

- Spearheaded the design and development of the notification service - from design to production to integrating 40+ banks presently live.
- Atleast 10X improvement in the performance of Notification delivery using Asynchronous programming.
- Designed and implemented data migration utilities to migrate and tokenize 50 million+ cards data in the production environment.

OPERATING SYSTEMS

- Linux
- Mac OS
- Windows

PROFILE

Lead Software Engineer/Team Lead (expertise - Java) with **8.4 years** of experience working in various stages of software development life cycle like requirement analysis, effort estimation, proof of concept, design, development, and maintenance with proven skills in implementing creative solutions to customer problems.

Adept at architecting scalable and reusable solutions, leading development and QA teams, and as a SPOC responsible for collaborating with stakeholders at all levels to ensure seamless communication and timely project deliveries.

WORK EXPERIENCE

TechBulls SoftTech Pvt. Ltd

Apr'12 2022 - Present

Team Lead

- Working as the Lead Developer/Team Lead on a Loan Risk Management System for India's largest public sector bank, used by 500+ banking officials to assess and manage corporate borrower risks. Implemented workflow automation, detailed MIS analytics, and risk-grade assessments to minimize loan defaults.
- Led a team of 6 members for a joint project between India's largest payment gateway and India's 2nd largest public sector bank to design and develop a contact fetch service with intelligent card blocking-unblocking (hard/soft), an admin dashboard with MFA & IP-based security, and an advanced MIS reporting module for banking teams. Successfully led a 30M+ card data migration within 12 hours.
- Designed and implemented high-performance utilities for card tokenisation to tokenise 50 million+ mandates on 30 million+ cards in production by integrating APIs from networks like VISA, Mastercard, AMEX and Diners.

Tech stack: Java, Spring Boot, Microservices with Event-driven Architecture, PostgreSQL, Oracle 19c, Kafka, Docker, AWS, Git

TechBulls SoftTech Pvt. Ltd

July 2019 - April 2022

Senior Software Developer

- As a module lead - Architected and implemented a high-volume notification framework for India's largest payment gateway, integrating with 40+ banks (HDFC, ICICI, SBI, etc.) using Kafka, Spring Boot, and Async HTTP, handling 50M+ notifications/month.
- Worked as the lead developer of life and health insurance verticals for a leading Indian insurance aggregator - Turtlemint. Successfully led developers from 2 teams to ensure timely quality deliveries to client.

Tech stack: Java, Spring Boot, Microservices with Event-driven Architecture, PostgreSQL, Oracle 19c, MongoDB, Kafka, Docker, AWS, Git, React

TechBulls SoftTech Pvt. Ltd

June 2017 - June 2019

Software Developer

- Built a generic insurer integration framework, reducing onboarding time and development efforts by atleast 60%.
- Lead and delivered end-to-end insurance integrations with top insurers - HDFC Ergo, ICICI Lombard, Max Bupa, HDFC Life, ICICI Prudential, Bajaj Allianz, Universal Sampo, and more. Used generic designs in the implementations, thus avoiding the use of any insurer-specific code.

Tech stack: Java, Play Framework, Spring Boot, MongoDB, Docker, Git, Angular

TechBulls SoftTech Pvt. Ltd

Feb 2017 - June 2017

Intern Software Developer

- Worked as a full-stack developer on an expense reporting and data analytics application as a full-stack developer, building frontend (AngularJS) and backend APIs (Spring MVC).

Tech stack: Java, Play Framework, Spring MVC, MySQL, MongoDB, Docker, Git, AngularJS
