| ◆ Trade Lifecycle Management (Enrichment, Confirmation, Settlement) | ◆ Business Analysis & Requirements Elicitation | ◆ User Story Creation & Backlog Grooming |
| ◆ Corporate Actions Processing | ◆ BRD/FRD Authoring | ◆ Agile (Scrum) & Waterfall Methodologies |
| ◆ Benchmark & Index Reference Data Management | ◆ Stakeholder Management | ◆ Software Development Life Cycle (SDLC) |
| ◆ SQL Data Mapping & Validation | ◆ Process Mapping (As-Is/To-Be) | ◆ Compliance & Regulatory Reporting |
| | ◆ Gap Analysis | ◆ Data Analysis & Validation |
| | ◆ Change Management | |

PROFESSIONAL EXPERIENCE

Business Process Lead | TCS, Pune

Apr 2021 – Present

Business Analyst, Trade Lifecycle & Middle Office | Capital Markets | GoldenSource | Custody | Enrichment
Clients - Goldman Sachs Group, Citi Bank

- ◆ Led end-to-end delivery of 3 middle-office transformation initiatives spanning version upgrades, data migration, and process automation, coordinating 10-20+ stakeholders across **Agile and Waterfall** delivery models.
- ◆ Operated as **functional Business Analyst** bridging business requirements with IT solutions, re-engineering transaction workflows across **enrichment, confirmation, settlement, and reconciliation** for Equities, Derivatives, Fixed Income, and FX to lift operational efficiency.
- ◆ Managed reference data within the **GoldenSource** EDM platform, supporting security master, **corporate actions**, and benchmark/index data accuracy for downstream valuation, risk, and reconciliation processes.
- ◆ Performed **requirements elicitation techniques**, gap analysis, and process mapping (As-Is/To-Be) to translate business needs into BRD/FRDs and functional specifications for delivery teams with **design solution**.
- ◆ Adopted AI tooling (**Friday.AI, Microsoft Copilot**) to accelerate epic-to-user-story breakdown and automate documentation; via Jira and Confluence to sustain delivery across workstreams.
- ◆ Directed data validation and reconciliation in **Microsoft SQL Server** (SQL queries) during system migration, achieving 98% data accuracy and minimizing post-migration defect leakage.
- ◆ Facilitated **PI planning sessions and Agile ceremonies**, backlog grooming, and sprint readiness with 100% Definition of Ready.

- Chaired recurring stakeholder forums with front-office, risk, custody, and IT teams (10-20+ participants) to drive requirement sign-off, reducing rework from late-stage changes.
- Raised sprint readiness to **100% Definition of Ready** by standardizing **user story** templates and **acceptance criteria**, reducing in-sprint clarification cycles and supporting UAT planning.
- Orchestrated UAT execution and **defect management** cycles, ensuring 90% of high-priority bugs were resolved prior to production launch.

Financial Analyst | Eclerx, Pune

Mar 2019 – Mar 2021

Trade Confirmation & Documentation | Middle office

- Managed trade confirmations and ISDA bilateral documentation across OTC equity, FX, and options products, ensuring contractual accuracy across high-volume daily trade flows.
- Performed gap analysis and SQL-based data checks on documentation discrepancies, resolving issues with traders, middle office, and legal teams to prevent settlement delays; produced MIS and control reports for management visibility into process health.
- Partnered with collateral teams on margining and documentation workflows, supporting timely collateral calls and reducing documentation-driven settlement friction.
- Initiated process re-engineering that improved trade confirmation turnaround time and reduced client query volume by an estimated 20-30%, easing pressure on downstream operations teams.

Financial Advisor | Karvy Stock Broking, Hyderabad

Mar 2017 – Mar 2018

Financial Advisor, Client Analytics & Portfolio Servicing | Capital Markets

- Analyzed customer trading behavior using advanced Excel modeling to surface patterns and trends, informing targeted sales outreach and client retention strategy.
- Partnered with the Sales Team and Portfolio Manager to monitor trade service performance and Supported **wealth management journeys and RM functionalities** in digital environments.
