Network Engineer | Network Automation | Cloud Networking (AWS)

PROFESSIONAL SUMMARY

Detail-oriented Network Engineer with 4 years of hands-on experience across routing, switching, wireless, firewall, and automation in large-scale enterprise environments. Skilled at debugging complex network issues across OSI Layers, collaborating with engineering teams, and driving operational excellence. As part of the Juniper-on-Juniper (JonJ) program, I manage and optimize Juniper's internal network infrastructure, ensuring high reliability and security across global sites rather than external customer environments. Experienced with Juniper, FireMon, and AWS networking, with practical use of Python and Ansible for automating deployments and troubleshooting. Passionate about building scalable, automated, and resilient network systems.

KEY SKILLS

Routing & Switching

- Advanced knowledge of routing protocols: BGP, OSPF, IS-IS
 - Layer 2/Layer 3 technologies: VLANs, STP/RSTP, LACP, VRRP
 - Understanding of SD-WAN fundamentals and architectures
 - Experience with path selection, and convergence troubleshooting
-

Cloud Networking (AWS)

- Hands-on experience with AWS VPC, Subnets, Route Tables, Internet/NAT Gateways
 - Knowledge of AWS Transit Gateway and hybrid connectivity models
 - Security constructs: Security Groups, Network ACLs
 - Familiarity with VPC peering, routing design, and traffic flow analysis
-

Networking Protocols & Technologies

- Strong foundation in TCP/IP stack, Ethernet, ARP, DNS, DHCP
- Deep understanding of packet forwarding, MTU, and fragmentation
- Experience with IPsec VPN (site-to-site concepts, encryption basics)
- Knowledge of IP tunneling (GRE, encapsulation, overlay networks)

Network Automation & Programming

- Proficient in Python for network automation, scripting, and troubleshooting
- Experience working with REST APIs for network/service integration
- Familiar with data formats: JSON, XML
- Basic exposure to automation workflows and infrastructure-as-code concepts

Monitoring, Troubleshooting & Operations

- Experience in network monitoring, telemetry, and alerting systems
- Strong troubleshooting skills using logs, packet analysis, and debugging tools
- Knowledge of incident management, root cause analysis (RCA)
- Understanding of change management and production network operations

Collaboration & Problem Solving

- Effective collaboration with cross-functional teams (network, cloud, security, application)
- Strong analytical skills to debug complex, ambiguous network issues
- Ability to design scalable and reliable network solutions
- Clear and concise technical communication and documentation skills

PROFESSIONAL EXPERIENCE

Juniper Networks — Network Engineer II

Bangalore, India | Aug 2022 – Present

- Provided full-stack network support for enterprise environments, owning customer tickets end-to-end across routing, switching, and security domains.
- Deployed and maintained VLAN tagging and segmentation in on-prem and Apstra-managed data center fabrics to improve traffic efficiency.
- Configured and optimized routing protocols (BGP, OSPF, MPLS) and firewall policies via Juniper Security Director Cloud.
- Leveraged FireMon for proactive firewall policy optimization, improving compliance and reducing rule redundancy.
- Troubleshoot complex network issues across layers 1–4, coordinating with software and hardware teams for resolution.
- Used Ansible and Python for configuration management and repetitive task automation.

- Assisted in CVE-based vulnerability remediation and implemented network security hardening measures.

Key Achievements:

- Deliver Excellence – Obsess About Quality (Feb 2025)
 - Everyday Hero Award (Sep 2024)
 - Deliver Excellence – Act with Urgency (Feb 2024) – For zero-day vulnerability remediation
-

Juniper Networks — DevOps Intern / Graduate Trainee

Bangalore, India | Feb 2022 – Jul 2022

- Automated device configuration using Ansible playbooks and contributed to UI improvements for operational visibility.
 - Assisted in Junos device upgrades, version staging, and post-validation checks.
 - Maintained inventory and supported configuration cleanup during infrastructure decommissions.
-

EDUCATION

Bachelor of Engineering – Information Science & Technology
NMAM Institute of Technology, Karkala Udipi, Karnataka (2018–2022)

CERTIFICATIONS

- JNCIS–ENT | Juniper Networks
- JNCIA–Junos | Juniper Networks
- JNCIA–Mist AI | Juniper Networks
- JNCIA–DevOps | Juniper Networks
- Zscaler Zero Trust Certified Associate (ZTCA)
