ABOUT ME

Software Developer with 3+ years of experience in **Angular (v10+), ReactJS, JavaScript, TypeScript, HTML, CSS, Java** and **RESTful APIs**, specializing in building scalable and high-performance web applications. Skilled in FullStack development, performance optimization, and Agile collaboration, with proven client-facing experience. Worked closely with testers, UI/UX designers, and product managers to deliver responsive, scalable, and user-friendly applications.

SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SCSS
- Frontend Frameworks & Libraries:** ReactJS, Angular (v10+), RxJS, NgRx, JSX, Responsive & Accessible UI (WCAG), Reusable Component Development, Material UI, Bootstrap
- Frontend Development:** Responsive UI, Cross-browser compatibility, Component optimization.
- API Development & Integration:** REST APIs, Microservices collaboration, JSON, JWT, OAuth2, RBAC
- Testing & Quality Assurance:** Unit Testing, TDD, BDD, Manual Testing, React Testing Library
- Build & Tools:** NPM, CLI, Chrome DevTools, Angular DevTools, Postman, VS Code
- Backend & Databases:** RESTful APIs, JSON, PostgreSQL, Oracle
- Cloud & DevOps:** Oracle WebLogic Server, CI/CD pipelines (Jenkins, GitHub Actions)
- Software Engineering Practices:** OOP, Design Patterns, Agile/Scrum methodologies
- Documentation & Collaboration:** Technical documentation, Sprint planning, Code reviews, Knowledge transfer, Client communication

WORK EXPERIENCE

Rumango Software and Consulting Services Pvt Ltd. – Associate Software Developer

2021(Aug) – 2024(Sept)

Software Development:

- Developed and maintained scalable and responsive web applications using Angular and React.
- Applied Object-Oriented Programming (OOP) concepts and design patterns to write clean, structured, and reusable code.
- Ensured all applications followed modular architecture for easy maintenance and future scalability.
- Collaborated with backend teams to align front-end design with APIs and server-side logic.

UI/UX Optimization

- Improved application performance, speed, and usability by optimizing code and reusing components.
- Worked closely with UI/UX designers to ensure consistent branding and a user-friendly interface.
- Fixed cross-browser issues and implemented responsive layouts for mobile, tablet, and desktop devices.
- Participated in regular code reviews to maintain quality and consistency across the project.

API Integration & Security

- Integrated REST APIs and microservices into Angular and React applications to enable smooth data flow between frontend and backend systems.
- Implemented secure authentication and authorization using JWT, OAuth2, and Role-Based Access Control (RBAC).
- Followed best security practices to protect sensitive user and client data during API communication.
- Ensured all integrations were thoroughly tested and well-documented for easy maintenance.

Agile Collaboration

- Actively contributed to Agile and Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives.
- Worked closely with product managers, QA testers, and designers to deliver features on schedule.
- Mentored junior developers on Git workflows, clean coding standards, and project best practices.
- Maintained open communication with stakeholders for smooth delivery and transparency.

Testing & Tooling

- Followed Test-Driven Development (TDD) and Behavior-Driven Development (BDD) practices for reliable code quality.
- Created unit and integration tests using Jasmine, Karma, and React Testing Library.
- Used tools like Angular CLI, NPM, Chrome DevTools, and Postman for efficient debugging and testing.
- Ensured new features passed quality checks before deployment to production.

Cloud, Deployment & Documentation

- Supported CI/CD pipelines using Jenkins and GitHub Actions to automate build and deployment processes.
- Deployed web applications on Oracle WebLogic Server ensuring stable and secure releases.
- Created technical documentation, user guides, and process notes for smooth handover and knowledge transfer.
- Collaborated with DevOps teams to monitor deployments and resolve production issues efficiently.

- Assisted in developing Angular and React-based applications, focusing on building responsive and reusable UI components using HTML, CSS, and JavaScript.
- Supported API integration and debugging, helping deliver functional features within deadlines.
- Collaborated with senior developers to understand code structure, version control (Git), and CI/CD workflows.
- Gained hands-on exposure to Agile/Scrum processes – including sprint planning, daily stand-ups, and retrospectives.
- Contributed to creating basic technical documentation and improving project knowledge sharing.

PROJECTS

iCust – Core Banking Application

Role : Associate Software Developer | Team Size: 18 (Frontend – 9, Backend – 6, QA – 3) | 2021(Aug) – 2024(Sept)

Tech Stack: Angular 15, TypeScript, RxJS, REST APIs, Java, SCSS, Oracle WebLogic, Jenkins

- Developed and optimized key modules like Customer Onboarding, Loan Accounts, and Kiosk Portal for B2B and B2C clients.
- Integrated REST APIs with secure authentication (JWT, OAuth2, RBAC) to enhance system security and scalability.
- Built reusable UI components improving development speed and code maintainability.
- Worked closely with UI/UX designers and backend developers under Agile Scrum practices for on-time delivery.
- **Impact:** Improved onboarding efficiency by 30% & reduced page load time by 25% through UI and API optimizations.

Median – Middleware Processor

Role : Associate Software Developer | Team Size: 12 (Frontend – 6, Backend – 4, QA – 2) | 2021(Aug) – 2024(Sept)

Tech Stack: Angular 14, Java, REST/SOAP APIs, JSON, Jenkins, GitHub Actions

- Built middleware modules to integrate multiple banking systems, enabling seamless and secure data exchange.
- Designed data transformation and validation layers to ensure consistency and reliability in data flow.
- Developed monitoring dashboards to track service health and integration performance.
- Collaborated with DevOps teams to automate deployments using CI/CD pipelines (Jenkins & GitHub Actions).
- **Impact:** Enhanced interoperability and reduced manual reconciliation efforts by 40%, improving system reliability.

SIAS – Data Warehousing & Analytics Tool

Role : Associate Software Developer | Team Size: 6 (Frontend – 3, Backend – 2, QA – 1) | 2022(Apr) – 2023(June)

Tech Stack: Angular 12, RxJS, REST APIs, PostgreSQL, Bootstrap, JSON

- Developed interactive dashboards and visual reports for data analytics and financial reporting.
- Integrated data pipelines from core banking and external systems for automated data transformation.
- Implemented filters, charts, and real-time analytics views using RxJS and optimized API handling.
- Coordinated with stakeholders to refine requirements and improve visualization accuracy.
- **Impact:** Enabled real-time insights, helping management make data-driven decisions 25% faster.

ExpressBees – Logistics Management Platform

Role : Associate Software Developer | Team Size: 18 (Frontend – 4, Backend – 2, QA – 2) | 2021(Oct) – 2024(Sept)

Tech Stack: ReactJS, JavaScript (ES6+), TypeScript, REST APIs, Redux, Bootstrap, GitHub Actions

- Developed and optimized key modules for shipment tracking, order management, and delivery updates using ReactJS.
- Integrated REST APIs for real-time logistics data and improved overall dashboard performance.
- Implemented Redux-based state management and code-splitting to enhance speed and scalability.
- Collaborated with backend and QA teams under Agile Scrum practices to ensure timely and quality feature delivery.
- **Impact:** Improved data load time by 30% and enhanced customer experience with real-time shipment visibility.

EDUCATION

B.TECH (APRIL 2016 – JUNE 2020) : ELECTRONICS AND COMMUNICATION ENGINEERING – (PERCENTAGE: 67%)

2016–2020

- Integrated with core banking/external systems for datamart transformation and automated reporting.
- Delivered accurate reports with analytics for bank management and financial decision-making.

Siksha ‘O’ Anusandhan University (SOA), ITER, Bhubaneswar, Odisha, India
