PROFESSIONAL SUMMARY

Senior Contact Center Technology professional with 20+ years of experience in telecom and contact center technologies. Hands-on experience spanning Genesys Engage, Genesys Cloud, Five9, IVR, SIP/CTI, routing, eServices, reporting, WFM, production support, solution design and implementation. Experienced in translating business requirements into practical call-flow and platform solutions while supporting production environments and customer-facing delivery.

CAREER HIGHLIGHTS

- 20+ years of telecom and Contact Center technology experience.
- Strong hands-on Genesys Cloud experience covering Architect call flows, Routing, Recording, Reporting, API, CRM integrations, Data Tables, Call-flow changes, Troubleshooting and configuration of Genesys Cloud components: queues, skills, prompts, schedules
- Genesys experience across Framework, SIP Server/T-Server, URS, Stat Server, GVP, eServices, GWS, WWE/WDE, Reporting and WFM.
- Experience in solution architecture, implementation, configuration, troubleshooting, production support, UAT and deployment.
- Customer-facing experience supporting requirements, technical discussions, demonstrations, change requests and production issues.
- Experience supporting complex enterprise environments with SLA-driven incident management, RCA and maintenance activities.
- Genesys Cloud certifications covering Architect, API Developer, Scripting, Outbound Dialer, WFM and Quality Management.
- With a quick grasp and understanding of the client's requirements coupled by a sharp business acumen has delivered customized solutions ensuring high level of customer satisfaction, adding to the profitability to the business and the organization
- Having Good knowledge on Genesys Cloud and FIVE9.

Education and Certifications

Degree	Institute	University/Board	Percentage	Year of passing
B.E	RMK Engineering college	Madras university	65	2004
HSC	Govt.Higher Secondary School	State board	68.7	2000
SSLC	Govt.High School	State board	82.5	1998

Professional experience

Working as Sr. Service Engineer in Waterfield Tech(Speech Soft) from Aug 2024 to Sep 2026.

Worked as Sr.Genesys PS Consultant in Miratech Group, Chennai from Aug 2022 to Jul 2024.

Worked as Technical Architect in Servion Global Solutions Pvt Ltd, Chennai from Jan 2022 to Aug 2022.

Worked as Manager-Projects in Cognizant Technology Solutions, Bangalore from Mar 2020 to Jan 2022.

Worked as Senior Technical Support Engineer in Genesys Telecom Labs, Chennai from Mar 2017 to Mar 2020.

Worked as Lead Consultant, in Infosys Ltd, Chennai from Mar 2016 to Mar 2017.

Worked as Senior Associate – Technical Support in AT&T Global Business Services India Pvt. Ltd, Hyderabad from July 2013 to Mar 2016.

Worked as Genesys Consultant in Moksa Technologies Pvt Ltd, Mumbai from August 2012 to July 2013 date.

Worked as a Software Engineer-Technical Services in Servion Global Solutions Ltd, Chennai from August 2008 to July 2012.

Worked as a Technical support Engineer in Lattice Bridge Infotech Pvt Ltd, Chennai from June 2004 to July 2008.

Professional Training:

Five9 and Genesys University Training

- Genesys Cloud Professional Training
- Five9 - Implementation Engineer, Boot Camp 1 & II
- Five9 Admin, Inbound and Outbound Admin training
- Genesys Framework /Operations and Administration 8.5.
- Genesys Routing and Solution Reporting 8.5 Deployment
- eService Foundation and Administration 8.5 and Deployment 8.1.
- GWS/WWE deployment Training
- WDE Training
- RedHat Linux Training

Honors and Awards:

CX warrior award (2017) for Best Performance in handling Genesys cases within short period & Good NPS.

Long Term Service Award in Lattice Bridge InfoTech, June 2006.

Excellent award for supporting RailTel Patna project in Lattice Bridge InfoTech, April 2007.

Excellent Performer award for supporting TTLS project in Servion Global Solutions, August 2010.

Certification:

- Genesys Certified Professional - Inbound Voice 8.5 Consultant.
- Genesys Certified Professional - eService 8 Consultant.
- Genesys Certified Associate - Pure Cloud
- Genesys Cloud Professional (GCP)
- Genesys Cloud Certified Partner
- Genesys Cloud Workforce Management Certified Specialist
- Genesys Cloud Quality Management Certified Specialist

- Genesys Cloud Outbound Dialer Certified Specialist
- Genesys Cloud Scripting Certified Specialist
- Genesys Cloud Certified API Developer
- Genesys Cloud Architect Certified Specialist.

Target Roles

Genesys Cloud Consultant • Genesys cloud Implementation Engineer • Genesys Consultant • Contact Center Solution Architect • IVR Consultant • Technical Architect • Senior Contact Center Engineer

Core Technology Areas

Genesys Cloud | Five9 | Genesys Engage | Genesys Cloud | IVR / IVA | SIP / CTI | Routing | GVP | eServices | Contact Center Reporting | WFM | API / Integration | Production Support

SR. SERVICE ENGINEER | KEY RESPONSIBILITIES & DELIVERY – Genesys Cloud

Current role focused on Genesys Cloud and Genesys customer delivery, project changes, production support, IVR development and technical troubleshooting.

- Involved in design, development and execution of key Genesys Cloud project tasks for Heidelberg and Ahold Brands Main Inbound.
- Supported Genesys Cloud migration activity for the ICM project, helping facilitate migration from engage to Genesys Cloud and providing smooth operational support.
- Reviewed and delivered post-call survey change requests, integrating Genesys Cloud IVR scripts across two business units.
- Provided customer guidance for Genesys Cloud reporting and implemented requested changes during project delivery.
- Created and demonstrated a caller-verification approach using HealthSuite ID, ZIP Code and Date of Birth before connecting callers to live agents.
- Implemented Member Services call-flow changes to help prevent ghost calls and dead-air audio through Genesys Cloud configuration and script enhancements.
- Provided recommendations for IVR announcements and call-screening logic to help mitigate spoofed and robocall scenarios.
- Supported outbound caller-ID requirements using DNIS and successfully delivered branded Caller ID presentation.
- Led HPSM activities and managed Ascend tickets while coordinating Genesys/Five9 project work.
- Collaborated with Landmark Credit Union on production tickets and inbound/in-queue call-flow modifications.
- Managed Heidelberg Materials script changes, testing and production transition.
- Completed HPSM call-flow implementation and supported callback functionality for claims within a business unit.
 - I've worked on a variety of Genesys/Five9 projects, including serving as the lead for HPSM and managing Ascend tickets for the HPSM customer.
 - Collaborated closely with Landmark Credit Union (Genesys) Involved in processing tickets, inbound and in-queue call flow modifications for MX members in production supplied with optimum efficiency as per business requirements.
 - Regularly setting up a call to discuss various task changes in landmark in queue call flow and engaged in regular catch ups with LCU for any updates or changes as required.
 - Managed the project on my own and supplied script changes for the Sherman Update for Heidelberg Materials (Genesys) project in development, followed by a test call and transition into production.
 - Secured Genesys GCP certificate
 - Collaborated with Director to improve and streamline the Ascend dashboard process, enabling us to manage teamwork issues for multiple clients across both platforms (Genesys and Five9) and communicated the same with WTI peers on how to update and use it based on ticket categorization and other types of issues/tasks

Health Plan San Mateo – Five9

- I have involved in design, development and execution of key Five9 project tasks for HPSM, Cox Health, and Fireside.
- Handled Five9 migrated for the ICM project, successfully provided support—without encountering any issues—to facilitate the ICM migration from Teams to Five9. received excellent feedback from the client regarding the smoothness of this operation.
- Reviewed a client's change request regarding post-call surveys and successfully delivered the project implementation, integrating Five9 IVR scripts for post-call surveys across two HPSM business units, CA Nav and MS. The implementation proceeded successfully, with no issues reported. Throughout the process, I provided excellent customer support and precise guidance regarding reporting, and I implemented changes whenever requested.
- For various minor Five9 project requests—such as a demo for caller verification—I shared a demonstration showcasing how to validate a customer's HealthSuite ID, Zip Code, and Date of Birth before connecting them to a live agent. The client was pleased with the demo; their stakeholders expressed a desire to proceed with the request and showed keen interest in adopting this solution for their contact center.
- In accordance with the client's requirements, modifications were successfully implemented within the Care Navigator Services call flow to prevent "ghost calls" and "dead air" audio. This was achieved through adjustments to Five9 settings and enhancements to the script, aligned with specific business needs.
- Advised a recommendation for implementing an IVR announcement before a call reaches a live agent. Preventing Spoofed Calls via IVR o IVR systems can play a crucial role in mitigating the impact of spoofed calls or robocalls within the Care Navigator IVR script. Implemented call screening logic within the IVR is an effective approach. Formulate a proper plan to execute the necessary modifications to convert the 'Rude' field in VCC into a text field.
- outbound calls using DNIS, the client requested that the Caller ID be displayed as "CareAdvantage by HPSM and it was successfully delivered"
- Successfully completed HPSM call flow and implemented them in the production environment without any issues. The callback feature for claims was implemented within a specific business unit and was successfully completed.

ONVIDA / COX health/ Fireside – Five9

- Onvida IVA flow I got an opportunity to review the call flow deployed in IVA and was able to understand the flow and did not get change to work on such project. I should be able to demonstrate my skills in handling IVA related project in the coming days.
- Successfully completed setting up the skill, greetings prompt, assigning DNIS and DID mapping in context tables for the release of Neurology and Pulmonology line of businesses for COX health.and also successfully completed setting up the Greetings prompt, assigning DNIS to campaign, and mapped DID in context tables for Branson Cardiology line of business release for COX health.
- Successfully completed setting up creating new skills, Greetings/Beep-whisper prompts, assigning DNIS for respective LOBs in context table for our next release of Rheumatology.current 2option IVR scripts/campaign/skill or created new ones for both neurology and pulmonology.
- I've finished the IVR call flow for Fireside and QA was successfully completed and moved into production with smooth execution of the project from start to end.

Job Profile: Sr. Genesys PS Consultant (OPTUM-UHG)

- Expert Hands-on experience with Genesys Installation, Configuration, Administration and Support of Workspace Web Edition (WWE).
- Work closely with Project Manager to ensure on-time, quality delivery
- Taking care of implementation activities.
- Taking support tickets and requests, owning these through to resolution.
- Prioritizing and actioning any calls/emails/tickets that come in, working as part of the team to resolve, escalating where necessary.
- Configuration and managing applications for clients troubleshooting and investigating production issues.

- Documenting resolutions in the system
- Assist Business team with customer meeting and technical presentations
- Design and manage the overall technical architecture of the software product, ensuring it aligns with the business objectives and facilitates future growth and expansion.
- Research and evaluate emerging technologies and software products, providing recommendations on their potential benefits and how they can be integrated into the overall architecture.
- Collaborate with project managers and other stakeholders to ensure the technical architecture aligns with project timelines and budget constraints.
- Communicate complex technical concepts and ideas to both technical and non-technical stakeholders, ensuring everyone has a clear understanding of the technical solutions being proposed or implemented.

Job Profile: Technical Architect (Dubai Islamic Bank)

- Advanced hands-on experience on Genesys Engage based Contact Management Solution design, deployment and configuration on a global scale.
- Comprehensive knowledge in architecting, designing & deploying Omni Channel enabled Contact Centre Platform leveraging Genesys Engage solution
- Technical expertise in the Customer Experience (CX) and Contact Center domains which includes - Contact Management / Routing systems, Interactive Voice Response Systems, SIP Telephony systems, Outbound and Proactive servicing, Digital channels, Contact Recording and Analytics platforms.
- Hands-on experience with application solution architecture design and end-to-end software development of complex distributed (multi-tiered) Contact Center solutions.
- Experience in creating complex and detailed Solution Artifacts and Design flows that clearly illustrate solution architecture and design
- Knowledge on Cloud Native Design principles (Microservices) and Containerization technologies (Dockers & Kubernetes)

Roles and Responsibilities:

- Be part of the ConneX Platform – Architecture team – assist the team on Discovery and Design tasks.
- Evaluating and solutioning new Capabilities & Features
- Responsible for setting up and driving architectural design, proof of concepts and new products review
- Create Solution Artifacts and design flows that clearly layout the solution architecture and design for Delivery teams

Job Profile: Manager – Project – (Apple & British Telecom)

Responsible for GWS ,SIP Server and eServices components installation, configuration, upgrade and maintenance for all Business Unit(AC/RCDx and HL) in IT/UAT and Production environment. Managed the Genesys UAT/IT environment – Involved in configuration, upgrades, deployments, troubleshooting, fixing issues. Worked closely with the Apple business teams and development teams to manage downtimes and maintain high availability. Worked in a very dynamic environment, collaborating with various teams to meet project goals.

Roles and Responsibilities:

- Troubleshooting the GWS , TServer/SIP Server, eServices and Genesys environmental issues to provide a framework level solution.
- Prepared the plan for UAT and production installation.
- Monitoring the performance of the applications and environment.
- Production rollout plan and issue support.

Job profile: Sr. Technical Support Engineer.

Perform 2nd level diagnosis, troubleshooting and resolution of complex customer issues on a range of software products (eServices,(which includes IXN,UCS,ESJ,Chat,WebAPI, and SIP Server,GWS,WWE and WDE) and subsystems, in order to ensure customer satisfaction is to the highest possible level at all times.

Roles and Responsibilities:

- Attempt to isolate, reproduce and resolve problems using available systems and tools, and investigate potential workarounds for verified defects.
- Maintain the customer incident tracking system (Salesforce) with regular updates and resolution details. Information to include symptoms, diagnosis, actions and all relevant data.
- Participate in the creation of Knowledge Base articles, solutions and other related support collateral.
- To be the escalation support interface with customers and partners when necessary and to ensure that the company is represented in the most positive manner at all times.
- To interface with Subject Matter Experts, where the problem cannot be resolved at a frontline support level.
- To help set the correct problem resolution expectations and to provide timely progress reports to the appropriate levels of the support organization.
- Participate in a shift and on-call roster as necessary, to provide support coverage outside of standard business hours.
- Perform other related support duties, as required by the company.
- Attend training courses to sustain/enhance product knowledge and work in accordance with the policies and procedures outlined within the quality assurance documentation.

American Airlines/Hosted ICS/IHG/THD

Technology

GENESYS-GVP 8.1 /GENESYS Framework 8.1/ SIP Server/IRD/URS/Reporting/WFM/E-services

ERSC Tier-2 team receives, owns, and resolves issues related to ERSC Supported Client platforms (AMR/HICS/IHG/THD).

The ERSC Day Two Support Engineer completes this task with the use of monitoring tools(Vizgems,CBUs alarm etc), process, and teamwork.

Project Abstract

The India team member is responsible for receiving and working tickets according to specified time frames (SLA).

Responsible for troubleshooting of Genesys components issue and engagement Centennial team, TAMs, CSMs, vendor and tiered support as needed.

Inbound customer calls will continue to be managed out of the Centennial location.

Role

- ❑ Proactive monitoring, troubleshooting of Genesys component through Vizgems,SCI/GA.
- ❑ Troubleshooting of Genesys Call routing issues and Handling the AOTS ticketing tool to lock the ticket and continues follow-up with respective team towards resolution of the ticket
- ❑ Perform/Supporting for various maintenance windows scheduled activity on daily basis as per Change Calendar.

- ❑ Page out to CTL/CSM if any major issue which impact production system we immediately communicate with customer to understand the impact and open/ initiate bridge calls with different department to mitigate the issue and also find the RCA for the same.
- ❑ Troubleshooting Genesys logs on Windows platform for apps like URS, Routing Stat server Media server, RM, SIP T-Servers.
- ❑ Genesys Call Center Reporting, WFM & Infomart DB, CCPulse++.

ICICI

Technology GENESYS-GVP 8.0 /GENESYS Framework 8.0/ SIP Server/ IWS/URS/GIM ETL/Stat Server/CCPulse+

ICICI has deployed next generation Voice Self service GVP application in order to access account information of the customer such as corporate account, Loan& Demat information through IVR application.

Project Abstract ICICI customer can access their account related information through IVR and also can get Balance enquiry information, Cheque Book Renewal, Fund transfer, Check stopping, Last 10 Transaction through IVR just by entering debit card/CRN number.

- Role**
- ❑ Implementing, Trouble shooting and Technical Support of all Genesys Modules version 8.0 and 8.1.
 - ❑ Involved in proactive monitoring, troubleshooting of Genesys application with testing of each modules.
 - ❑ Generating daily call reports using Infomart DB
 - ❑ Troubleshooting Genesys logs on Windows platform for apps like URS, Routing Stat server MCP,RM, SIP T-Servers
 - ❑ Genesys Call Center Reporting, WFM, QGM & CCPulse++.

JP Morgan Chase (Retail)

Technology Intervoice- Invision studio ,GVP 7.6,Genesys CTI 7.2 ,Web phone, SQL Server and Monitoring tools.

JPMC Contact Centre is an Multi site Environment which provides customer support for Retail.

Project Abstract JPMC contact centre integrated of Intervoice - Invision studio (IVR) for automatic voice response & GENESYS CTI for intelligent Routing.

Customers will call the Toll Free no to access an IVR self service Application to get the various details about Home loans, Education loans etc., if the customer wants to talk to the agent, the call will be transferred to the appropriate agent, these call will pop out in the Webphone of the agent desktop.

Role	❑ Monitoring and troubleshooting (in case of any issues) the data network of Genesys, IVR associated servers and MAPD-AES Interfaces. ❑ Active monitoring, troubleshooting Genesys IVR issues. ❑ Troubleshooting of IVR and Genesys Call routing issues and Handling the Peregrine ticket(Ticketing system) ❑ Analyzing IVR and Genesys log files to determine Root cause of production issues ❑ Patching and testing the new updates on JPMC Server (MS and UNIX) to ensure no impact on application and implementation. ❑ Initiating bridge calls with different department to mitigate the issue and also find the RCA for the same. ❑ Involved in Configuration of all the CME Objects. ❑ Doing Maintenance of Genesys Application Production Servers every Month. ❑ Involved in getting knowledge transfer about the JPMC Contact Centre Environment, ❑ Troubleshooting all the Genesys, IVR & Webphone Production Issue. ❑ Involved in the Analysis in order to minimize the Production Issue. ❑ If any problem occurs raise a Ticket and escalate to the appropriate department. ❑ Involved in raising tickets for the production issues with Intervoice, TBOC, IOC, WINTEL of JPMC Group.
-------------	---

TTML (Tata Tele Maharashtra Ltd)

Technology	Amdale® PowerConnect software/GVP 7.2/Genesys Framework 7.2 /Speech Pearl8.0 /DB2/ Donjin® JCT 600 CTI boards.
Project Abstract	Customer can access the information about various customer services like prepaid, postpaid and dealer through Genesys-IVR self service application. Customer can also retrieve various details on their handset, value added services, product information through IVR self services just by dialing customer care services.
Role	❑ Installed, Configured and implemented Genesys Framework components. ❑ Developing Genesys Routing Strategies. ❑ Checking the logs and troubleshoot the issue if any CTI link failure. ❑ Creating alarms and log specific events in the Solution control interface. ❑ Troubleshooting the GAD related issue. ❑ Daily Testing the Lab & Production Environments log levels, Active alarms.

Tata Tele Services Ltd (TATA DOCOMO)

Technology	Cisco CVP, ICM, Cisco Voice Gateways, Cisco VXML, PGW. ITP Routers, SQL server
Project Abstract	The IVR Self Service solution is intended to enable TTSL to provide enhanced services to their GSM & CDMA customers all over India. This project consists of one Data Centre and five Hub locations. The components and architecture of this solution contains ITP 2811, PGW 2200, Media Gateway AS5400/AS5350, VXML Gateway AS5350, CSS 11500, SS7 link, ICM 7.5.
Role	❑ Involving in proactive monitoring and supporting of all Cisco voice gateways. ❑ Understanding the application design and call flow in order to support the application and to handle any new enhancement ❑ Working with all teams regarding opening and resolving the incidents, RFC and Service request. ❑ Configuring SMS scripts, uploading promotional and floating prompt in the respective VXML servers. ❑ Generating IVR DoYS reports for various services like prepaid, postpaid, Dealer, in roamer and privilege callers using SQL browser.

Vodafone

Technology	Avaya IR designer, Avaya IR 1.3, Unix,VXML The IVR Self Service solution is intended to enable Vodafone to provide enhanced services to their Vodafone customers all over India.
Project Abstract	RAPCTI is a Servion product which gets all the call related information and provides it to the agents as a pop up. This gives the agents complete information profile about the customer (such as customer details and the menu options chosen by the customer on the IVR) Worked as an On-site Engineer providing support & implementation to Vodafone across India for Interactive Voice Response (IVR), RAP CTI.
Role	❑ Monitoring the Critical IVRs and all Production Servers and tracking the day to day issues raised and completing it within TAT and fulfilling the SLA of the Client. ❑ Implementation of Avaya IVR, IP-IVR, configuring DIP, Vonetix, AES Signal Links, creation of vector programming, skill group, Hunt group in Avaya ACD ❑ Maintenance of AVAYA- IR , and all Production Web Servers ❑ Generating report for all the region's based on issues, Application etc ❑ Follow-up with the third party vendors for completion of issue related to their product/Application ❑ Maintenance of RAPCTI Servers:RAPCTI Screen Pop-up Server and Agent Screen Pop-up application ❑ Guiding and mentoring new support team members

Indian Railways

Technology	Amdale® Power Connect software/Speech pearl/ MS.Access/D41JCT/D4PCI This application will broadly consist of the following modules divided as per the type of services. Main Module – Main module generate the essential details like caller id, date and time, dialedmode, call duration etc for Reports and billing purpose. PNR- PNR will give the current status of the Ticket. Arrival and Departure- Arrival and Departure will give the details of the arrival and departure of the train.
Project Abstract	Accommodation & Fare Enquiry - Accommodation, Fare Enquiry will give the details of the seat vacancy position and fare details. Plan your Journey - Plan your Journey will give the details of the trains running between the source and destination station. Other Enquiry- Other enquiry will give the other details like Concession Fare, Special Train info, Facility & Amenities, Rules & Regulations, Historical Info etc.
Role	☐ Involved in implementation and support. ☐ Involved in impatient module and unit testing of the application. ☐ Involved in Environmental setup.

BSNL (Passport)

Technology	Amdale® Power Connect software / Speech Mania 8.0/MS-Sql Server/VB.net. This project is done for BSNL. The proposed system is to setup an ASR with IVRS fallback system, in which the users can know their status of their passport application. They can also know the procedure for applying the passport just by speaking or dialing the options.
Project Abstract	
Role	☐ Involved in Requirement Gathering. ☐ Involved in Design, Development and Testing of the application. ☐ Involved in Environmental setup..

BSNL(1044 Service)

Technology	Amdale® Power Connect software /Speech Pearl8.0 / DB2/VB. 1044 Service which provides information to the customer on Cricket, News (National, International, and Business) and Horoscope.
Project Abstract	This service was integrated with TTS and Speech Engine, so the customer can navigate through the application by giving the input as speech.
