Professional Synopsis

- Business Analyst, Project Manager, and Release Manager with 11+ years of experience in the Cards & Payments domain, delivering projects across Agile and Waterfall methodologies.
- Strong expertise in Credit Card Operations, Disputes, AML/KYC, RCSA, and the end-to-end card lifecycle, with experience in both Issuer and Acquirer environments.
- Experienced in Release Management, project planning, stakeholder coordination, vendor management, and successful delivery of system enhancements and production releases.
- Proficient in preparing and managing Business Requirement Documents (BRD), Project Charters, Requirement Traceability Matrix (RTM), impact analysis, and functional specifications.
- Skilled in collaborating with business, development, and testing teams to ensure solutions meet business requirements and quality standards.
- Experience in managing SIT, UAT, Regression Testing, migration activities, test planning, defect management, and release coordination.
- Knowledge of VisionPLUS Release Management, Loyalty & Rewards Management Systems, Alert Systems, and HP Exstream Customer Communication Management.
- Proficient in JIRA, Confluence, ServiceNow, and Application Reporting Tools for project tracking, requirement management, and issue resolution.
- Strong analytical, problem-solving, and stakeholder management skills, with a proven track record of delivering projects on time while maintaining quality and compliance.

Domain Experience / Banking
Applications/Platforms/Tools

- Cards Domain
- Loyalty Management System, Rewards Portal
- Issuing and Acquiring platform
- JIRA , Confluence, Service Now, One Note

Professional Experiences

Business Analyst at Synechron Technologies Pvt. Ltd., Chennai - Aug 2017 to till May 2026

Project: Fiserv - Credit Card (Australia and New Zealand) – May 2023 – May 2026

Fiserv supports multiple banking clients across Australia and New Zealand, such as NAB, HKT, PCL, etc for their credit card process in Vision Plus platform. I was handling end-to-end release management for multiple projects. Handling release planning, change management, testing coordination, production deployments, and stakeholder governance to ensure successful and timely releases for various projects.

Role: Business Analyst / Release Manager

Responsibilities

- Managed end-to-end release planning by preparing release calendars and defining timelines for development, SIT, UAT, production deployment, and warranty support.
- Coordinated with Business, Development, QA, Infrastructure, and Support teams to manage release scope, dependencies, feasibility, and implementation constraints.
- Consolidated project requirements, compliance updates, enhancements, and defect fixes into release notes, while tracking project milestones, risks, defects, and change requests.
- Managed JIRA activities, including features, stories, tasks, and defects, and ensured appropriate regression testing coverage for releases.

- Facilitated release governance, including Release Readiness Reviews, Go/No-Go meetings, UAT sign-offs, CAB approvals, production deployments, and Post-Implementation Reviews (PIR).
- Managed the Change Request (CR) lifecycle, maintained project documentation in Confluence, and coordinated implementation approvals.
- Monitored release risks, issues, and cross-functional dependencies, ensuring successful production deployments and smooth transition to business-as-usual support.
- Published release status reports and dashboards, providing stakeholders with visibility into project progress, milestones, risks, and release readiness.

Project: NAB – Sep 2021 – Dec 2022

National Australia Bank (NAB) is an Australian financial services company providing payment processing and financial solutions. The project involved developing an in-house payment processing platform to support merchant onboarding, payment transactions, and settlement processing. I managed the project from discovery phase through delivery using Agile methodologies.

Role: Project Manager / Scrum Master

Responsibilities

- Conducted discovery workshops, stakeholder meetings, and project kick-off sessions.
- Defined MVP, project scope, delivery roadmap, reporting cadence, and communication plan.
- Managed product backlog, user stories, epics, and sprint backlog in JIRA, ensuring development readiness through backlog refinement and prioritization.
- Facilitated Agile ceremonies, including Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, and tracked progress using burndown charts.
- Collaborated with Product Owners and development teams to define acceptance criteria, Definition of Done (DoD), and review sprint deliverables.
- Managed project status reporting, risks, issues, dependencies, and escalations, providing regular updates to stakeholders.
- Coordinated the created of functional workflows, reviewed UAT test cases, and supported SIT/UAT activities.
- Oversaw development, testing, and successful delivery of merchant onboarding, transaction processing, and settlement functionalities.

Project: Attra Project Reporting – Sep 2020 – Aug 2021

Developed a centralized Attra Project Reporting application to provide enterprise-wide visibility into project health and portfolio performance. The solution enabled role-based access for Project Managers, PMOs, Account Managers, and Business Unit Heads to manage project schedules, budgets, resources, milestones, risks, issues, and status. As a Business Analyst and Project Manager, I led requirement gathering, implementation, and subsequent enhancement releases from project inception.

Role: Business Analyst / Project Manager

Responsibilities

- Gathered and analysed business requirements for reporting application enhancements.
- Conducted requirement workshops and documented functional requirements and workflows.
- Coordinated with Development, QA, and UAT teams to ensure timely delivery.
- Performed feasibility analysis, effort estimation, and project tracking.
- Created and managed JIRA work items, including user stories, tasks, and subtasks.
- Managed project risks, issues, dependencies, and action items.
- Presented project status to stakeholders and steering committees.
- Ensured deliverables aligned with business requirements and project objectives.
- Oversaw development and testing for merchant onboarding, transaction processing, and settlement.

Project: RBL (Ratnakar Bank Limited), Mumbai – Aug 2017 – Aug 2020

Worked on the migration of RBL Bank's Credit Card platform from VisionPLUS 8.57 to VisionPLUS 10, supporting downstream applications including Loyalty, Customer Statements (HP Exstream), Alerts, 3DS ACS, and Disputes.

Role: Business Analyst

Responsibilities

- Performed business and impact analysis for VisionPLUS platform changes and assessed their impact on downstream applications.
- Defined business and ETL requirements, including standardized pipe-delimited extracts, to ensure consistent data delivery to downstream systems during the VisionPLUS migration.
- Collaborated with business, development, ETL, and vendor teams to analyse requirements and ensure seamless integration across dependent applications.
- Delivered enhancements to the Loyalty Management System, including cashback, reward calculations, redemption rules, loyalty campaigns, and branding updates.
- Designed and implemented customized credit card statements using HP Exstream by defining business rules for reward calculations and integrating dynamic marketing content.
- Worked on customer Alerts (Batch & Online), 3DS ACS implementation, and Disputes testing.
- Coordinated SIT, Functional UAT, and UAT, managed defects, change requests, requirement clarifications, and obtained business sign-offs.
- Supported production deployments by collaborating with business and technical teams to ensure successful implementation with minimal business disruption.

Assistant Manager at Tata Consultancy Services Ltd, Chennai - Sep 2007 to Aug 2017

Project: Project Management (Citi - APAC Region) – Jun 2015 – Aug 2017

The project involved delivering regulatory and business initiatives across Citi's APAC card platforms. Managed end-to-end project delivery for multiple regional implementations, coordinating business, technology, and testing teams to ensure timely implementation of regulatory and business-driven system changes.

Role: Project Manager

Responsibilities

- Handling system implementation as per the regulatory and business requirement from various regions after going through BRD (Business Requirement Document).
- Coordinating with stakeholders for getting the UAT and FUAT testing completed.
- Detailed Project planning and developing, like preparing a project plan, resources requirement, and timeframe.
- Mastercard-related Cards/Payments programmes, giving him strong practical understanding of the Mastercard ecosystem and card-payment lifecycle.
- Regulatory & scheme requirements: His Mastercard experience is highly relevant to the Capco requirement around scheme mandates, regulatory changes, compliance requirements, and implementation of changes across card platforms.
- **Cards & Payments:**
- Strong hands-on experience across the **end-to-end credit-card lifecycle**, including card issuance, authorization, transaction processing, billing, payments, disputes and chargebacks, clearing, settlement, and reconciliation. Experienced in **VisionPLUS implementations, platform migrations, testing, release management, and production deployments.**

- **Visa/Mastercard Regulatory & Compliance Releases:**
- Managed **Visa- and Mastercard-mandated regulatory and compliance changes** as part of the **Fiserv–ANZ Release Management programme**, covering scope consolidation, regulatory impact assessment, release planning, risk and dependency management, SIT/UAT coordination, CAB approvals, Go/No-Go readiness, production deployment, and post-implementation support.
- **Mastercard Certification & EMV Migration:**
- Hands-on experience with **Mastercard certification activities** during magnetic-stripe-to-**EMV chip-card migration programmes** at TCS, including transaction validation, PIN-exchange requirements, and **white-plastic card certification** activities prior to production rollout.
- End-to-end Cards expertise: Combined with his experience in credit cards, authorization, disputes, settlement, reconciliation, AML/KYC and risk/control testing, he brings both Mastercard domain knowledge and regulatory/risk expertise—which is exactly the combination Capco is looking for.
- Managing project deliverables in line with the project plan.
- Risk Assessment and Risk analysis using through register and possible threats that will face in the project.
- Global testing for Citi Product, reviewing Test Plan, strategy, Test Metrics.
- PVT - Insertion of transaction points, parameterization for Risk analytics and payments in cards.

Project: Anti Money Laundering – Transactions Surveillance Unit – Apr 2014 – May 2015

The AML Transaction Surveillance Unit was responsible for monitoring financial transactions to identify suspicious activities and ensure compliance with Anti-Money Laundering regulations. As a Subject Matter Expert and Quality Assurance Manager, I managed quality reviews, audit compliance, and continuous process improvement initiatives.

Role: SME /Quality Assurance Manager

Responsibilities

- Managed internal audit and quality control reviews for AML case processing.
- Analyzed payment transactions for unusual activity.
- Reviewed CDD, EDD, public domain, and watchlist information.
- Conducted regular huddles to improve quality and decision-making.

Project: NAO-CTU (North America Operations – Control Testing Unit) – Sep 2007-Apr 2014

The North America Operations Control Testing Unit was responsible for performing operational risk and control testing across banking operations to ensure compliance with regulatory requirements and internal control standards. Managed a team responsible for audit execution, control testing, and client coordination.

Role: Unit Manager

Responsibilities

- Led a team of 9 members in risk and control self-assessment.
- Managed audits related to account opening, customer service, KYC/CDD, CTR, STR, settlements, and dialer controls.
- Coordinated with clients to understand issues and provide solutions.
- Conducted meetings, shared process updates, and collected feedback.

Disputes Analyst at American Express (I) Private Limited, Gurgaon

Project: Disputes Analysis – Jun 2006 – Sep 2007

The Disputes Analysis team was responsible for investigating customer disputes related to credit card transactions and processing chargebacks in accordance with card network regulations. Worked closely with customers and merchants to resolve disputes while ensuring compliance with American Express policies.

Role: Disputes Analyst

Responsibilities

- Handled customer disputes and chargeback investigations.
- Reviewed merchant evidence and customer claims.
- Issued credits, processed rebilling, and managed write-off decisions.
