Professional Experience

Blackstone	May 2025 - Present
Senior Analyst, Market Data Operations	

- Own end-to-end market data operations for 10,000 plus users on the Blackstone account, spanning entitlement administration, vendor billing, inventory governance via FITS, and exchange reporting and declarations across NASDAQ, NYSE, OPRA, and CBOE.
- Validate monthly vendor invoices against contracts and entitlements; manage cost allocation across business units and cost centers, cutting unnecessary vendor spend by 10%.
- Process 400 plus monthly MAC requests including onboarding, entitlement upgrades, cancellations, and offboarding with full approval compliance and zero audit findings.
- Administer Bloomberg Terminal and BPIPE entitlements, validating license availability and business justification against vendor agreements.
- Drive entitlement audits, access certifications, and license harvesting, improving license utilization by 15% and reducing renewal spend.
- Act as primary contact for Finance, Procurement, and vendor teams on renewals and billing disputes; resolve incidents via ServiceNow within SLA, owning audit-trail documentation for compliance reviews.

HSBC	Nov 2022 - Apr 2025
Senior Market Data Analyst	

- Managed daily market data administration for 800 plus users across Investment Banking and Financial Markets, covering Bloomberg, Refinitiv Eikon, and other platforms via RPM Workflow.
- Processed 80 plus monthly provisioning and deprovisioning requests, consistently meeting SLA targets for entitlement turnaround.
- Owned daily DACS administration including entitlement setup, access changes, and license control, and maintained inventory governance via MDSL, keeping records audit-ready at all times.
- Managed cost allocation and invoice tracking via Calero, reconciling entitlements across vendor platforms and request records to maintain licensing accuracy.
- Managed exchange declarations and EMRS reporting for display and non-display usage across NASDAQ, NYSE, OPRA, CBOE, ICE, HKEX, and LSE, ensuring full regulatory alignment.
- Investigated provisioning delays, entitlement errors, and billing anomalies via root cause analysis; supplied usage and consumption data that informed vendor renewals and reduced repeat incidents by 20%.

United Parcel Services (UPS)	Aug 2020 - Aug 2022
Assistant Analyst, Financial Operations	

- Processed high-volume accounts payable and receivable transactions, validating invoices, payment requests, and approvals before release; resolved outstanding balances and reconciliation issues across customer accounts.
- Verified wire transfer and ACH payment processing, including banking instructions, transaction accuracy, and approval status, before execution.
- Prepared invoice allocation reports mapping expenses to cost centers, business units, and accounting categories for accurate financial tracking.

- Reconciled invoices, payments, and transaction records to identify mismatches and exceptions, closing discrepancies within 2 business days.
 - Built KPI reports and operational dashboards in Excel (Pivot Tables, VLOOKUP, HLOOKUP, Macros) for business monitoring and performance tracking.
 - Documented process workflows and SOPs, improving consistency and compliance with financial controls.
