Tools & Technologies:

JIRA • Confluence • Rally • SQL (Basic) • SNOW • Dynamics 365 • Advanced Excel & Power Point
• Pivot Tables • VLOOKUP

PROFESSIONAL EXPERIENCE

Product Owner – Commercial Payments | FIS | Pune

July 2021 – Present

- Own product backlog prioritization and roadmap execution for **commercial payment products spanning Commercial Cards, ACH, Wire Transfers, and Settlement workflows** aligned to strategic client needs.
- Manage a **cross-functional Agile squad** across Engineering, QA, and Business Analysis for enterprise payment delivery initiatives serving **US banking clients**.
- Delivered **ISO 20022 payment modernization initiative (PAIN flow)** by defining business requirements, workflow redesign, and integration priorities supporting payment message standardization and interoperability readiness.
- Successfully launched **Virtual Card Prefunding capability for B2B commercial customers**, improving **client funding visibility**, transaction transparency, and overall payment experience.
- Partner with stakeholders, engineering leadership, and client teams to convert business goals into product requirements, prioritized backlog items, and execution-ready user stories.
- Facilitate backlog grooming, sprint planning, UAT sign-off, release readiness reviews, and cross-team dependency management for multiple concurrent initiatives.
- Supported API-led payment integrations and workflow automation initiatives that enhanced operational efficiency and strengthened payment lifecycle visibility.

Key Achievements:

- ✓ Delivered multiple high-impact payment initiatives on schedule
 - ✓ Improved payment workflow visibility for enterprise B2B customers
 - ✓ Enabled modernization readiness through ISO 20022 implementation
 - ✓ Strengthened Agile execution and delivery predictability across teams
-

Business Analyst – Investment Banking | 3i Infotech | Mumbai

Aug 2020 – Jul 2021

- Collaborated with Product Owners and business stakeholders to analyze operational processes and recommend scalable digital solutions.
 - Authored business requirements, user stories, process flows, and test scenarios to support product delivery.
 - Supported API integration programs to enable seamless enterprise data exchange across platforms.
 - Worked closely with Development and QA teams to reduce delivery risks and improve release quality.
 - Facilitated Agile ceremonies, backlog prioritization discussions, and business validation sessions.
-

Business Analyst – BFSI / NBFC | Datamatics | Pune

May 2017 – Apr 2020

- Led business requirement elicitation, process analysis, and as-is / to-be workflow mapping for financial transformation initiatives.
 - Conducted vendor evaluation and solution recommendation exercises based on business fit, integration capability, and cost efficiency.
 - Provided analytical support for financial planning, forecasting, and operational decision-making.
 - Managed UAT support, business documentation, and end-user enablement activities.
-

Senior Executive – PMO | L&T Finance | Pune

May 2014 – May 2017

- Converted business needs into BRD / FRD documentation, enabling smooth collaboration between business and technology teams.
- Improved business process efficiency through workflow redesign initiatives.

- Led UAT coordination, defect tracking, and release readiness activities for enterprise programs.
 - Managed project governance coordination across business, IT, and infrastructure teams.
-
