

SRAVYA BOBBALI

Principal Software Engineer

Result-driven Principal Full Stack Engineer with 7+ years of experience owning solutions end-to-end — from design and architecture through development, deployment, and production at scale. Proven track record leading engineering teams, driving technical decisions, removing delivery blockers, and using AI-assisted development tools to improve engineering speed and quality.

PROFILE SUMMARY

- Principal Software Engineer with 7+ years of experience taking full ownership of enterprise Full Stack and cloud solutions — from design and architecture through development, deployment, and production at scale.
- Leads engineering teams end-to-end: driving technical decisions across architecture, APIs, databases, and integrations, and removing technical blockers to keep delivery on track.
- Deep hands-on expertise in Node.js, NestJS, React.js, TypeScript, JavaScript, REST APIs, GraphQL, AWS, and MySQL/MongoDB, applied to building secure, high-performance, production-grade applications.
- Owns performance, scalability, and security outcomes across applications by embedding optimized architectures, IAM systems, and engineering best practices into delivery.
- Actively uses AI-assisted coding tools (Cursor, GitHub Copilot, ChatGPT, Claude AI) to accelerate engineering delivery and improve code quality.
- Proven ability to lead technical discussions, mentor and guide engineering teams, and act as the primary technical point of contact with clients and stakeholders — translating business needs into realistic, well-engineered delivery.

CORE COMPETENCIES

- Technical Delivery Ownership • Engineering Team Leadership & Mentoring
- Solution Architecture & System Design • Performance Tuning & Optimization
- Agile Delivery & Sprint Ownership • Stakeholder Engagement & Client Management
- System Integration • Quality Assurance & Production Readiness
- Security Protocols & Compliance • AI-Assisted Engineering Productivity

TECHNICAL SKILLS

- **Backend & APIs:** Node.js, NestJS, Express.js, GraphQL, RESTful APIs, SOAP APIs, TypeScript, JavaScript
- **Frontend:** React.js, HTML5, CSS3, Apollo Client
- **Cloud & DevOps:** AWS, Docker, Jenkins, CI/CD Pipelines, Git, Bitbucket
- **Databases & Search:** MySQL, MongoDB, ELK Stack (Elasticsearch, Kibana, Logstash)
- **Messaging & Caching:** Apache Kafka, Hazelcast
- **AI & Productivity Tools:** Cursor, GitHub Copilot, ChatGPT, Claude AI
- **Domain Expertise:** Utility Billing, Customer Self-Service Portals, Enterprise Applications

WORK EXPERIENCE

Abjayon Consulting Pvt. Ltd., Hyderabad | June 2019 – Present

Principal Software Engineer | Sep 2025 – Present

- Own end-to-end technical delivery of scalable enterprise applications — from architecture and design through development, deployment, and production — using Node.js, NestJS, React.js, AWS, and modern databases.
- Drive technical decisions across architecture, APIs, databases, and integrations, ensuring solutions are scalable, secure, and production-ready.
- Act as the primary technical point of contact with clients and stakeholders, translating business requirements into realistic, well-engineered delivery plans.
- Lead and mentor an 8-member engineering team through technical reviews, solution guidance, and hands-on troubleshooting of critical issues — removing blockers to keep delivery on track.

- Drive application performance, scalability, and security across the stack through optimized architecture and engineering best practices.
- Partner with DevOps teams on CI/CD pipelines, cloud deployments, and production releases, taking ownership of delivery at scale.
- Adopt AI-assisted coding tools (Cursor, GitHub Copilot, ChatGPT, Claude AI) across the team to improve engineering speed and code quality.

Senior Software Engineer | Sep 2024 – Sep 2025

- Owned production rollout of a core enterprise product end-to-end, coordinating delivery across multiple cross-functional teams.
- Established coding standards and code review practices to raise software quality and delivery consistency.
- Led design of scalable technical solutions in close partnership with product and business teams.
- Partnered with DevOps for stable, efficient production deployments, taking ownership of issues through to resolution.

Full Stack Developer | Sep 2022 – Sep 2024

- Delivered enterprise features end-to-end using React.js, Node.js, and NestJS.
- Improved backend performance and optimized application responsiveness.
- Implemented secure authentication and third-party API integrations for enterprise services.
- Followed SDLC and Agile best practices throughout development, taking ownership of features from requirements to release.

Consultant – Full Stack Developer | Jun 2019 – Sep 2022

- Developed responsive front-end modules and scalable backend services using Node.js and Express.js.
- Supported testing, deployments, and production issue resolution, maintaining high system availability.

SIGNIFICANT ACCOMPLISHMENTS

- Owned end-to-end production deployment of a large-scale enterprise application, from architecture through go-live.
- Improved application performance and scalability through architecture optimization and hands-on technical leadership.
- Delivered multiple secure third-party integrations as technical owner.
- Established engineering best practices that improved code quality and delivery efficiency across the team.
- Led delivery of enterprise applications supporting 200,000+ users.

PROJECT

AI Trading Bot

- Designed and led development of an AI-powered automated trading platform using Next.js and the Angel One API for real-time market analysis and automated order execution.

EDUCATION

2019 | B.Tech. | Electrical & Electronics Engineering (EEE) | Vignan Institute of Technology & Science (Affiliated to Jawaharlal Nehru Technological University) | Hyderabad, Telangana

PERSONAL DETAILS

Address: Hyderabad – 500089 Date of Birth: 27th August 1998 Languages Known: English, Hindi & Telugu
