NETWORK OPERATIONS ENGINEER | IP NETWORKING | TELECOM BACKBONE | OPTICAL & TRANSMISSION OPS | INCIDENT MANAGEMENT

PROFESSIONAL SUMMARY

Network Infrastructure and Operations Engineer with **8+ years of experience** in large-scale IP networking, telecom transmission systems, network security operations, enterprise WAN environments, and critical incident management across global customer infrastructures. Strong expertise in **TCP/IP, OSPF, BGP, MPLS, Layer2/Layer3 routing, enterprise circuits, ISP backbone coordination, packet loss/latency diagnostics, VPN technologies, and systematic troubleshooting methodologies**. Experienced in handling high-severity outages in 24x7 NOC environments, coordinating with telecom providers, engineering teams, and cross-functional stakeholders to ensure service restoration, uptime, and root cause elimination. Hands-on exposure to optical/backhaul transmission systems, EMS/NMS style monitoring workflows, and large-scale internet service operations.

CORE TECHNICAL SKILLS

Routing / Protocols: TCP/IP, OSPF, BGP, MPLS, VLAN, STP, ARP, ICMP, DHCP, DNS, NAT, Layer2/Layer3 Troubleshooting, SDWAN basics

Telecom / Backbone: Enterprise Circuits, DWDM/Transmission Exposure, ISP Coordination, WAN Routing, Link Failover, Latency & Packet Loss Analysis, Optical Backhaul Validation

Network Security: Zscaler ZIA/ZPA/ZDX, Ivanti Pulse Secure VPN, GRE/IPSec, SSL VPN, SAML, Okta, Duo MFA, Proxy, Certificates

Wireless / Infra: Aruba Central, ArubaOS, WLAN Controllers, RF Diagnostics, 802.11 a/b/g/n/ac/ax

Packet / Log Analysis: Wireshark, tcpdump, MTR, iPerf, Fiddler, RCA, Incident Analysis, Traceroute Validation

Cloud / Monitoring: AWS, Azure, Active Directory, NSS/LSS, EMS/NMS Monitoring Concepts, Public Cloud Connectivity

Operations: P1/P2 Incident Handling, NOC Escalation, Shift Operations, SLA Management, Change Validation, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

ZSCALER — Senior Technical Support Engineer / Network Security Engineer | Apr 2025 – Present

- Troubleshoot large-scale enterprise secure access and cloud edge network deployments across ZIA, ZPA, ZDX, Browser Isolation, NSS/LSS, and traffic forwarding platforms.
- Perform packet-level diagnosis for TCP/IP, DNS, HTTP/S, ARP, SSL, GRE, and IPSec related failures impacting global enterprise users and branch connectivity.
- Validate routing path issues, PAC forwarding logic, tunnel establishment, cloud log streaming, and proxy traffic steering using systematic troubleshooting workflows.
- Coordinate with ISP teams, endpoint teams, customer network engineers, and cloud teams during P1/P2 incidents to restore critical services rapidly.
- Conduct detailed RCA for latency, packet drops, authentication path failures, and internet reachability issues using Wireshark, MTR, iPerf, and telemetry tools.

IVANTI — Enterprise Technical Solutions Engineer (Pulse Secure VPN) | 2023 – 2025

- Diagnosed and resolved complex Layer2/Layer3 enterprise VPN outages across Pulse Connect Secure deployments globally.
- Performed systematic troubleshooting for routing anomalies, certificate trust issues, tunnel disruptions, clustering failures, and remote access outages.
- Managed escalations from L1/L2 teams and collaborated with engineering for product defect isolation and service-impacting bug analysis.
- Delivered detailed technical RCA and uptime restoration planning for customer production incidents.

MOVATE TECHNOLOGIES (HPE ARUBA) — Senior Network Support Engineer | 2021 – 2023

- Provided P1/P2 escalation support for large enterprise Aruba wireless and IP infrastructures consisting of thousands of APs and controller-managed environments.
- Troubleshot WLAN instability, roaming failures, RF interference, DHCP/VLAN issues, Layer2/Layer3 reachability failures, and controller datapath drops.

- Performed packet capture and RF analysis to isolate AP tunnel failures, authentication delays, and traffic forwarding anomalies.
- Supported post-change validation, network health monitoring, and customer-impacting outage coordination in 24x7 support operations.

ACCENTURE (Google Fi / Google Store Operations) — Technical Associate / Network Operations | 2019 – 2021

- Performed L1/L2 troubleshooting of enterprise IP circuits and WAN services for Severity 2/3 outages including packet loss, latency spikes, ISP routing instability, and link failures.
- Monitored customer WAN links, internet provider incidents, and transmission outages while coordinating with telecom carriers including AT&T, Verizon, and Comcast.
- Investigated traceroute asymmetry, route degradation, backbone interruptions, and business service outages using systematic operational methodologies.
- Maintained uptime through provider escalations, incident prioritization, and cross-functional outage management.

HIGHTECH NEXT ENGINEERING & TELECOM (Reliance Jio Project) — Telecom Transmission Engineer | 2018 – 2019

- Worked on 4G telecom transmission rollout, optical backhaul readiness, transmission connectivity implementation, and telecom node benchmarking.
- Supported site validation, field transmission verification, KPI review, and corrective actions for newly commissioned telecom infrastructure.
- Coordinated with field teams for network service degradation, handover failures, and transmission optimization activities.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA Routing & Switching, Security)

Palo Alto Certified Network Security Engineer (PCNSE)

Aruba Central Practitioner / Aruba Cloud Essentials

Microsoft Azure Fundamentals (AZ-900)

Zscaler Digital Transformation Administrator (ZDTA)

Cyber Security Certification – Great Lakes

EDUCATION

B.E. in Electronics & Communication Engineering | Techno India College of Technology | 2013 – 2017

ADDITIONAL HIGHLIGHTS

- Comfortable working in 24x7 Network Operations Center / shift-based environments
- Strong exposure to large-scale IP networks, telecom backbone incidents, provider coordination, and cloud connectivity troubleshooting
- Excellent cross-functional communication with engineering, ISP, telecom, and customer infrastructure teams
- Immediate Joiner
