

SUGANYA R

Data Analyst | Capital Markets Reconciliation | Advanced Excel | SQL | Power BI

Bangalore, Karnataka, India | 9176667080 | suganyaraghupathy8@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with experience across settlements, investment banking reconciliation, securities reconciliation, fixed asset management, reporting and data validation. Strong hands-on capability in Advanced Excel, Excel Macros, VBA, MySQL, Power BI, Tableau, DAX and TLM. Experienced in analysing large datasets, decoding SQL logic, performing reconciliation and validation, preparing TDS/FDD/UAT documentation, and automating repetitive data-processing and reporting activities. Comfortable collaborating with business, operations, IT and client stakeholders.

TECHNICAL SKILLS

- Advanced Excel: Pivot Tables, Pivot Charts, XLOOKUP/VLOOKUP, INDEX-MATCH, IF/IFS, SUMIFS, COUNTIFS, conditional formatting, tables, charts and data validation.
- Excel Automation: Excel Macros and VBA for data formatting, report preparation, data consolidation and repetitive workflow automation.
- Data Analysis: Data cleaning, transformation, reconciliation, validation, exception analysis, large-dataset handling and business reporting.
- Analytics & BI: Power BI, Tableau, DAX, dashboard development, KPI reporting and data visualisation.
- Database & Applications: MySQL, SQL query analysis, TLM, Cognos, Power Query and basic Python.
- Documentation & Testing: TDS, FDD, UAT documentation, query validation, migration documentation and process improvement.

PROFESSIONAL EXPERIENCE

HCL Technologies – Senior Analyst | Bangalore | May 2025 – Aug 2026

Client / Team: Just Energy – Settlements Team

- Managed settlement-related activities, ensuring accurate and timely processing within defined SLAs.
- Analysed and decoded pre-existing SQL queries to understand business logic, source tables, joins, filters, calculations and dependencies.
- Reverse-engineered legacy query logic by tracing source tables and validating calculations against production data.
- Prepared TDS, FDD and UAT documentation based on decoded query logic and business requirements.
- Performed UAT by validating query results against live data, checking calculation logic, identifying discrepancies and confirming output accuracy.
- Used Advanced Excel, including Pivot Tables, lookup formulas, conditional logic, SUMIFS/COUNTIFS, charts and data validation, for data analysis, reconciliation and business reporting.
- Used Excel Macros and VBA to automate repetitive data-processing and reporting activities, including data formatting, report preparation, data consolidation and recurring workflows.
- Worked with large datasets to perform data cleaning, transformation, reconciliation and validation before settlement and invoice processing.
- Created and maintained Excel dashboards and automated reports using formulas, tables, charts and validation controls.
- Performed invoice processing, sanity checks and data-quality validation; handled Month-End Close activities and investigated exceptions with stakeholders.

JP Morgan Chase – Consultant | Bangalore | Sep 2021 – Jun 2022

- Performed agent reconciliation and Central Securities Depository (CSD) reconciliation using TLM and Excel.
- Created raw files by analysing and segregating Cognos reports using Advanced Excel functions.
- Coordinated with clients to clear outstanding reconciliation breaks and updated source codes for new accounts.
- Designed interactive Power BI dashboards using data models and visualisations to present actionable insights.
- Applied Excel-based validation and reconciliation checks to improve reporting accuracy.

SmartStream Technologies – Analyst | Bangalore | Nov 2018 – Jun 2019

- Delivered reconciliations for equities and derivatives across APAC and EMEA markets within SLA.
- Administered TLM applications, including static-data updates and onboarding of new reconciliations.
- Conducted UAT testing in MySQL and supported enhancements to improve system efficiency.
- Prepared documentation for pre- and post-migration activities.
- Used Excel-based analysis and validation to investigate reconciliation exceptions.

DBOI Global Services – Analyst | Bangalore | Oct 2014 – Sep 2016

- Managed reconciliations for global markets using TLM 2.7 applications.
- Coordinated with IT and middle-office teams to address critical reconciliation issues.

- Automated data workflows and built Tableau dashboards for operational reporting.
- Performed data validation and reporting activities using Excel and reconciliation outputs.

Flextronics Technologies – Analyst | Chennai | Jul 2012 – Sep 2013

- Maintained and reconciled fixed-asset transactions for 14 sites under US GAAP standards.
- Prepared monthly depreciation schedules and balance-sheet reports and verified supporting documentation.
- Conducted on-site asset audits and contributed to process improvements.
- Created Power BI dashboards with dynamic visualisations, bar charts, heatmaps and KPIs.
- Optimised data models and used Power Query for data transformation, reducing data-analysis time by 40%.
- Completed a document-retention project ahead of schedule and received recognition for efficiency.

EDUCATION & CERTIFICATION

- M.B.A. (Finance) – University of Madras, Chennai | 2015–2017
- B.Com. (General) – Meenakshi College for Women, Chennai | 2009–2012
- Data Analyst Certification – ExcelR
