## Professional Summary

**Contact Center Architect** with over 25 years of extensive experience in designing and delivering advanced Contact Center solutions. Skilled in Solution Design, Consulting, Development, Vendor Management, and Support. Proven track record of successfully leading and executing projects through exceptional planning, organizational expertise, and strong communication with clients and stakeholders. Possesses valuable onsite experience working with CVS Health (USA) and AXA Insurance (UK)

**Extensive expertise across leading Contact Center platforms**, including **Genesys Cloud, Amazon Connect, NICE CXone, Five9, Google CES, Twilio, Cisco, Avaya, Phonely.ai, and Kore.ai**. Skilled in architecting and implementing enterprise-grade solutions that leverage these technologies to enhance customer engagement, Agent Experience, and Business Experience.

Programming Competencies: C, C++, Java, VXML, Node.js, JSP, Python and Oracle

---

## Areas of Expertise

- **Consulted on Contact Center technology strategy** to drive AI-led transformation initiatives.
  - **Presented TCS Contact Center capabilities** to enterprise customers, showcasing innovation and value.
  - **Assessed customer platforms** and delivered tailored recommendations for AI and GenAI-enabled Contact Center transformation.
  - **Provided technology guidance** to help clients select the most suitable Contact Center platform aligned with functional and non-functional requirements.
  - **Developed contextualized demonstrations** to highlight TCS's Contact Center solutions and their business impact.
  - **Collaborated with alliance teams** to onboard product partners and strengthen organizational technology expertise.
  - **Co-innovated new service offerings**, creating value-driven solutions that enhanced customer engagement and operational efficiency.
- 

## Technical Certifications

- Cisco Unified Contact Center Design Expert
-

## Work Experience

Current Employer: Tata Consultancy Services Ltd, Chennai (Mar 2004 - till date)

Previous Employer: Servion<sup>†</sup> Global Solutions Ltd, Chennai (Mar 2001 – Feb 2004)

---

## Project Summary

### Contact Center Senior Solution Architect – Contact Centre CoE, TCS India (Jun 2018 – till date)

- **Develop Cloud Contact Center solution proposals** for customer RFPs, leveraging platforms such as Genesys Cloud, Amazon Connect, Cisco Webex Contact Center, Five9, NICE CXone, and Twilio.
- **Lead consulting engagements** to guide customers through Cloud-based Contact Center transformation, including AI-enabled solutions.
- **Deliver solution presentations** to customers, effectively communicating technical capabilities and business value.
- **Design AI-enabled Contact Center architectures** and provide implementation guidance to ensure successful deployment.
- **Integrate Cloud Contact Center platforms** with third-party solutions via AppFoundry and Marketplace ecosystems.
- **Advise on reusable asset development** to accelerate solution implementation and improve delivery efficiency.
- **Evaluate third-party Cloud solutions** and create TCS service offerings incorporating AI and ML capabilities.
- **Collaborate with product partners** to assess, onboard, and integrate new AI capabilities into Contact Center solutions.
- **Develop go-to-market strategies** and engage customers through targeted sales initiatives and strategic connects.

### Senior Contact Center Architect – CVS Health, USA (Mar 2016 – Jun 2018)

- Design Cisco Unified Contact Center Enterprise (UCCE) Solution for 4000 agents
- Design centralized 7-digit dial plan
- Propose strategies to migrate Omnicare Contact Center resources to CVS data centers
- Coordinate with stakeholders for ancillary application integration
- Design and integrate PCI-DSS complaint voice recording solution
- Design custom reports for measuring contact center productivity
- Integrate AT&T IP Transfer Connect with Cisco using SIP refer via Oracle SBC
- Integrate Cisco, Vertical Telephony and Avaya using Oracle ECB

#### **Contact Center Solution Architect – Contact Centre CoE, TCS India (Oct 2011 – Feb 2016)**

- Prepare response to Cisco/Genesys RFI/RFP that includes Contact Center Technical Solution, SoW, Bill of Material, Project Plan, Effort and Cost
- Propose solution for Contact Center Technology Refresh or System Upgrade
- Present Contact Center Solution and Capabilities to clients
- Design, Develop, Implement and Support Contact Center Solutions
- Integrate Contact Center solution with 3<sup>rd</sup> party solutions
- Perform due-diligence of client's Telephony environment and propose strategic / Tactical / Operational improvements

#### **PwC, USA (May 2011 – Sep 2011)**

- Design, Development and Implementation and support of Cisco IPCC / UCCE Contact Center solution
- Deployment model is Single split cluster between two locations. Agents are distributed across both locations
- Cisco IPCC environment is deployed to support both CUBE Gateway and PSTN Gateway
- CVP comprehensive call flow model is deployed to enable call treatment and call queuing
- Cisco CVP is integrated with Cisco ICM and CUCM to enable call transfer to live agents
- CTIOS tool kit Agent Desktop client applications are deployed for agent login and CTI screen pop
- Enterprise level reporting is enabled via Cisco WebView & Cisco Unified Intelligence Center (CUIC)
- Cisco UCCE solution is integrated with Verint Call Recorder and Spectrum Wallboard

#### **Contact Center Technical Architect – Contact Centre CoE, TCS India (Oct 2009 – May 2011)**

- Prepare response to Cisco/Genesys RFI/RFP that includes Contact Center Technical Solution, SoW, Bill of Material, Project Plan, Effort and Cost
- Propose solution for Contact Center Technology Refresh or System Upgrade
- Design, Develop, Implement and Support Contact Center Solutions
- Integrate Contact Center solution with 3<sup>rd</sup> party solutions
- Perform due-diligence of client's Telephony environment and propose strategic / Tactical / Operational improvements
- Vendor management and enabling partnership with OEMs for Contact Center

#### **NationalGrid, UK (Jul 2009 – Sep 2009)**

- Design, Development, Implementation and support of Cisco UCCX Contact Center solution
- Deployment model is Single centralized cluster but agents are distributed across four locations in India and UK
- Cisco UCCX is integrated with Cisco CUCM to enable call treatment, call queuing and call transfer to live agent
- Cisco Agent Desktop (CAD) applications are deployed for agent login and CTI screen pop
- Enterprise level reporting is enabled via Cisco Unified Historical Reporting server in UCCX
- Cisco UCCX is integrated with Harmony KnoahSoft Call Recorder

#### **AXA Insurance, UK (Jul 2006 – Jun 2009)**

- Supported Aspect Contact Center solution in the UK across multiple locations
- Centralized Contact Center deployment model with different vendor products to support varied functionalities
- Cisco Unified ICM is the routing client to route customer calls to Aspect Contact Center
- Aspect Contact Center is integrated with Nortel Periphonics IVR to enable call treatment and call queuing (when skill based call routing is enabled via Aspect Enterprise Contact Server, ECS). Otherwise call queuing is done by the Aspect ACD
- Enterprise level reporting is enabled via Aspect Unified Command Control (UCC)
- Contact Center resources are managed through Aspect Workforce management system
- Aspect Outbound predictive dialer automatically dials out contacts uploaded to the dialer
- Integrated with Verint Call recorder and Symon Wallboards

#### **Standard Chartered Bank, Singapore (Mar 2004 – Jun 2006)**

- Supported reporting module of SCB's data services
- Designed, developed, implemented and supported reporting modules for various regions remotely.
- Reporting modules are developed using C, C++, Pro\*C, Java and connected to Oracle database
- Reporting distribution mediums (Fax, SMS & Email) are developed using Java
- Supported migration of system to support new data feed format like XML

#### **Nabil Bank, Nepal (Sep 2003 – Feb 2004)**

- Design, development and implementation of Contact Center solution
- Intel Dialogic IVR application is integrated with Avaya ACD to enable call treatment and call queuing
- IVR application is integrated with Finacle Core Banking application via ISO 8583 interfaces to retrieve caller profile
- Custom Enterprise level reporting modules are developed using ASP .NET application

#### **Tata TeleServices, Bangalore (Jun 2003 – Sep 2003)**

- Implemented Medius dialer application
- Developed and implemented Fax module using Dialogic APIs
- Developed dialer campaigns using Visual basic scripting
- Customized dialer reports using Visual Basic

#### **Essex Call Center Speech Recognition IVR, USA (Sep 2002 – Jun 2003)**

- Developed and implemented speech enabled contact center solution
- Intel Dialogic IVR application is integrated with Speech Works Speech Engine and Avaya ACD to enable call treatment and call queuing
- IVR application is integrated with customer database to retrieve caller profile
- IVR application is integrated with CT Connect software to enable web based CTI-Screen pop
- Customized reporting modules are developed using ASP .NET

- Nominated this solution as the Best ASR solution in the US for the year 2003 by Speech Works

#### **EnviroTest Call Center Speech Recognition IVR, USA (Mar 2002 – Aug 2002)**

- Developed and implemented speech enabled contact center solution
- Intervice IVR application is integrated with Speech Works Speech Engine and Avaya ACD to enable call treatment and call queuing
- Developed an interface in VC++ to integrate IVR application with customer database to retrieve caller profile
- Customized reporting modules are developed using ASP .NET

#### **Speech Recognition R&D (Mar 2001 – Mar 2002)**

- Carried out research and development in Speech technologies
- Successfully integrated Speech Works, Nuance and Speech Pearl speech engines with IVR platforms like Avaya, Dialogic, Parity and Intervice
- Demonstrated organizations capabilities in speech technologies to customers like Southern Railway (India), Citi Bank (India), Fair Fax (Australia), N-Power (UK) and Samsung Electronics (USA)
