- Six Sigma Green Belt

PROFESSIONAL EXPERIENCE

Senior Manager – Information Security, ISMS & Compliance

LA Tech (Client: Axis Bank)

Jan 2024 – Present

Cybersecurity Governance & Compliance

- Lead information security governance and compliance initiatives aligned with ISO 27001:2022, GDPR, NIST 800-53, NESA, and industry security standards.
- Conduct information security assessments, IT audits, compliance reviews, and control effectiveness evaluations.
- Perform risk assessments, gap analysis, and security control reviews to identify and address security weaknesses.
- Support development and enhancement of governance frameworks, security policies, standards, and procedures.

Vulnerability Management & Security Risk Governance

- Support enterprise vulnerability management activities through identification, assessment, prioritization, and remediation coordination.
- Conduct vulnerability reviews using Qualys and collaborate with technology teams to address identified security risks.
- Coordinate remediation activities across Infrastructure, Cloud, Security Operations, and Application teams.
- Monitor remediation progress and support timely closure of security findings, audit observations, and control gaps.
- Review vulnerability trends, risk exposure, and business impact to support remediation prioritization.
- Generate management reports covering vulnerability findings, remediation status, compliance posture, and security risks.

Cloud Security & Access Management

- Support security governance across Microsoft Azure environments.
- Manage and review security controls related to CASB, Identity & Access Management, SSO, MFA, and Privileged Access Management.

- Monitor privileged account governance and access control effectiveness.

Security Operations & Threat Management

- Support DLP, SIEM, EDR, CyberArk, Qualys, and security monitoring initiatives.
- Participate in security incident analysis, risk investigations, and security event reviews.
- Conduct vulnerability assessments and remediation validation activities.
- Assist in security monitoring, threat detection, and incident reporting processes.

Stakeholder & Governance Management

- Collaborate with Infrastructure, Security Operations, Compliance, Risk, Legal, and Audit teams to improve organizational security posture.
- Present security findings, remediation plans, compliance updates, and risk assessments to management and stakeholders.
- Facilitate governance discussions and support internal and external audits.
- Coordinate remediation activities for audit observations and regulatory findings.

Senior Consultant

Capgemini India Pvt. Ltd., Mumbai

Aug 2009 – Aug 2023

Supported cybersecurity, governance, risk management, and service management engagements for major Banking and Financial Services clients including Citi, American Express, and Deutsche Bank.

Cybersecurity, Risk & Governance

- Delivered cybersecurity, IT audit, governance, risk management, cloud security, and data governance engagements.
- Conducted security assessments, risk reviews, compliance evaluations, and control assessments.
- Supported security governance initiatives and remediation activities across client environments.
- Assisted clients in strengthening security controls, risk posture, and compliance frameworks.

Project & Program Management

- Managed project governance activities including scope, timelines, risks, issues, quality, and SLA reporting.
- Developed project status reports, executive dashboards, utilization reports, and governance updates.
- Tracked project risks, issues, dependencies, and escalations across multiple workstreams.
- Coordinated with cross-functional teams to ensure timely resolution of security and operational issues.
- Facilitated stakeholder meetings, governance reviews, and service management discussions.

Vulnerability & Remediation Coordination

- Worked with technology and operational teams to review security findings and support remediation planning activities.
- Coordinated follow-ups with stakeholders to track remediation actions and closure commitments.
- Tracked issue closure status, risk treatment plans, and compliance commitments through governance forums.
- Supported service improvement initiatives through root cause analysis and corrective action planning.

Service Management & Governance

- Managed Incident, Problem, Change, and Service Management processes.
- Participated in CAB reviews, change governance, risk reviews, and service reporting.
- Conducted RCA reviews and monitored service performance against agreed SLAs.
- Managed vendor coordination and stakeholder communication activities.
