PROFESSIONAL SUMMARY

Result-driven Network Engineer with 7.5+ years of experience in designing, implementing, and troubleshooting

large-scale enterprise and cloud network infrastructures.

Strong expertise in Layer 2/Layer 3 technologies (BGP, OSPF, MPLS, L2VPN, L3VPN, VPLS, MP-BGP) and

data center networking (Leaf-Spine architecture).

Hands-on experience in Palo Alto firewall administration, security policy design, NAT, and VPN solutions.

Proficient in cloud networking (AWS & OCI), including VPC, Transit Gateway, Direct Connect, and hybrid connectivity.

Skilled in network automation using Python and delivering 99.99% uptime for mission-critical environments.

KEY SKILLS

- **Routing & Switching:** BGP, OSPF, MPLS, L2VPN, L3VPN, MP-BGP, STP, VLAN, VTP, EtherChannel, HSRP, VRRP
- **Data Center Networking:** Core/Aggregation/Access Switches, Leaf-Spine Architecture, EVPN, ECMP, High Availability, Capacity Planning, Network Migrations
- **Network Automation:** Python, Configuration Templates, Automated Health Checks, Compliance Audits
- **Network Security:** Palo Alto NGFW, Palo Alto Panorama, NAT, VPN, Security Policies, Threat Analysis, Rule Optimization
- **AWS Networking & Cloud Services:** VPC, Subnets, Route Tables, NACL, Security Groups, Internet Gateway, NAT Gateway, Elastic IP, VPC Peering, Transit Gateway, Direct Connect, Site-to-Site VPN, Client VPN, Route 53, CloudFront, Global Accelerator, Elastic Load Balancer (ALB/NLB), VPC Endpoints, AWS Private Link, Network Firewall, Transit Gateway Peering, Hybrid Cloud Connectivity, Multi-Account Networking, Multi-Region Architecture, Network Security, High Availability, Disaster Recovery, Cloud Migration, Monitoring and Troubleshooting. Transit Gateway, Direct Connect, Site-to-Site VPN, Global Accelerator, CloudFront, ELB
- **Oracle Cloud Networking (OCI):** VCN, DRG, Fast Connect, Route Tables, Service Gateways, Security Lists, Hybrid Connectivity
- **Network Tools & Platforms:** Slack, ServiceNow, Jira, SolarWinds, Grafana, Prometheus, Wireshark, SNMP Monitoring
- **Vendors & Hardware:** Juniper, Arista, Cisco, Palo Alto Operational Excellence: Incident/Problem Management, RCA, Maintenance Windows, SLA Compliance

PROFESSIONAL EXPERIENCE

NETWORK ENGINEER | ORACLE TECHNOLOGIES INDIA PVT LTD
(OCI)

 Bangalore | Feb 2024 – April 30th 2026

- Managed and maintained OCI network infrastructure, ensuring high availability and performance across large-scale production environments by continuously monitoring network health and proactively addressing potential issues
- Troubleshot complex L2/L3 issues (BGP, OSPF, MPLS, VPNs) by analyzing routing tables, logs, and packet flows to quickly identify root causes and restore services
- Handled P1/P2 critical incidents, coordinating with cross-functional teams and performing detailed RCA to minimize downtime and prevent recurrence
- Worked on Leaf-Spine architecture with ECMP routing, ensuring efficient traffic distribution and optimized East-West data center traffic is low
- Collaborated with multi-vendor environments (Cisco, Juniper, Arista) to resolve interoperability issues and maintain seamless network operations
- Improved operational efficiency through proactive monitoring and issue resolution, reducing incident
- Managed Oracle Cloud networking components, including VCNs, DRGs, Fast Connect, Route Tables, Service Gateways, Security Lists, and hybrid connectivity solutions between cloud and on-premises environments.
- Developed and utilized Python-based automation scripts for network health checks, configuration validation, operational task automation, and compliance auditing, improving operational efficiency and reducing manual effort.
- Executed network maintenance activities, software upgrades, configuration changes, and infrastructure expansion projects during scheduled maintenance windows while ensuring minimal customer impact and service continuity.
- Participated in capacity planning, network migration, and service deployment initiatives, collaborating with cloud, security, and engineering teams to enhance scalability, reliability, and overall network performance. frequency and enhancing overall network stability

NETWORK ENGINEER | CDW TECHNOLOGIES INDIA PVT LTD

 Bangalore | Jun 2022 – Feb 2024

- Configured and managed routing protocols (OSPF, BGP), including neighbor, route redistribution, and troubleshooting routing convergence issues
- Managed switching technologies (VLAN, STP) by configuring VLAN segmentation

and ensuring loop-free topology using STP optimization

- Administered Cisco ASA firewall (NAT, VPN configuration), including site-to-site VPN setup and NAT rule

Implementation for secure connectivity

- Supported SD-WAN deployments and troubleshooting, ensuring reliable WAN connectivity and traffic optimization
- Managed and configured Palo Alto Firewalls, including Security Policies, NAT, URL Filtering, Application Control, and IPSec VPNs to ensure secure network communication.
- Administered AWS cloud networking components such as VPCs, Subnets, Route Tables, Security Groups, Network ACLs, Internet Gateways, and EC2 instances.
- Implemented and supported secure connectivity between on-premises data centres and AWS cloud environments using Site-to-Site IPSec VPN tunnels through Palo Alto Firewalls.
- Performed troubleshooting of routing, VPN, NAT, firewall policies, and cloud network connectivity issues, while monitoring network performance and ensuring high availability across hybrid environments.

SENIOR SUPPORT ENGINEER | TEK SYSTEMS INDIA PVT LTD

 Bangalore | Dec 2020 – Jun 2022

- Provided L2/L3 network troubleshooting by diagnosing connectivity, routing, and switching issues for enterprise environments
- Managed firewall and SD-WAN solutions, ensuring secure and optimized traffic flow across networks
- .Incident management, SLA tracking, and RCA documentation, ensuring timely resolution and
- Managed and configured Palo Alto Firewalls, including Security Policies, NAT, URL Filtering, Application Control, and IPSec VPNs to ensure secure network communication.
- Administered AWS cloud networking components such as VPCs, Subnets, Route Tables, Security Groups, Network ACLs, Internet Gateways, and EC2 instances.
- Implemented and supported secure connectivity between on-premises data centres and AWS cloud environments using Site-to-Site IPSec VPN tunnels through Palo Alto Firewalls.
- Performed troubleshooting of routing, VPN, NAT, firewall policies, and cloud network connectivity issues, while monitoring network performance and ensuring high availability across hybrid environments.

NETWORK ENGINEER | COSMOGENIC IT SOLUTIONS

 Dec 2018 – May 2020

- Configured and supported VLANs, STP, and basic OSPF, ensuring proper network segmentation and routing within the organization
- Assisted in wireless network troubleshooting, resolving connectivity and performance issues for users
- Configured Cisco ASA firewall and basic security policies, supporting secure access and network protection

EDUCATION

Bachelor's Degree in Electronics and Communication
