PROFESSIONAL SUMMARY

Senior Business Analyst with 12.5+ years of experience in Banking & Financial Services delivering Digital Banking, AML/KYC, Financial Crime Compliance, Credit Card Automation, and Banking Transformation initiatives. Experienced in Business Process Analysis, Business Capability Assessment, Value Stream Mapping, Operating Model Support, Process Re-engineering, AS-IS / TO-BE analysis, Stakeholder Management, Agile Delivery, and end-to-end SDLC across HSBC, EY and TCS.

CORE COMPETENCIES

Requirements Gathering	User Stories & AC	BRD / FRD Writing	Process Mapping / UML	Gap & Impact Analysis
AML / KYC / CDD / EDD	Transaction Monitoring	Business Capability Mapping	Value Stream Mapping	Agile / Scrum
JIRA / Confluence	Stakeholder Management	SAR / UAR Reporting	UAT Coordination	Change Management
MIS & Reporting	Team Leadership	Payments & Corporate Banking	Risk Assessment	Operating Model Support

PROFESSIONAL EXPERIENCE

Senior Business Analyst / Senior Consultant | Ernst & Young (EY) *Hyderabad · Sep 2024 – Present*

Client: HSBC | Project: Financial Crime Compliance (FCC) – AML/KYC Platform Enhancement

- Elicited, documented and validated business requirements from senior compliance stakeholders at HSBC for a Financial Crime Compliance (FCC) programme spanning a team of 28 investigators.
- Facilitated requirement workshops and JAD sessions on Dynamic Risk Assessment (DRA) and holistic network analysis features, producing BRDs, process flow diagrams and RACI matrices.
- Supported business capability assessment and value-stream mapping as part of the DRA and network analysis initiative, helping define current- and target-state elements of the FCC operating model.
- Created detailed User Stories with Acceptance Criteria and maintained the Product Backlog in JIRA, breaking down large compliance epics into sprint-ready stories with the Product Owner.
- Managed stakeholder expectations across business, technology and compliance verticals; maintained stakeholder registers and delivered fortnightly status reports to senior management.
- Defined acceptance criteria and coordinated end-to-end UAT for SAR/GFCC escalation workflows, authoring test scenarios and tracking defects through to sign-off.
- Translated AML regulatory mandates into functional specifications for CDD/EDD screening and negative-news modules, ensuring full traceability from requirement to delivery.
- Handled Change Requests (CRs) via impact analysis and requirements traceability matrices throughout the SDLC.
- Identified process improvement opportunities that reduced alert disposition time by 15%, directly contributing to SLA adherence and quality benchmark targets.
- Prepared production and quality MIS reports for senior management; conducted structured training sessions to upskill new team members on compliance processes.
- Supported Business Capability Assessment by identifying process gaps, dependencies and improvement opportunities across Financial Crime Compliance workflows.
- Supported Target Operating Model (TOM) analysis by documenting current-state and target-state processes for AML/KYC platforms.
- Participated in Value Stream Mapping workshops to identify operational bottlenecks and improvement opportunities across investigation workflows.

- Partnered with Compliance, Technology and Business stakeholders to align business processes with strategic operating model objectives.
- Conducted Business Process Re-engineering initiatives to streamline Financial Crime Compliance operations and reduce processing turnaround time.
- Prepared Current-State and Future-State process models using BPMN, UML and Swimlane diagrams.
- Collaborated with Product Owners during backlog prioritization and release planning to ensure alignment with business objectives.
- Supported Regulatory Change initiatives through impact assessments and requirements traceability.

Business Analyst / Business Process Lead | Tata Consultancy Services (TCS) Hyderabad · Mar 2023 – Aug 2024

Projects: Actimize Transaction Monitoring Rule Optimisation; Payments & Corporate Banking Compliance Initiative

- Gathered and prioritised requirements from compliance and operations stakeholders for Actimize-based Transaction Monitoring enhancements, documenting AS-IS and TO-BE process flows using BPMN/UML.
- Collaborated with technology teams to translate AML business rules into functional specifications for rule-tuning and false-positive reduction initiatives.
- Supported requirements analysis on a separate Payments and Corporate Banking compliance initiative, gathering process and control requirements alongside the core Transaction Monitoring workstream.
- Wrote User Stories and Acceptance Criteria, maintained the Product Backlog in JIRA and facilitated sprint planning, daily stand-ups and retrospectives within an Agile delivery framework.
- Created detailed process documentation, standard operating procedures and user manuals, enabling seamless knowledge transfer and audit readiness across a 15-member analyst team.
- Conducted quality reviews and implemented corrective measures, improving team accuracy rates by 18% quarter-over-quarter.
- Ensured compliance with AML regulatory standards and maintained audit readiness through robust process documentation and change-log management.
- Led end-to-end Customer Journey Analysis for Credit Card onboarding and servicing initiatives.
- Conducted AS-IS and TO-BE Process Assessments to improve customer onboarding efficiency.
- Facilitated cross-functional workshops involving Business, Compliance, Operations and Technology teams.
- Identified process bottlenecks and recommended automation opportunities to improve Straight Through Processing (STP).
- Created functional workflows and business process models for Credit Card lifecycle enhancements.
- Performed Business Impact Analysis for regulatory and operational change requests.

Business Analyst / Credit Officer | HSBC Hyderabad · Sep 2016 – Mar 2023

Project: Credit Card Application Automation & KYC/CDD Platform

- Led end-to-end BA activities for the Credit Card Application Automation Project, gathering requirements from 6 business units and producing comprehensive BRDs and FRDs coordinated with Technology and Senior Management.
- Defined business rules for automated credit-worthiness validation, integrating CDD/EDD and World-Check screening into a mobile application workflow — reducing card issuance time from 15–20 days to 10 days.
- Created UML Use Case and Process Flow Diagrams, and facilitated stakeholder interviews and process workshops to identify pain points and produce swimlane diagrams and process improvement recommendations.
- Documented functional and non-functional requirements for RFI management, PEP screening and UAR modules using internal tools (RDC World-Check).
- Acted as liaison between Compliance, IT and Operations; maintained requirements traceability matrices and managed scope change through a formal change-request process.
- Performed end-to-end verification, validation and quality-control checks on completed cases, and escalated suspicious cases to compliance review teams.
- Conducted Value Stream Analysis for AML Transaction Monitoring processes to identify optimization opportunities.
- Performed Process Mapping and Gap Analysis using BPMN and UML.
- Worked closely with Product Owners during Sprint Planning and Backlog Refinement sessions.
- Supported enterprise process standardization across multiple compliance workstreams.
- Coordinated with Architecture and Development teams to ensure solution alignment with business objectives.
- Developed training material and delivered knowledge-transfer sessions to 20+ team members on new processes and regulatory procedures.

Business Analyst (Associate) / Customer Service Executive | CMC TCS Hyderabad · Mar 2013 – Jun 2016

- Analysed customer service workflows and identified process gaps, producing requirement documents that underpinned CRM system enhancements and service delivery improvements.
- Supported UAT and user training for new service delivery tools, contributing to a measurable improvement in first-call resolution rates.
- Organised and delivered product-knowledge and client-interaction sessions, reducing new-hire onboarding time and improving service delivery metrics.

KEY PROJECT HIGHLIGHT

Credit Card Application Automation – HSBC

- BA lead for end-to-end digitisation of the credit card application journey via a mobile app, cutting card issuance time by ~50% and significantly improving customer experience.
- Collaborated with Technology and Senior Management to draft requirements, produce BRD/FRD and define the mobile-app roadmap including in-app application-status tracking.
- Integrated automated credit-worthiness validation and CDD/EDD/World-Check checks directly into the app workflow, replacing manual branch-based processes.
- Post-launch: reduction in branch complaints and customer queries; new approach became the standard for digital onboarding across the region.

EDUCATION

MBA – Business Management | Dr N.S Kolla School of Business, Visakhapatnam (2008–2010)

TOOLS & TECHNOLOGIES

BA & Project Tools: JIRA, Confluence, MS Visio, Lucidchart, MS Project, Balsamiq

Modelling: UML (Use Case & Process Flow Diagrams), BPMN 2.0, Swimlane Diagrams

Compliance Platforms: Actimize (SAM, RCM, WLF), RDC World-Check, Negative News Screening tools

Data & Reporting: MS Excel (Advanced), MIS Dashboards, SQL (Basic)

Methodologies: Agile/Scrum, Waterfall, SDLC, BPMN 2.0
