

TANMAI SRIVASTAVA

Senior Production Support Engineer | US Healthcare Payer Domain | Incident, Problem & Change Management | 9+ Years Experience

Pune, Maharashtra, India | +91-9036448206 | tanmaisrivastava1106@outlook.com

PROFESSIONAL SUMMARY

Senior Production Support Engineer with 9+ years delivering L2/L3 production support, major incident management and RCA-driven issue resolution across Healthcare, Cyber Security, FinTech and Enterprise Product organizations — including hands-on experience supporting HealthEdge Technologies' US Healthcare Payer platform. Owns production stability and incident response end-to-end — directing P1/P2 bridge calls, performing SQL-based debugging and data analysis, and coordinating Development, QA, Infrastructure and Business teams through permanent fixes. Works directly with US-based clients and stakeholders during critical incidents and reports directly to the Technical Director on vulnerability remediation and risk posture. Builds Shell/Bash automation to improve support efficiency and reduce time-to-resolution, and translates operational outcomes into executive-ready reporting.

CORE COMPETENCIES

- Healthcare Payer Domain: Production support for HealthEdge Technologies' US Healthcare Payer platform, Enterprise Healthcare Applications
- L2/L3 Production Support & Incident Management: Major Incident Management, P1/P2 Incident Leadership, Bridge Call Leadership, Root Cause Analysis (RCA), Problem Management, Change Management
- SQL & Data Analysis: SQL query debugging, data analysis for production issue resolution
- Automation & Scripting: Shell / Bash Scripting, Jenkins CI/CD, Git, Bitbucket, Ansible (exposure)
- Cloud & Infrastructure: AWS (EC2, S3, IAM, CloudWatch), Kubernetes, Linux / Windows Administration, Docker
- Client & Stakeholder Management: Client-facing communication, cross-functional leadership, executive reporting, technical documentation
- Governance & Risk: Vulnerability Management, Risk Reporting, SLA / SLO / SLI, Jira, Confluence, ITIL
- Monitoring (Supporting Skill): Prometheus, Grafana, Splunk, PagerDuty

PROFESSIONAL EXPERIENCE

Senior Production Support Engineer | *HealthEdge Technologies*

Feb 2025 – June 2026

- Provide L2/L3 production support for HealthEdge's US Healthcare Payer platform, supporting enterprise applications and driving resolution of complex production issues affecting business and client operations
- Write and troubleshoot SQL queries against payer platform databases to diagnose data inconsistencies and drive root-cause identification during production incidents
- Lead incident, problem and change management activities across P1/P2 production issues — directing bridge calls, performing RCA, and implementing permanent fixes in coordination with Development, QA, Infrastructure and Business teams
- Support production infrastructure underpinning Claims, Benefits, Enrollment and Provider Management modules, ensuring platform stability and uptime at the infrastructure layer
- Lead the Security Vulnerability Remediation Program, directing Dev, Infra and Security teams to resolve vulnerabilities within SLA; report directly to the Technical Director on program status and risk posture
- Manage the vulnerability Jira project end-to-end — assigning, tracking and escalating tasks across engineering teams; deliver monthly vulnerability reports with trend analysis and risk highlights to senior leadership
- Author Shell/Bash scripts and apply Claude AI for log analysis to automate troubleshooting workflows and reduce MTTR
- Manage production troubleshooting for Kubernetes-based applications, resolving deployment issues, pod failures and configuration errors
- Establish alert thresholds and escalation runbooks using Prometheus/Grafana monitoring; lead server upgrades and post-upgrade validation to sustain stability across critical healthcare infrastructure

DevOps Engineer | *Qualys Security Techservices Pvt. Ltd.**Jan 2023 – Feb 2025*

- Configured and owned Prometheus, Grafana and PagerDuty for daily production troubleshooting; authored alert rules and oncall escalation policies for production workloads
- Built and maintained Splunk dashboards to troubleshoot application performance issues and support operational reporting
- Executed CI/CD pipelines via Jenkins for deployments across DEV, QA and Production environments
- Managed AWS infrastructure (EC2, S3, IAM, CloudWatch) and administered 125+ Bitbucket repositories
- Authored shell scripts to automate troubleshooting workflows; led 24x7 on-call production support, coordinating team response during active incidents
- Administered Linux/CentOS environments and supported Kubernetes operations

Advisory Support Engineer | *Pitney Bowes**Oct 2021 – Jan 2023*

- Monitored production applications using AWS CloudWatch and Splunk daily; partnered with Product Owners to configure alerting per client requirements
- Directed outage management end-to-end — detection, stakeholder notification, incident bridge calls, progress tracking and post-incident RCA
- Managed Jira dashboards for task assignment and led team progress tracking during production troubleshooting; maintained team knowledge base
- Led 24x7 production support for internal products including SendPro Online and Lockers, ensuring SLA compliance

NOC Engineer | *Qualys Security Techservices Pvt. Ltd.**Jul 2018 – Oct 2021*

- Owned major incident management, including outage handling, RCA and long-term resolution planning across global IT operations
- Leveraged PagerDuty, Grafana, Kafka monitoring and Splunk daily for real-time production troubleshooting
- Delivered KPIs, trend reports and SOPs; drove ITSM process maturity across Global IT Operations
- Served as shift lead in manager's absence, directing the team through production troubleshooting; managed Problem Management workflows with cross-team follow-up

ATS Engineer, Incident Management | *Fidelity National Financial India**Mar 2016 – Jun 2018*

- Delivered L1/L2 production troubleshooting for internal applications; led bridge calls, authored RCAs and maintained SOPs aligned to ITIL guidelines
- Administered applications across Linux, Windows and AWS; resolved escalations for insurance and banking clients

TECHNICAL SKILLS

SQL | L2/L3 Production Support | Incident, Problem & Change Management | RCA | Shell / Bash Scripting | AWS (EC2, S3, IAM, CloudWatch) | Kubernetes | Docker | Linux / Windows | Jenkins | Git | Bitbucket | Ansible (exposure) | Jira | Confluence | ITIL | SLA / SLO / SLI | Prometheus | Grafana | Splunk | PagerDuty
