CORE COMPETENCIES

DevOps Architecture & Platform Engineering

Cloud Strategy, Migration & Multi-Cloud Deployments

CI/CD Pipeline Design & Release Automation

Infrastructure as Code

Kubernetes & Container Orchestration

Database Platform Engineering

Observability, Monitoring & Production Reliability

Automation Engineering & Toolchain Integration

Incident, Change & Service Management

Agile Delivery, Technical Leadership & Mentorship

EDUCATION

Bachelor of Computer Applications (BCA)
Mahatma Gandhi University — 2011

COURSES

MCSA Windows server 2012

Microsoft Azure Specialist

IBM Cloud advocate

AWS Certified Solutions Architect Associate

Tino Joseph

PROFILE SUMMARY

- Enterprise DevOps and Platform Architect with over 14 years of experience in shaping **cloud-native, database-centric platforms** and governing end-to-end delivery for highly available, production-critical systems.
- Deep specialization in **multi-cloud architecture and large-scale cloud migrations**, delivering resilient platforms across AWS, Microsoft Azure, IBM Cloud, and GCP with strong emphasis on operational stability and scalability.
- Architect of **CI/CD, Infrastructure as Code, and Kubernetes-based platforms**, enabling standardized, automated, and repeatable deployments across complex enterprise environments.
- Strong engineering focus on **production reliability, observability, and incident governance**, integrating monitoring, automation, and ITSM practices to support always-on systems.
- Technical leader driving **platform modernization and DevOps transformation**, aligning engineering execution with product and cloud strategy while maintaining hands-on involvement in automation and tooling.

WORK EXPERIENCE

DevOps Architect & Technical Manager

IBM | Jul 2021 – Present

- Owned end-to-end **architecture, engineering delivery, and cloud enablement** for **IBM Db2 Warehouse (DB2W)** across product development and enterprise deployments.
- Led and managed **DB2W engineering teams**, providing technical direction and aligning delivery with Product Management and platform roadmaps.
- Architected and delivered **multi-cloud DB2W solutions** on **IBM Cloud, AWS, and Microsoft Azure**, ensuring high availability, scalability, and operational stability.
- Drove **on-premises to cloud migrations** for database platforms, managing design, execution, and production readiness.
- Established **Infrastructure as Code** standards using **ARM, JSON, YAML, and Ansible**, enabling consistent and automated environment provisioning.
- Designed & governed **Kubernetes platforms** supporting database and cloud-native workloads.
- Built and maintained **CI/CD pipelines** using **Jenkins and IBM UrbanCode Deploy**, automating deployments, upgrades, and rollbacks through **Ansible Playbooks**.
- Implemented **monitoring and observability** using **CloudWatch, Azure Application Insights, AppDynamics, Grafana, Prometheus, and Sysdig**.
- Managed **incident management and production support** via **ServiceNow**, including root cause analysis and corrective actions.
- Delivered hands-on **automation and tooling** using **Python and Go**, and maintain technical documentation using **Git, Markdown, and SharePoint**.

Senior DevOps Engineer

Wipro | Sep 2018 – Jul 2021

- Supported and enhanced **enterprise DevOps platforms** using **AWS, Artifactory, and Jenkins**.
- Deployed and managed applications and resources in **AWS environments**.
- Automated platform and deployment workflow using **Python and Ansible**.
- Designed and improved **CI/CD pipelines**, reducing deployment timelines.
- Mentored **onshore and offshore teams**, ensuring adherence to **Agile and DevOps practices**.

IT SKILLS

- **Programming & Scripting:** Python | Go | Golang
- **Cloud Platforms:** AWS | Microsoft Azure | IBM Cloud | GCP
- Kubernetes | Docker
- **CI/CD & Automation:** Jenkins | IBM UrbanCode Deploy (UDeploy) | Ansible | Ansible Playbooks
- **Infrastructure as Code:** ARM Templates | JSON | YAML | Terraform
- **Databases:** IBM Db2 Warehouse (DB2W) | SQL | SQL Server
- **Monitoring & Observability:** AWS CloudWatch | Azure Application Insights | AppDynamics | Grafana | Prometheus | Sysdig
- ServiceNow
- **Data, AI & ML:** NLP | Deep Learning | TensorFlow | PyTorch | NumPy | Databricks | ETL | AIML
- Git | Markdown | SharePoint
- Power BI
- VMware

Cloud Lead Consultant

EY | Jan 2017 – Nov 2018

- Designed and implemented **cloud infrastructure solutions** using **Microsoft Azure and VMware**.
- Managed **cloud resource deployments and managed services operations**.
- Collaborated with cross-functional teams to strengthen **cloud standards and practices**.

IT Analyst

Accenture | Aug 2015 – Jan 2017

- Managed **SQL Server databases**, ensuring performance, security, and high availability.
- Executed **database migrations** and high-availability implementations.
- Built **monitoring and automated reporting** for resource utilization.

Systems Engineer

UST Global | Sep 2011 – Aug 2015

- Worked on **software engineering and system administration** initiatives involving network protocols and infrastructure support.
- Contributed to **Agile development environments** and operational troubleshooting.
- Supported system stability through **issue resolution and maintenance activities**.
