Summary

ServiceNow Senior Developer with 4 years of expertise in Security Operations (**SIR, VR, Threat Intelligence**), ITSM, and GRC. Led end-to-end **SecOps implementation and modernization** - from POC through demos to Production - using native, scalable ServiceNow automation. Experienced in vendor consultation, integration delivery, and stakeholder engagement across **complex Security teams**. Proficient in Cybersecurity frameworks (NIST, MITRE), AI-driven development, and Agile delivery. Recognized with multiple firm-wide and client awards.

Experience

PwC India | Remote
ServiceNow Developer | 08/2024 - Present

Global SecOps ServiceNow
Senior Developer, Security Incident Response

- Delivered Agile sprint stories with **95% on-time completion**; advanced **5+ OOTB POCs** to Production with coding and compliance standards.
- Built end-to-end **Phishing Modernization Automation** replacing SOAR-dependent (Phantom) process with native ServiceNow flows, playbooks, and scripted actions - automating **28,800+ emails** and **3,800+ submissions monthly**, saving **3 FTEs**.
- Modernized legacy SIR processes - migrated Business Rules to Flows, modified SIR Workspace, Phishing module, Observable-based auto-populate logic, and **deployed Splunk ES Integration (SIEM)** with OOB Observables (drove PRB resolution with ServiceNow); boosted triage speed by **40%** and unblocked SIR/TI team migration.
- Delivered **Security Case Management** to the Threat Intel team and designed **Repeat Offender Detection POC, Security Request** and custom UI Actions - improving response efficiency by **50%**.
- Recognized with **5+ client awards** including Partner-level recognition for modernization initiatives; co-delivered **Remote Process Sync POC** and RPS-SecOps implementation.

Global SecOps ServiceNow
Lead, Vulnerability Response

- Independently leading technical delivery, stakeholder engagement, driving weekly consultations and demos; initiated **Vulnerability Solutions Management** integration surfacing Solutions directly on VITs - cutting analyst triage time by **35%**.
- Delivered **Tenable** and **NVD** integrations and resolved inherited defects across integrations, CMDB lookup rules, and Approval rules - cutting remediation time by **40%** and MTTR by **30%**.
- Delivered client's **critical zero-day CVE detection requirement** by enabling Exposure Assessment, NVD-CPE Integration, and Crisis Management - leveraging **CSDM asset/service context** to close a **30%+ visibility gap** at zero additional cost.
- Eliminated **75% of manual patch handoffs** across Windows servers by integrating **Microsoft SCCM** with ServiceNow **VR Patch Orchestration** and a 3-step Exception Management workflow - reducing approval cycle time by **50%**.
- Addressed long-standing VR pain points by leading **ServiceNow vendor engagement** - delivered reverse demo and structured technical asks; authored engagement brief saving **20+ hours** of leadership review effort.
- Delivered **10+ technical demos** and **end-user ESP trainings** for SIR and VR across Teams, Leads, and Partners. Leveraged AI across development, research, and documentation for measurable productivity gains.

LTIMindtree | Bengaluru
