Network Security Engineer

Seeking challenging assignments with esteemed organization

PROFILE

- Offering rich cross-functional experience **on Network Infrastructure maintenance, support and implementation**; currently spearheading as **Network Security Engineer at Cognizant**.
- Proven competencies at all **phases of Maintenance and Implementation Life Cycle, which includes Requirement, Estimation, Design, Analysis, Testing, Implementation and Support**.
- Analytical thinker, consistently resolving ongoing issues, often called upon to consult on problems that have eluded resolution by others.
- A **systematic, organized, hardworking and dedicated team player with leadership qualities** with an analytical bent of mind, determined to be a part of a growth-oriented organization.

Technical Skills

CISCO Switching & Routing	BIG IP F5 LTM & APM	Palo Alto Firewall	FortiClient VPN solution
Panorama	Cisco Nexus 9Ks	Cisco ASA & FTD	VMware NSX-V
Zabbix SNMP Monitoring	Grafana dashboard	IPSEC VPN Tunnel	Routing protocol: BGP, OSPF
Session persistence F5 LB	SSL Offloading F5 LB	Zscaler ZIA, ZPA	Riverbed WAN optimizer

PROFESSIONAL EXPERIENCE (Total 6.5 Years)

Cognizant Technology Solutions

(Since February'2025)

Network Security Engineer

- Spearheading efforts as Network security engineer for the entire infrastructure of CTS.
- Hands-on experience on switching, routing and security of an entire network infrastructure on a global scale comprising of 1500+ firewalls.
- Implementation and maintenance of firewalls comprising of leading vendors like Palo Alto, Cisco FTD, Cisco ASA and VMware NSX.
- Expertise in troubleshooting techniques comprising of hands-on experience in NAT, Route and ACLs for different leading firewall vendors.
- Worked on creating session persistence for multiple global production URLs using Cookie, source/destination, hash-based persistence profile in F5 LB.
- Worked on SSL Offloading for many servers at F5 Load balancers by deploying the requisite certificates at the LB end.
- Worked on active health monitoring of servers present in F5 LB using HTTP. Leveraged this functionality to re-direct traffic to other nodes if one is not responding to the health monitors in specific timeout period.
- Worked on CyberArk onboarding of 1500+ devices by deploying correct route, NAT and ACL.
- Worked on DNAC onboarding of 1500+ devices by deploying correct route, NAT and ACL.
- Worked on troubleshooting entire network path comprising of different switches, firewalls and cloud infra for application deployment.

TATA CONSULTANCY SERVICES

(Since January'2020)

Network Security Engineer

- Contributed as Network engineer for one of major publishing company globally.
- Gained good experience on switching, routing and security of an entire network infrastructure on a global scale.
- Maintenance of SDWAN for all the global site (Vendor driven).
- Implementation and maintenance of BIG IP F5 load balancers and BIG IP F5 APM, Site to Site VPN tunnel with Palo Alto.
- Implementation, maintenance and overall ownership of Palo alto devices for network security including implementing rules, whitelisting or blocking of websites based on SOC recommendation.
- Timely patching of all network related devices in (N-1) level. Devices: Meraki, Palo alto FW, Riverbed, Cisco Nexus 9Ks, F5 BIG IP LTM & APM.
- Bandwidth report generation of all global sites as per 95 percentile formats.
- Efficiently handled successful analysis, continuation, designing, delivery & resolution of number of major incidents. Exploring RCA of major incidents and implementing workarounds.
- Managing Coordination with upstream - downstream projects for implementing changes impacting/involving multiple teams.
- Created Tutorial videos for interactive dashboards in Grafana platform.
