Fund Accounting & NAV Mgmt	Capital Markets & Derivatives	Stakeholder & Programme Mgmt	UAT Coordination & Defect Mgmt
Agile / JIRA / Confluence	Data Analysis & Financial Modelling	Python & Advanced Excel	Risk Factor Identification

PROFESSIONAL EXPERIENCE

Market Risk Business Analyst

Barclays Global Service Centre Pvt Ltd | August 2023 – May 2026

- Led end-to-end requirements gathering and authored comprehensive BRDs and FRDs for the Scenario Service under the FRTB Internal Models Approach (IMA) regulatory framework, ensuring alignment with Basel IV standards.
- Executed rigorous VaR validation and back-testing routines using historical market data, identifying model inaccuracies and recommending enhancements to risk measurement methodologies.
- Identified, classified, and modelled risk factors across equity, FX, interest rates, and credit spread, supporting classification of trading book positions under FRTB sensitivity-based requirements.
- Drove cross-functional collaboration between front-office quant teams, technology developers, and risk variance teams to ensure robust implementation of risk models across UATs, Dev, and Production environments.
- Designed and validated risk scenario generation workflows and sensitivity analyses for trading book exposures, supporting stress testing and capital adequacy assessments.
- Validated pricing data sourced from Bloomberg and Refinitiv against front-office systems, resolving trade booking discrepancies and ensuring high accuracy.
- Coordinated multi-workstream project deliverables across release cycles, maintaining release matrices and delivering full project documentation to senior stakeholders.
- Championed Agile best practices within the risk technology team, managing sprint planning, backlog grooming, and defect tracking via JIRA and Confluence.
- Key Systems: Scenario Service (UAT/Prod/Dev), ESM, REST APIs, JIRA, Confluence, Bloomberg, Refinitiv.
