

VIDYA SRI PATNAYAKUNI

SAP EWM Consultant

pvidyasri27@gmail.com • Bengaluru, India • 7893337100

Summary

I am an experienced SAP EWM Consultant with over 3+ years of expertise in implementing, configuring, and supporting SAP Extended Warehouse Management and Logistics Execution modules. I specialize in optimizing warehouse operations, improving supply chain efficiency, and integrating with third-party applications. My skills include resolving production support issues and collaborating with clients to implement process improvements

Experience

Accenture Solutions Pvt.Ltd

Bengaluru, India

SAP EWM Consultant

10/2021 - Present

Accenture Solutions is a global professional services company

- Provided functional support and resolved issues related to SAP EWM and SAP LE
- Took ownership of critical support tickets, including sales orders, inbound/outbound deliveries, STOs, shipments, and HU creation
- Resolved complex issues such as stuck queues, MLOR setup, and handling change requests
- Coordinated and implemented route codes, transportation zones, and factory calendars to optimize outbound logistics processes
- Supported businesses to complete UAT for implementing the change request
- Created user documentation for training materials, job aids, and system manuals for end users

Education

GMR INSTITUTE OF TECHNOLOGY

India

B.Tech

2016 -2020

Certification

- SAP EWM with SAP S/4 HANA 2020 (C_S4EWM_2020).

- Received "Core Value Award" and "Best people" Recognition in 2022.

Projects

Project 1 – LION AMS {AUS&NZ client [10/2023 - till date]}

- LION S/4 Hana Support Project belongs to Beverage's sector which serves in AUS and NZ region.
- Managed plant address changes to ensure accurate logistics and warehouse operations.
- Assigned reason codes for movement types to properly categorize and track inventory movements.
- Gained hands-on experience in route code creation to optimize outbound logistics processes.
- Configured transportation zones to improve routing and transportation efficiency.
- Updated factory calendars to ensure accurate scheduling and align with business operations.
- Updated lead times for transportation and warehouse processes to ensure timely deliveries.
- Configured route determination to enhance logistics operations and reduce delays.
- Updated carrier/service agent information to maintain accurate logistics partnerships.
- Provided access for PI tolerance to maintain accurate inventory and logistics controls.
- Managed RF user access, ensuring proper system access for warehouse personnel.
- Resolved issues where PGI (Post Goods Issue) failed due to hard allocated batch constraints.
- Addressed problems related to late optimization that impacted warehouse and logistics efficiency.
- Investigated and resolved issues where the system was not receiving ship and pick confirmation messages from the 3PL (Third-Party Logistics provider).
- Identified and resolved cases of duplicate Trip IDs, preventing delays in transportation management.

- Identified duplicate bond items in OBD which fails to PGI the delivery.
- Managed and resolved priority tickets across various processes, including sales orders, inbound/outbound deliveries, STO, shipment handling, and MLOR setup.
- Coordinated and ensured Mass Completion of ghost pallet reversals, resolving complex issues related to the Minimum Shelf Life (MLOR) setup for materials.
- Resolved stuck queues generated during the day, minimizing operational disruptions.
- Supported critical tasks related to sales order management, STO setups, and MLOR configurations, ensuring smooth operations.
- Incidents, Problems and Service request resolutions adhering to SLA.

Project 2 – Linfox {AUS, NZ} [12/2021 – 09/2023]

- Linfox is Australia's largest privately-owned logistics company, providing integrated supply chain solutions across the Asia Pacific region.
- Acted as a key SAP EWM consultant, supporting warehouse operations and enhancing efficiency for Linfox.
- Managed and resolved stuck queues, including resolving issues with HU stuck on resources, and retriggered orders through WebMethods.
- Contributed to the outbound processes, ensuring effective goods issue, picking, loading, and shipping operations in line with company standards.
- Played a vital role in User Acceptance Testing (UAT) for implementing process and system changes.
- Handled critical tickets related to warehouse management processes such as sales orders, inbound/outbound deliveries, STOs, and shipments.
- Supported SAP EWM integration with other modules and third-party systems for seamless operation.
