

VIKRAM SINGH SIYAWAT

Certified SAFe® 6 Agilist | Payments Technology Delivery Lead | Technical BA & Project Manager

Pune, India | +91-9881370004 | siyawat@gmail.com | Nationality: Indian

PROFESSIONAL SUMMARY

Accomplished Certified SAFe® 6 Agilist, Payments Technology Delivery Lead, and Senior Technical BA/Project Manager with over 17 years of experience in the banking and fintech domains. Proven expertise in leading complex payment system transformations, ISO 20022 messaging migrations, real-time payment (RTP) implementations, and core cards authorization platforms. Hands-on experience across full SDLC, technical backlog refinement, and API/database-level integration management. Skilled at bridging the gap between business, core engineering, and cross-functional technology teams to drive predictable release management, robust production support, and seamless delivery.

CORE COMPETENCIES

- **Payments & Banking Domain:** ISO 20022 Messaging Transformation & Migration (pac.008, pain.001, camt.053), Real-Time Payments (RTP), Transaction Lifecycle (Initiation, Authorization, Capture, Clearing & Settlement), ISO 8583, Prepaid & Card Processing Systems.
- **Technology Delivery & SDLC:** Technical Business Analysis, Systems Architecture & Data Mapping, Project Planning & Release Management, Production Support Oversight, API/Interface Dependency Management, CI/CD Pipeline Integration (Jenkins/Git).
- **Agile & SAFe Governance:** SAFe 6.0, Scrum, Kanban | Program Increment (PI) Planning, Scrum of Scrums (SoS), Backlog Refinement, Value Stream Mapping, RAID Management, Financial & Resource Capacity Planning.
- **Technical Skills & Tools:** SQL / PL-SQL Data Querying & Analysis, Database Migration (Oracle/Relational/NoSQL), REST/SOAP APIs, JIRA, Azure DevOps, ServiceNow, Confluence, AI-Augmented Analytics (Copilot, ChatGPT).

KEY ACHIEVEMENTS

- **Payments & ISO 20022 Modernization:** Successfully led end-to-end technical delivery and messaging transformations (including ISO 20022 and Real-Time Payments) across major banking and global payment networks.
- **Enterprise Delivery Predictability:** Elevated release predictability from 60% to 90%+ across multi-team Agile Release Trains (ARTs) by defining clear DoR/DoD criteria, refining story technical specifications, and implementing built-in quality frameworks.
- **Technical Debt & Defect Reduction:** Secured dedicated Innovation & Planning (IP) iteration capacity for core cards authorization platforms, yielding a 30% reduction in production escaped defects and a 20% decrease in technical debt.
- **Global Stakeholder Management:** Spearheaded delivery and technical alignment across 8+ international cross-functional technology teams (APMEA, US, and EU regions) delivering enterprise payment platforms.

PROFESSIONAL EXPERIENCE

Endava — India | *Technology Project Manager / Technical BA* • July 2025 – Present

- Lead technology delivery and business analysis for the FinTech Real-Time Payments (RTP) ART, driving hands-on implementation and migration of ISO 20022 payment messaging standards (pain, pacs, and camt formats).
- Direct PI Planning, System Demos, and Inspect & Adapt (I&A) sessions, boosting ART release predictability from 70% to 90% and velocity by 20% within two Program Increments.
- Collaborate with product managers, system architects, and dev leads to perform data field mapping, API interface specifications, and database query (SQL) validations for transaction processing.
- Facilitate cross-team technical dependency tracking using ROAM matrices, overseeing release management and production support protocols.
- Leverage DevOps tools (Jenkins, Git) for tracking CI/CD release readiness and integrate AI toolsets (Copilot, ChatGPT) for backlog refinement and delivery intelligence.

Tetra Pak — India | *Senior Scrum Master / Service Delivery Manager* • July 2023 – April 2025

- Governed digital service operations, encompassing financial tracking, budget forecasting, SLA compliance, and leadership over multiple Project Managers across the digital portfolio.

- Conducted refined user story workshops for Centre of Excellence Scrum teams, improving story quality metrics from 6/10 to 9/10 and curtailing scope creep by 40%.
- Optimized delivery throughput by analyzing JIRA flow metrics, cutting average cycle time from 12 to 8 days.

Capgemini Technologies — India | *Engagement Manager / Technical Delivery Lead* • Sept 2021 – July 2023

- **Barclays Project (Banking):** Managed end-to-end payment technology delivery, supervising scope, milestone schedules, cross-functional engineering dependencies, production readiness, and governance protocols; maintained robust RAID logs and SQL database integration tracking.
- **Discover Financial Services Project:** Functioned as Technical Delivery Lead & Senior Scrum Master for a 30+ member initiative enhancing the core Cards Authorization platform. Led ISO 20022 messaging adoption and ISO 8583 transaction processing analysis across 6 cross-functional engineering teams. Accelerated time-to-market by 25% via Scrum of Scrums while lowering escaped production defects by 30% and debt by 20% through structured IP iteration planning.
- **Alliance Data Card Services Project:** Led high-performing technology teams executing a major legacy mainframe migration to the Fiserv Omaha processing platform. Managed complex data mapping, relational database conversions (Oracle/NoSQL), and third-party API dependencies, achieving a 95% sprint commitment reliability rate.

Mastercard — India | *Scrum Master & Senior Technical Business Analyst* • Aug 2015 – Sept 2021

- **Cash Passport Program:** Acted as Technical BA & Scrum Master for the global Cash Passport prepaid mobile platform, leading end-to-end requirements, payment gateway integrations, ISO payment messaging standards, and production support across 8+ international technology teams in APMEA, US, and EU markets.
- **Enterprise Web Portals:** Led technical business analysis and systems engineering for global content portals (Mastercard.com and Priceless.com) powered by Adobe Experience Manager (AEM); authored technical user stories, defined API integration criteria, and directed UAT/Release Management cycles.

Dell International — India | *Business Analyst* • Oct 2011 – Aug 2015

- Served as Business Analyst for enterprise CMS and SharePoint ecosystems across Dell.com; engineered process maps, authored business requirements, and led taxonomy and workflow solutions.

EARLY CAREER

Jabil Global Services / Definity First — Poland & Mexico | *Programming Analyst / Web Developer* • July 2009 – Dec 2010

Developed custom application modules, SQL database queries, and custom enterprise workflows.

EDUCATION & CERTIFICATIONS

-
- **Education:** Bachelor of Engineering (B.E.) in Computer Science / Engineering — University of Rajasthan (2004 – 2008)
 - **Certifications:** Certified SAFe® 6 Agilist | AI for Project Managers and Scrum Masters
