PROFILE SUMMARY

Results-driven Product Owner and Business Analysis leader with 14+ years of experience delivering large-scale digital transformation, platform modernization, and operational optimization initiatives within investment banking and financial services.

Proven expertise in:

- Product Ownership and Agile delivery
- Legacy modernization and mainframe decommissioning
- Trade lifecycle and post-trade operations
- BPMN process modeling and workflow transformation
- AI-driven automation and operational efficiency initiatives
- Stakeholder management across global cross-functional teams

Demonstrated success in driving modernization programs, reducing manual effort, improving operational efficiency, and delivering scalable enterprise platforms aligned with business and regulatory objectives.

NOTABLE ACCOMPLISHMENTS

- Reduced manual reporting dependency by 40% through reporting platform modernization.
- Eliminated 7 FTEs worth of manual effort through workflow automation initiatives.
- Improved operational efficiency by 20–30% across multiple transformation programs.
- Led enterprise modernization initiatives involving microservices migration and cloud-ready infrastructure adoption.
- Delivered Agile product releases across complex global banking environments.

WORK EXPERIENCE

Apr 2024 – May 2026 | Associate Vice President – Product Owner | Wells Fargo India

Legacy Modernization:

- Led Product Ownership for enterprise banking applications, defining product vision, roadmap, and feature prioritization aligned with strategic modernization objectives.
- Conducted current-state and future-state process analysis using Microsoft Visio and BPMN 2.0 standards to identify process gaps and optimize operational workflows.
- Drove migration of enterprise applications from monolithic legacy architecture to modular Java-based platforms, improving scalability and maintainability.
- Led Product Ownership activities for migration to the Red Hat OpenShift platform, enabling transition to next-generation cloud-ready infrastructure.
- Directed SIT and UAT execution, ensuring high-quality releases and alignment with business and technical requirements.

Revenue Cycle Transformation:

- Directed strategic migration from legacy MS Access workflows to scalable microservices-based platforms supporting billing and reconciliation operations.
- Improved system reliability by 20% through modernization and workflow optimization initiatives.
- Facilitated stakeholder workshops across operations, accounting, finance, and WIM teams to gather and prioritize business requirements.
- Led data migration strategy and execution, ensuring seamless transition and data integrity across multiple legacy databases.

CORE COMPETENCIES

Product Management & Agile Delivery

- Product Ownership
- Agile & Scrum Methodologies
- Product Roadmap & Strategy
- Backlog Prioritization
- User Story Development
- Release Planning
- Sprint Execution

Business Analysis & Transformation

- Business Process Modeling (BPMN 2.0)
- Current-State & Future-State Analysis
- Gap Analysis
- BRD / FRD / Functional Specifications
- Workflow Optimization
- Operational Transformation
- Legacy Modernization

Banking & Financial Services

- Investment Banking
- Trade Lifecycle Management
- Post-Trade Operations
- Prime Brokerage
- Mutual Fund Operations
- Reconciliation & Billing Workflows
- Exception Management

Technology & Tools

- SAP Signavio
- Microsoft Visio
- Jira
- Octane
- BPMN 2.0
- Microservices Architecture
- Container platform Migration
- AI & GenAI-driven Solutions

Leadership & Stakeholder Management

- Cross-functional Leadership
- Team Mentorship
- Stakeholder Communication
- Executive Reporting
- Workshop Facilitation
- Strategic Change Management

CERTIFICATIONS

- Certified Scrum Master (CSM)
- Professional Scrum Product Owner (PSPO 2)

EDUCATION

MBA / PGDM – Finance

Jawaharlal Nehru Technological University

Bachelor of Commerce (B.Com)

Nagarjuna University

Dec 2021 – Apr 2024 | Senior Consultant – Business Analysis & Product Owner (Trade life cycle) | Capco Technologies- Morgan Stanley

Mainframe Decommission:

- Led strategic decommissioning initiatives for legacy mainframe platforms, identifying modernization opportunities and defining transformation roadmaps.
- Managed Agile product backlog, sprint execution, and release governance across global delivery teams.
- Translated complex business requirements into actionable user stories and functional specifications, ensuring alignment between operations and technology teams.
- Designed and launched a UI-based reporting platform that reduced manual dependency on static reports by 40%, improving operational efficiency across global teams.
- Facilitated stakeholder engagement sessions to identify workflow bottlenecks and drive future-state process improvements.

Jul 2021 – Dec 2021 | Senior Consultant | Xoriant Solutions- Finastra

- Translated business objectives into conceptual application designs to improve usability and operational efficiency.
- Managed end-to-end testing lifecycle including test planning, test execution, defect management, and UAT coordination.
- Collaborated with production support teams to implement enhancements and resolve critical system issues.

Oct 2013 – Jul 2021 | Senior Business Analyst & Product Owner | BNP Paribas India solutions

Global Hiport (Post trade books and records platform):

- Conducted data-driven analysis to identify product enhancement opportunities, improving user satisfaction by 15%.
- Collaborated with business users, product owners, and development teams to ensure seamless product delivery.
- Managed testing governance and defect resolution processes, achieving 100% defect resolution before production deployment.
- Streamlined testing workflows and approval processes, improving delivery timelines and stakeholder alignment.

Project CIBOT:

- Led automation initiative for subscription and redemption transaction processing, eliminating 7 FTEs worth of manual effort.
- Designed centralized workflow solution enabling direct transaction processing and exception management.
- Spearheaded stakeholder workshops and future-state process definition activities.
- Partnered with technical teams to support architecture and integration design.

Apr2012 – Oct 2013 | Associate | TCS e-Serve

Project Rainbow:

- Supported enterprise transformation initiatives focused on optimizing prime brokerage trading workflows.
- Automated trade order processing through Straight-Through Processing (STP), reducing operational errors and improving transaction turnaround times.
- Streamlined post-trade support and asset setup processes through UI modernization initiatives, improving operational efficiency by 30%.
- Supported testing and implementation activities for enterprise workflow transformation projects.
